10 TRUE STORIES

Sadly, there aren't any pictures of how cool the AP crew looked as they cruised to the European Computer Trade Show in someone else's flash car last month. But we do have the news they picked up.

14 THE GALLUP CHARTS

Can *Lemmings 2* hit the top spot again, or will it be Rolf Harris with his amusing cover version of *The Secret Of Monkey Island*?

16 THE SHAPE OF THINGS TO COME

This month's most-changed section of AMIGA POWER boasts the lowdown on *Alfred Chicken*, *Batman Returns*, *Twilight 2000* and, er, four more.

43 ANSWER ME! - SURVEY '93

Okay, time to stop whinging and get constructive as we give you your big chance to shape the face of AMIGA POWER in the coming year. Don't miss it!

50 CONSUMER GOODS CORNER

To celebrate the arrival of Dino Dini's new game, we offer you a lush VCR and some top footy action to watch on it.

52 DIARY OF A GAME

Fresh from a couple of months off, The Hidden are back with more on *Spodland*.

56 COMPLETE CONTROL

Jonathan Davies is so big he's got twice as many cheats as normal this month, plus *KGB* and *Legends Of Valour* tips and, of course, *The Last Resort*. What a geezer.

82 DO THE WRITE THING

They're the pages YOU write, and they're always (*That's enough Viz-pinching.* - Ed)

86 SUPER PUBLIC DOMAIN WORLD

Dave Golder's back with more of the best PD, but this time he's got a whole new look into the bargain. Well, his page has, at least. Dave, lose the sideburns.

GET WELL SOON, BOSS

You won't be seeing much by Linda in the mag for the next couple of months. Our beloved Ed's been very seriously ill, and she's currently recuperating in a fearsomely impressive way in a Bristol hospital. The AP crew would like to take this opportunity to thank all at the RUH and Frenchay for their impossible wonderfulness - we're more grateful to you than we could ever adequately express. If anybody wants to send Get Well Soon cards, plastic flowers etc, they'll be gratefully appreciated, via the usual AP address. Normal service will otherwise continue. On with the show...

It's unbelievable, isn't it? Other mags struggle to fit two games on a disk, and we bring you FOUR! (Count, as we're wont to say, 'em!) Even though one of them's the biggest demo you'll see this year (probably), another's one of the best games of all time, and, well, look...

disk

INTRODUCING DISK 26

GRAHAM GOOCH WORLD CLASS CRICKET

Welcome in the cricket season with the best Amiga cricket game there's ever been - try for yourself and see.

DEFENDER

It's one of the best games of all time. It's, quite literally, the mother of all subsequent shoot-'em-ups. It's on our coverdisk. Play it.

BIPLANES

One or two-player dogfighting fun of the highest order.

GALAXIA

It's *Galaxians*, really. But it's great anyway. Thank you.

GOT A FAULTY DISK?

● Oh no! Are you sure? Before you go any further, try the procedures described in the panel over the page. If, after all that, you *do* have disk problems, simply place it in an envelope, along with an SAE and an explanatory letter, and return it NOT TO THE AP OFFICE but to: AMIGA POWER Disk Returns 26, DisCopy Labs, PO Box 21, Daventry NN11 5BU. NOT here to AP. We really don't want to know.

YOUR DISK AND YOU

READ THIS BIT FIRST OR NO-ONE WILL TAKE ANY NOTICE OF YOU WHEN YOU SAY THAT YOUR DISK DOESN'T WORK.

- *Graham Gooch Cricket* is one meg only.
- To load any of the games, all you have to do is switch off your machine, insert the disk, and switch your machine back on again.
- An options menu will appear. Simply follow the instructions to load the game of your choice.
- Just to be on the safe side, though, the on-screen instructions say that you should press the appropriate function key to make your selection.
- It really is that simple.
- You'll have to reset your machine in order to play one of the other demos. When you do so, simply follow the instructions above.

● Remember to keep the disk you are playing your game from in the drive at all times. And remember – switching the machine off for 20 seconds or so before loading a new program will help prevent disks being infected by stray viruses.

● Have a good time.

OH NO! SOMETHING WENT WRONG!

- Are you sure?
- Try all that stuff again, making sure you've disconnected any peripherals the program might not 'like'.
- If your disk fails to load, then pop it in a padded envelope, along with a letter explaining the problem and an SAE, to:

AMIGA POWER Disk 26 Returns
DisCopy Labs
PO Box 21
Daventry
NN11 5BU

● We're really hoping that you're reading this bit, because it's quite important: please don't send your disks to us at the AMIGA POWER office. We really don't know how to fix dodgy disks. We've tried, we really have, but we're just crap at it. So send it DisCopy Labs. Please.

GRAHAM GOOCH CRICKET

Jimmy Cricket was a Disney character.

This is one of those games that you can't say "It just isn't cricket" about. Because it is.

Game: Graham Gooch World Class Cricket
Publisher: Audiogenic

As the football season fades into the realm of memory and the summer begins to resonate to what we always like to refer to as 'the crack of willow on leather', what better time to bring you a demo of what looks like the Amiga's finest cricket game to date? Not just any old demo, either – this is one of the biggest we've ever run, consisting basically of the entire game but

with matches limited to two overs. That's about as much as you need in the way of background, I think, so let's get down to the important business of telling you how to play the thing. But before we launch into a detailed account of all the ins and outs (ho ho), please note that all these controls are reversed for a left-handed batsman

RUNNING

If you successfully hit the ball and decide to go for some runs, press the fire button. The batsmen will begin to run fairly slowly,

case the fire-button press will be taken as a signal to go for another run after they complete the current one.

BOWLING

Before you start your bowling run-up, decide where you want the ball to bounce by positioning the small white square with the joystick and fixing

but you can speed them up by wagging the joystick from side to side (in fact, if you decide to run straight away, just start wagging and don't bother about pressing fire). If you start running but change your mind, pressing fire will make the batsmen return to the crease, unless they're more than halfway in which

Game: Defender
Authors: Acid Software

What is there to say? Way back in issue seven we gave you on the coverdisk an arcade-perfect version of *Asteroids*, arguably the greatest coin-op game of all time. At the time, we said that *Asteroids*' mantle as all-time Number One arcader was "a position only seriously challenged by Williams' *Defender*". Now, we bring you an arcade-perfect version of *Defender* so you can judge for yourself. Do you love us, or what?

Well, alright Mr Picky, it's not ABSOLUTELY arcade-perfect – the laser blasts are a bit shorter than the long sizzling lines of the original, but that's

about it. As far as we can tell, save for the Hyperspace feature that nobody ever used anyway, every other last little bit of the coin-op is right here in this conversion, right down to the sound effects. And we should know –

we've been playing it solidly for days here in the AP office (current top score a none-too-unbeatable 112,750 by Stuart). If you're a crumbly like us, stand by for a nostalgia blast of colossal proportions. If you're one of those new-fangled young people, get ready for one of the most fearsome assaults ever launched on your person by a collection of pixels. The original *Defender* was written in 12K of memory, but see how long you play it for compared to your average coverdisk demo...

HOW TO PLAY

Oh, if only it were that simple. If only a few well-chosen words could make you good at *Defender*, what a different place the world would be. But anyway, here's the plot. The Landers (green aliens shaped a bit like diving bells) are trying to capture your Humanoids (little purple dudes walking around helplessly on the ground). If they succeed in picking one up and carrying him to the top of the screen, the Lander fuses itself to the

What kind of music was around then? Ooh, let's see – Ultravox, Visage, Spandau Ballet.

Do you remember what you were doing when *Defender* was in the arcades? I was at school, me.

And people were dressing in those awful tartan trousers and frilly white shirts. Dreadful.

button, drag the mouse to the new position and release the button again.

EVERYTHING ELSE...

Frankly, we've only scratched the surface of the numerous options available in this game, but unfortunately we haven't got nearly enough room to explain all of them. You shouldn't have too much trouble navigating your way around the user-friendly options menus, so get to it and, er, happy batting.

FIELDING

Each bowler has a set fielder pattern, but you can change these, or even copy fielding set-ups between bowlers so you don't have to keep changing them. To change the fielding set-up, press Space while the bowler is waiting to bowl. A menu will appear, which should be pretty self-explanatory. When the pitch diagram appears, move the pointer to a fielder's name tag, then press the left mouse

Game: Biplanes
Author: Peter Mason

Back in the early days of AMIGA POWER, the biggest single reason for missed deadlines was (so Stuart tells us) a little thing called *Bip*. A two-player dogfight based on an ancient Atari VCS game, it kept the team occupied for many hours of intense and bitter rivalry. And now it's back again, in a new version - just the same as the old one, except now there's a computer opponent to play against if you haven't got a Deputy Editor handy. Load it up, fly around, stall and plunge to a horrible death, over and over again. It's great.

Humanoid and forms a much more formidable enemy called a Mutant, which then chases you relentlessly until one of you dies. Helping the Landers out (by killing you) are Pods, Bombers, Swarms and the utterly evil Baiters, which appear if you take too long to clear a level.

HELP ME!

It's not all bad, though. As well as your lasers, you've got the arcade world's first ever Smart Bomb, which kills every enemy on the screen. You start with three of these, and get a new one (plus an extra life) for every 10,000 points you score. Also, when a Lander kidnaps a Humanoid, you can still save it. If you shoot the Lander while it's carrying the Humanoid up the screen, the Humanoid will be released from the exploded Lander and fall to the ground. If it's not too high up, it'll land safely (and give you 250 bonus points), but you can make sure by flying into it with your ship (500 bonus points). It'll then hang off the bottom until you touch the ground, when it'll jump off and start walking around again (500 more bonus points). You can carry as many of your ten Humanoids around at once as you like.

But - if you allow all ten of your Humanoids to be mutated (or shoot them yourself by 'accident'), things get nasty. How nasty? The world explodes, that's

how nasty. Every Lander turns into a Mutant and unless you're superhuman you can pretty much kiss your ass goodbye.

IS THERE NO HOPE?

Well, yes there is. Firstly, there's a Scanner at the top of the screen that shows you where all the baddies are. And secondly, every fifth level, you get your ten Humanoids back, and with the Humanoids comes the planet. Phew. That is, of course, assuming you ever get to the fifth level...

BASICALLY SPEAKING

Believe it or not, *Defender* is written in BASIC. Well, sort of. It's programmed (by the people who brought you *Woody's World*, reviewed on page 36) in a language called Blitz Basic 2, which the boys at Acid/Vision Software wrote themselves. Impressive, huh? For more info, check out the text file about it (called 'Blitz2.about') on the coverdisk.

QUEST FOR GALAXIA

Graphics weren't too important in the early 1980s.

Game: Quest for Galaxia
Author: 'Goth'

Putting together this month's coverdisk, what should we find but 85K of free space at the end. "That's a bit of a waste", we thought, so we rummaged around and found this little *Galaxians* clone. It's just as simple as it looks, but if you think that 'simple' means 'easy', hit F9 on the title screen to start at the toughest level and then see how tough you feel.

TRUE STORIES

ECTS ROUND-UP

This month, the AMIGA POWER team took a couple of days off to wander around the Spring European Computer Trade Show in London. Your faithful newshounds put up with the terrible discomfort and we even pretended to enjoy it – just to bring you lot a couple of pages of news. Oh, it was difficult to settle down and relax in the flash sports car we borrowed to drive down to London, it was hard finding room for all the free sandwiches and it was even more demanding to sit there in comfy chairs while people showed us all their new games. It was an arduous task, but – hey! – somebody had to do it. And did we find out lots of thrilling news? You bet we did, and here it comes...

GREMLIN

Gremlin were full of secrets – they've definitely got a few things up their corporate sleeve, but they weren't letting on!

However, we can tell you that their forthcoming releases include *Hero Quest 2*, *Premier Manager 2*, *Zool 2* and *Litil Divil*. The latter won't be released on the A500 or the A1200, but it will be coming out and we'll be reviewing it! *Zool* himself is all set to become the star of lunch boxes, pencil cases and duvet covers as he's been taken on board by PSL, the UK's leading licensing company who are responsible for the ubiquity of characters such as *The Simpsons*™, *Garfield*™ and *Super Mario Bros*™.

Here's that impish sprite in person. But which Amigas will he run on? Stay tuned for details...

The game itself boasts the intriguing innovation of cartoon-quality graphics that you can actually control. What will they think of next?

CORE

Core's up-and-coming *Blastar*, which we previewed last month, was looking great – if, by the time it's released, it's not the best all-direction-scrolling *Sinistar*-style shoot-'em-up around then we'll be quite disappointed. Work also continues apace on two other new Core titles – *Darkmere* and *Bubba'n'Stix*. But we don't know very much about them yet. Sorry.

IMPRESSIONS

For those of you who like to spend your leisure hours being all clever and strategic, Impressions have got enough games coming out to keep a whole battalion happy. There's *Rules Of Engagement 2*, *When Two Worlds War*, and *The Blue And The Gray*.

CODE MASTERS

The Codies had great news to impart – *Micro Machines*, their *Super Sprint*-kind of racing game, is all set for an Amiga release. It's a racing game with one major difference – the racing cars are tiny and you race around bathtubs, table cloths and other equally ridiculous locations. On hearing this great news, the AMIGA POWER team stopped sniggering at the pop band (below) and all went "Wow" in unison. *Micro Machines* has been a bit of a smash on the NES and the Mega Drive and apparently the two-player game is a bit of a stonker. As well as oohing and ahing at *MM*,

we took a peek at *Firehawk* (coming soon, kids!) and gazed at *Worlds Apart* (who are apparently the new *Take That*) in admiration. (Ahem.) After nabbing a couple of budgies, we moved on...

Above and right: Racing on the small scale with the Codies' *Micro Machines* (not shown actual size).

Left: Could this be the new *Take That*? And, for that matter, does anyone specifically remember asking for another one?

IN BRIEF...

Renegade are working on *Uridium 2*, Team 17 have converted *Alien Breed 2* to the A1200 and are also slaving over a hot Amiga to bring you *Body Blows 2*. But before that, we'll be reviewing *Overdrive* (out soon!). Over in Germany, the Thalion programmers are busy on *Ambermoon*, which they hope will beat *Legends Of Valour* at its own game. For future release are *U96* (a submarine simulation), *Search Air Rescue* (a helicopter simulation) and *No Second Prize 2*. Software 2000, another bunch of European programmers, are also working on *Ice Hockey Manager* for US Gold.

KRISALIS

Not content with wowing us with *Arabian Nights*, Krisalis showed us the latest version of *Soccer Kid* and it doesn't half look smart – tough but smart. After

...and that the football, it has robbed him of the wee bit sense he had.

Soccer Kid, Krisalis' next project is *Legends* which, hopefully, we'll be previewing next month. It's a kind of role-playing, fantasy game with an arcade element, set in a modern post-nuclear landscape in which you have to make the four characters into heroes so that they can save the world. (Phew.) After that, we're hoping for a glimpse of *Tomb World*, which will be followed by a puzzler that's going to be called, erm... I don't know how to tell you this. Er, okay – it's *Soup Trek: The Search For Stock*.

MINDSCAPE

Mindscape now have *Alfred Chicken* ready for preview (see page 23 of this issue for the full story).

Said chicken decorated the hit T-shirt of the show – everywhere you looked somebody had the slogan "I've been laid by Alfred Chicken" across their chest. Later in the year we're also expecting *Sim Life*, *Mavis Beacon Teaches Typing* and *Mario Is Missing*.

MAVIS BEACON
TEACHES TYPING!
Version 2.0

The Finest Typing Program In The World

Mavis Beacon's typing skills shine like an er... beacon. And soon she'll be sharing them with you.

Like most birds, *Alfred Chicken* began life as an egg. In a publicity campaign. On the Game Boy.

PSYGNOSIS

One company with loads of releases planned is Psygnosis. *Walker* is out on the A1200 soon, *Creepers* is imminent and coming up are *Prime Mover*, *Second Samurai*, *Dracula*, *Microcosm*, *Theatre Of Death* and *Innocent – Until Caught*.

INTERPLAY

Interplay have a busy summer ahead too. They're currently working on three games: *The Lost Vikings*, *Star Trek* and *Castles 2*.

Lost: One Viking. Answers to Nordic war cries.

Isn't it a bit ironic that there's only one version of *Monopoly* out on the Amiga?

SUPERVISION

New from Supervision is the definitive Amiga version of that good old family favourite,

Monopoly. Jam-packed full of cartoony pictures of hotels and stuff, it's the sport of desirable London property-trading brought to colourful and exciting life right there on your screen. Further traditional-style board-game licences are mooted, so keep 'em peeled...

CYBERDREAMS

Over at the Cyberdreams stand we were sat down and told all about the ready-real-soon-now *CyberRace*. It's a racing game that's also a war game, with graphics by Syd Mead who – stop me if you've heard this before – helped in the design of films like *Blade Runner*, *2010*, *Aliens* and *Short Circuit*. Sometime in the future, two tribes are fighting against one another and war takes the form of a race. So the hero, the chap you control, is racing and fighting for his love and his tribe.

When designing the game, Cyberdreams visited a space centre in Los Angeles and acquired detailed photos of the terrain of various planets. So you can actually race over real planetary surfaces. Sort of. We also admired the packaging, which is kind of 3D and comes with a metal model of the ship you race in. Coo, eh? Also on the cards are *Dark Seed 2* and something called, somewhat intriguingly, *I Have No Mouth, And I Must Scream*, a sci-fi novel adaptation. Apparently.

You can race across bewitching landscapes, and battle hideous alien creatures. And all because... "Dad, can I have some money for a new shirt?" "Sure you can, son – there you go."

THE MAN RESPONSIBLE FOR WAR IN THE GULF

The Gulf War – who played the leading parts? Saddam Hussein seemed like quite an important character, Norman Schwarzkopf had a fair bit to do with it and George Bush popped up on telly quite a lot.

But none of these people are the man we're looking for, 'cos David Pringle was undoubtedly the main man. How do we know? Just take a look at the evidence – it's literally underwhelming.

BLACK SECT

It's here – the first French adventure game to take place on the Yorkshire Moors! We should have a review next month, but for now we'll entertain you (and ourselves) by giving you a swift plot rundown. Are you ready? Okay, your grandfather is found murdered at his home in Hobsdale and the spell book that protected the village from wicked magic has been stolen. Obviously with the book gone, the village is open to the fear and the terror. In no time at all, the Yorkshire Moors are infested by the Black Sect. And guess what? It's your job to avenge your granddaddy's death by destroying them. Spook. Gawp at the screenshots and watch out for the review.

Above: These 'supermodels' are just skin and bone.

Left: No, I reserved a double room with a bath.

NEW BOYS IN TOWN

Coming soon to a store near you is the A4000 030 – just £999 for a super-powerful new Amiga with a built-in 80Mb hard disk drive. Similar in many ways to the A4000 040, the main difference is in its more economical 68030 chip. It's even faster than the A1200, yet is cheaper than the top-of-the-morning A4000 040. Coo, eh?

Now you know us – here at AP we're not very technically minded and the ins and outs of chips and megabytes are completely beyond us. But what we do understand is that there's a new Amiga in town which is all ye on earth know and all ye need to know.

Rumour has it that Commodore are also about to release the Amiga CD which will replace the existing CDTV system. It's thought that the machine will be ready in time for Christmas and that some software publishers are already getting on with designing Amiga CD games. Hurrah, eh?

A SOLUTION TO INCOMPATIBILITY

Daniel Kendall of Bradford has written in to us with a solution to any game compatibility problems you A1200 owners might be having. To get more of your 500 and 600 games to work on the 1200, simply do the following:

- Reset the computer before the purple screen re-appears
- Hold down both mouse buttons until a grey screen appears
- Go to 'boot options'
- Click on 'disable CPU caches'
- Go to 'use'
- Go to 'display options' and change chip type to 'original chip type'
- Go to 'use' and click on 'boot'

If any games still refuse to work, try doing the above and then using the 1.3 Kickstart disk. You'll have to follow the same procedure every time you reset the computer and want to use 'incompatible' software.

RECOMMENDS

Well, for one reason or another, there STILL doesn't seem to be many games around, but luckily, what there is – is nearly all great...

DESERT STRIKE (ELECTRONIC ARTS)

Consoles? Who needs 'em? The Amiga version of *Desert Strike* kicks sand in the face of both the Mega Drive and SNES incarnations, by virtue of meatier explosions, butch-ier sound and more colourful graphics (even if everything still seems to be yellow). It's an awesome game aside from all that, though – you get so much freedom within the mission set-up that it's never the same twice, which is something you can't say about most shoot-'em-ups these days (or any days). Even Linda likes this, and she's a girl. (*You're fired.* – Ed)

FLASHBACK (GOLD/DELPHINE)

Wow. No, really, wow. It's just so... wow. The thing about *Flashback* is – wow. Like, obviously, the graphics – wow. But it's not just those, there's... wow. Wow. I'm really sorry about this (wow), but I can't help it. Wow. 'Animation' seems so inadequate a word. Wow, wow, wow. Actually, 'wow' seems fairly inadequate too, but it's going to have to do for now. Wow. Wowey wowey wow wow. Great gameplay, decent lifespan this time around, nice music and everything, but mostly... wow.

ARABIAN NIGHTS (KRISALIS)

There's been a bit of a lull in the Platform Game Wars of late, but Krisalis have really re-opened hostilities with this corker. It's pretty, it's fast, it's got some originality and imagination, there's a cute central character (*No! You're kidding!* – Bruce Forsyth) and there's, er, a slippery-slidey ice world. Damn. I HATE slippery-slidey ice worlds. Hate hate hate hate hate HATE. Ahem. Still, nothing's perfect, so I guess it would seem that 'lovable puzzley platform charmer' will have to be good enough for now.

B17 (MICROPROSE)

Despite some appalling oversights and let-downs (like, how come when you're in the top turret and you swivel your guns round so you're pointing at your own tail and then fire, it doesn't shoot the tail off?), this is a comprehensive and tension-packed flight sim with a difference – you don't just have to be the pilot, you have to do everything else as well. It's not fast-moving in a frame-rate kind of way (although it's far from being actually slow), but in the heat of the action you won't have time to take a breath.

LEMMINGS 2 (PSYGNOSIS)

Look, if anyone's got the faintest idea how to do Outdoor World Four ('*Deliverance*') without losing any lems, could they just write in and tell us, please?

KNOW HMV • KNOW GAMES

£5 OFF!

So, you know how it is. The price of games, eh? We're all always complaining about it, but now AMIGA POWER's actually gone and done something about it. Cunningly concealed behind this month's coverdisk, you should have found two vouchers, each of which can save you an entire fiver off the price of a game at HMV stores. The rules are as follows:

1. The vouchers only apply to games priced over £20.
2. You can only use one voucher on any one game.
3. There is no rule 3.

And that's it – it's as simple as that. The list of participating HMVs is on the back of the vouchers, and look out for more offers in the future...

THE SHAPE OF THINGS TO COME

Dark shadows are looming on tomorrow's horizon. Kids! Don't try putting any of these in your refrigerator.

There are two main protagonists within *The Cartoons*. Representing the 'ego' we have the 'Super Angel', broadly corresponding to the folk archetype of the 'Fairy Godmother'.

The 'id' is personified in 'Toons', an allusion to "that which helps you breathe more easily". Note also the double invitation to "Get Ready". Get ready for what? We are never told.

Game: The Cartoons
Publisher: Loricel
ETA: Next month

Briefly: Super Angel and Toons are *The Cartoons*. They're also cousins, best friends and animated characters with a mission. Y'see, the Monsters (cue eek) (Eek! – Ed) have stolen six magic rings. In order to retrieve the rings, Super Angel and Toons have to race around, ooh, 21 levels solving puzzles, hitting naughty things, buying good things and finding the bonus levels. Hurrah!

The teacher talks: Two of the most important things to consider in any form of cultural expression are the theories of 'the other' and 'the carnivalesque'. It is the latter that we will be concentrating on today, as its application to cartoons is immense.

The term 'carnavalesque' describes an event, or series of events, in which society's morals and basic guiding principles are turned upside-down. Perhaps the easiest way to explain is via the traditional medium of the pantomime. On the pantomime stage everything is topsy turvy – the hero is a girl dressed up as a boy, the stepmother and the ugly sisters are men dressed up as women. If, in normal life, the roles were reversed in this way then the main characters would be frowned upon. But on stage this is allowed. (Linda? Linda? Earth calling Linda... – Stuart)

In cartoons, the same applies. The characters run around inflicting all sorts of grievous damage upon one another, but nothing is final. Thus our friends Mr B

Bunny, Mr D Duck and Mr S Cat can have their fur/wings singed, their heads flattened and their eyelids burnt off... yet in the very next frame they'll be back, large as life and healthy as a ladybird. But in real life, should you ever try anything you see in a cartoon, you'll be locked up quicker than you can say 'Meep meep'.

Similarly, cartoon characters are technically outside the censure of...
The creator speaks: Look, can I tell you something about the game now? Yes? Okay, right, where was I? Well, it's an arcade/ strategy concept and it's going to be great. We're really proud of the two 'Cartoons' – they've got such

character. You'll love the little Toons, he's so sweet. He's so helpless that he can't survive without the help of the bigger Super Angel. And it's such a busy game (sort of a bit like *Builderland*, but lots, lots better) – as well as killing things you've also got to collect all the bonuses and objects that you find along the way. To make things a little more complicated, these objects can only be used by one or other of the two Cartoons – so you can't just pick up something and use it.

Well, you can if it's suited to the character who picked it up. If you see what I mean...

The teacher butts in again: Hey, can I carry on now?

The creator speaks: No. I'm sorry but I don't see how you can. You didn't even mention Roland Barthe's seminal work, *Mythologies*.

Barthe's very first essay is all about the theory of carnival and its relation to the wrestling ring. You should have included a bit about that in the intro. Honestly.

The teacher talks: Look, I knew that. I just didn't have room, alright?

● LINDA BARKER

"Society's morals are turned upside-down"

Bonuses and objects must be collected – a scathing critique of 20th Century materialism. Or is it?

As in real life, progress is measured via the game's 'levels'. You strive, you struggle, you do your best to overcome hardships – but at the end, it's still an inevitable case of "Th-th-th-that's all folks".

TWILIGHT 2000

Game: Twilight 2000
Publisher: Empire
Authors: John Jones-Steele, Wynford Davies, Glynn Williams
ETA: August

Briefly: Before RPGs commonly meant those on computers, they were played with masses of paper and dice, and involved actual social contact with other human beings (*Well, as good as...* – Ed). *Twilight 2000* was one such game, concerned with a leaderless Europe after a limited nuclear exchange. How would society change, who would take power, and what would all the NATO and Warsaw Pact soldiers do now that their commanders had been reduced to radioactive dust floating in the ionosphere? In the computer version, some of these questions are answered, as you take control of a team of good guys battling for control of Poland.

The creator speaks: Empire are responsible for all manner of tank games, from *Team Yankee* to the upcoming *War*

In The Gulf, so it comes as no surprise that a large part of *Twilight 2000* involves driving oversized Tonka toys across the Central Plains. The pencil-and-paper version of the game was designed by Marc Miller, who also got involved in working out this scenario, so expect a gripping yarn, games fans. You control a band of Krakow-based soldiers, who've decided to take on the evil Baron Czarny and his sinister Black Legion that currently control the country.

I talked to Empire's Rik Yapp, who was quick to point out that this isn't a straight conversion of the PC version, which came out last year to mixed reviews. "The Amiga version has a superior screen update compared to the original (which was a tad jerky) and on the A1200 especially is a lot smoother. The whole game's faster now, and supports 256-colour mode, so that's one up for the Amiga over the PC." Now there's something you don't hear every day.

The game's split into two parts. First there's an isometric 3D section where individual

characters walk around towns and countryside, encountering friends and foe

alike. Secondly there's a

3D tank simulation, where you can drive eight different vehicles, from armoured Hum-Vee jeeps to M1A1 tanks, all over the place. One of the criticisms with the PC version was that the amount of hardware confused the gameplay, but Rik seemed surprised that I'd dared to mention this. "Having loads of different weapons isn't normally seen as a disadvantage by role-playing or military enthusiasts. It's a very subjective point – we like lots of weapons and I'm sure that if you asked yourself, deep down, you like them too."

Well, yes I do, and not even 'deep down'. Ask any AP team member and they'll be more than pleased to tell you about my so-called 'gun fetish'.

Empire reckons these

Working out of a Polish 'Zwierz' warehouse, you set off to conquer the country. Judging by the size of the place, zwierz is a pretty popular commodity in Poland.

are their most sophisticated tank graphics yet, with separate views for the gunners and drivers, and detailed displays of the scenery. "Many of the missions you go on are similar, but in any role-playing or military simulation, there's inevitably a certain amount of common ground between some games. Also the adventure isn't as linear as many RPGs – it's more like a tree structure. The further you get in, the more options open out to you, the more vehicles you can drive, and the more differing options become available."

Verdict so far: As a general rule, I've found that games that try and combine two genres never seem to manage either of them as well as genre-specific versions. For example, *Transarctica* tries to be both a management game and an adventure game, and doesn't really work on either level. This could well be the case here, although, in their favour, Empire have had plenty of time to improve on last year's PC release. It's also good to see that they're giving the A1200 the sort of support that's often promised but rarely delivered. And finally, when it comes to tank warfare, these guys really know their stuff, so here's hoping for a good 'un.

● MARK WINSTANLEY

INTERNATIONAL GOLF CH'SHIP

Game: International Golf Championship

Publisher: Ocean

Authors: Martin Lyons, Dave Harrison (programming), Tony Meridith (art), Mike Anderton (music)

ETA: TBA

Briefly: Well, it's quite obviously a golf game. Isn't it?

The creator speaks: I phoned up Tony Meridith at the Really Interesting Software Company (RISC) but he was out, I dunno, down the shops or something. Anyway, he phoned me back later. So that's alright then. Using all my considerably insubstantial journalistic powers, I'd planned to whip him up into an

indignant and furious frenzy by telling him that we'd all been really impressed by *Nick Faldo's Championship Golf*, and we couldn't see how anyone (not even the Really Interesting Software Company) could improve on it.

This approach was a complete non-starter though, partly due to Tony sounding so relaxed that it was scary, but mainly due to his impressive belief in the worthiness of the team and their product. "We've taken a completely different

approach from *Nick Faldo's*, and spent a lot of time perfecting a

believable 3D terrain," Tony told me, as I furiously tried to find a biro that worked.

"We've been working on this game off and on for about a year now, and much of the initial work was on designing a 3D terrain engine. Obviously, we've been improving it as we went along, and we're confident that we'll be able to use it in many other 3D games in the future. What this means to the player is that the game can be played from all manner of views, and that you actually move

through the terrain rather than jumping from one position to another. The game can be viewed from the standard 'behind the golfer' perspective, and also from the spectator's view. There's even an option to track the path of the ball."

Sort of like the views you get in flight simulator games? I asked, desperate to break up this long passage of dialogue into more manageable segments. "Yes," he replied.

Sounds impressive, thought I, taking up my usual 40 percent of available office space (but I can't help being tall). But what sort of detail does this wonderful world appear in? "In the PC version, it's full Gouraud shading (which, in graphic terms, is a *Very Good Thing* indeed. — Ed) but on the A1200 version that'll be coming out before the standard Amiga version, it won't be quite up to that standard. It will, however, show up bumps and dips in the green that can affect your putting." Wow, well I'm convinced, if you can look at the lie of the land, then that should be good enough for everyone. What more could you ask for — virtual grass and litter?

I was a bit disappointed to find that none of the programming team were great golfing fans, because it's always good to

drop in little 'and finally...' facts such as the graphics guy having a handicap of twelve, or the programmers having played a few holes with Tarby. But they haven't, which is a shame. Tony: "We have spent a lot of time watching real golfers to get the right feel of the game, but our only real

contacts with the game have come about since we started working on this project."

I thanked him and said my goodbyes, leaving different perspectives of the event.

Tony was probably quite glad that he didn't have to talk to such a lanky kid any more, while I came away a little wiser about the ways of golf and programming. And BT? Well, they coined it in, as usual. I'll fax the programmers next time, I think. It's cheaper.

Verdict so far: Love golf or hate golf, you certainly can't play it for real in the confines of your average bathroom. Well, not without breaking a few mirrors, or having to take a couple of difficult chip shots off the bidet. RISC seem to be living up to their name and producing some really interesting stuff, so maybe this is the game that'll get those frustrated urban putters all hot and bothered under their ludicrously checked slacks.

● MARK WINSTANLEY

Judge the 3D terrain for yourself — it certainly looks pretty good to me.

"We have spent a lot of time watching real golfers"

The last caption on the page is always the most difficult one to think up. Hmm, a club gas, maybe, or perhaps...

SHRECK'S

Schreck's? Sounds like some new kind of breakfast cereal if you ask me. But then, of course, you didn't.

usual movie licence beat-'em-up. Instead of taking the normal *Street Fighter 2*/Final Fight route and

using sprites so enormous that you can only fit a couple of them on the screen at a time, Denton have used comparatively titchy characters which (a) allows lots more to be happening on-screen at any one time, and (b) is far more successful at capturing the wide-screen Gothic drama of the Dark Knight movies.

The game will boast five levels of increasing difficulty, with Bats battling the bad dudes of the film. The horizontally-scrolling level one sees him taking on the Red Triangle gang to release Selina Kyle, while level two (another horizontal scroller) adds The Penguin and

The Strong Man to the equation. Things change a little in the third and fourth levels, which take place on a series of buildings and rooftops which Bats clambers across in a multi-directional scrolling scenario, and involve the lovely

Catwoman, then it's on to the decisive fifth level. This is split into three parts, and calls on old Bruce to rescue some kiddies from the Red Triangle gang's circus train, then to venture into the killer-penguin-robot-and-toxic-waste-infested sewers, and finally to enter the Arctic World of Penguins, where all the bosses (Max Schreck, Catwoman and The Penguin) reconvene for one last almighty ruck.

All the levels are linked by appropriately dramatic animated cameo sequences featuring all your favourite Bat-characters and Bat-equipment, and generally the whole thing looks as if it's going to be very very stylish. Well, that's what

Denton Designs say, anyway, and I haven't currently got any reason to disagree with them.

Verdict so far: Well, as you might imagine, it's a bit difficult to tell from what there is, but *Batman Returns* promises a refreshingly different approach to the hackneyed old beat-'em-up clichés. Well, er, certainly a smaller approach to the hackneyed old beat-'em-up clichés. I'm looking forward to it with great interest, and I'm not joking either.

● STUART CAMPBELL

Um, right. This is going to be tricky. Architecture, eh? Don'tcha just love it? First up, a window.

Our second example is a particularly grand and imposing door kind of structure. Mm-mm.

Then over here, er, some sort of minaret, perhaps?

Now it's all really starting to happen. In this shot, we see some manner of large statue dude, posing manfully astride a cog with a large lever sticking up through his knee. Ooh, just count those Jungian metaphors, missus. I think that just might be Batman at the bottom, too.

"Different from the usual movie licence beat-'em-up"

Game: Batman Returns
Publisher: Konami
Authors: Denton Designs
ETA: TBA

Briefly: With *Frontier* still dragging its heels, it looks like Konami's grand entrance into the world of Amiga games is going to be heralded by a movie licence. But hey, what a movie licence. Last summer's big name, the film got mixed critical reactions for its convoluted plot, but as with the previous Batman, nobody had any complaints about the grand Gotham City backdrop the action was played out against. How clever, then, of the folks at Denton Designs to pinpoint that very fact, and to make sure that their conversion from big screen to monitor screen wasn't short on atmospheric drama.

The creators speak: What on *Earth* am I getting at, you might be wondering. Well, the thing is, Denton Designs (having taken over the design and development of *Batman Returns* from Rage Software) are playing the less-than-revolutionary card of writing a movie licence game as a multi-level beat-'em-up. But *Batman Returns* will be a bit different from the

BATMAN RETURNS

That big backdrops/little sprites combination in all its awe-inspiring glory. Yum.

A quick blast of bad guy-tastic action, but Bats manages to rise above it all. (Ho ho ho. - The Joker)

It was a happier time, when even the set from *Total Recall* looked warm and cosy...

...a time when singing telegrams really made an effort with their costumes...

Once upon a time, in a land far, far away, there was a family of magical pixies. They lived in a lovely house in the forest, and survived on a diet composed exclusively of toadstools, wafer biscuits and large lime-flavoured boiled sweets.

SIMON THE SORCEROR

Game: Simon The Sorcerer

Publisher: Adventure Soft

Authors: Simon Woodroffe, Michael Woodroffe and Alan Bridgeman

ETA: September

Briefly: In this animated-graphic-fantasy-adventure, you play Simon, a young boy who acquires a magic book, triggers off a spell and gets transported, along with Blotch the puppy, to a different world (via a spinning disc portal sort of thing). Your task is to save the good wizard Calypso and, of course, have loads of exciting and magical adventures along the way.

The creator speaks: Yes, it's another one of 'those' graphic adventures – so how different is *Simon The Sorcerer* going to be from other games of its ilk? "Well, as with any

example of the genre, *Simon* shares general characteristics with games like *Monkey Island*. But what we're trying to do is create a more British/European focus to the game. I mean, *Monkey Island* was very funny but a lot of its humour was American-based. In *Simon* we've incorporated a lot of fairy tales and stuff that will appeal to the British and hopefully the European audience.

"For instance, there's a Three Billy Goats Gruff bit with a troll on a bridge. He's on strike 'cos he doesn't like being chucked off the bridge all the time. So he's on the bridge with his placard, and the goat's looking through the rule book to see if this is allowed. Obviously, something like that is going to appeal to the older gamesplayer, but there's plenty of slapstick for the younger ones. There're so many nice touches, but I suppose you want to know more about the gameplay?" Oh, go on then.

"Well, there are loads of puzzles to solve along the way, but we've tried not to make them too irrational. In a lot of these kind of games the puzzles are just so difficult. You know the sort of thing I mean – when you have to stick your finger in your ear and spin round three times in order to open a door. We've tried to make the puzzles in *Simon* a lot more logical. For example, the password to the dwarf mine is written on a stone outside the cave entrance." (*Cripes! I think you've said enough.* – Ed)

"We've also tried to make the Simon character a lot more accessible by means of the control panel. Everything you need is there on the screen – there's just 12 text commands and instead of having to type them in or scroll through a list you simply click on the command you want. So if you want Simon to go somewhere, you just click anywhere on the game screen and then choose the command 'walk to'. It's virtually foolproof. Likewise, instead of having a whole inventory screen, we've just got all the objects on the game screen. Using an object is as easy as

clicking on the object and then choosing a command. That's all there is to it."

Hmm, how interesting. Now, you also claim that *Simon The Sorcerer* has been written using something called 'Agos 2'. Can you tell us a little more about that? "Agos 2 is a new language that has been written especially for designing adventure/RPG kind of games. But it's also more than a language because it incorporates various utilities which do things like create data structures, compile other things and process graphics. But the most important thing about Agos 2 is that it makes the translation process (from computer language to English) so much easier. I could go into it further, but that's what it does basically."

Verdict so far: Hang on a minute, you've just simplified it 'cos you think we won't understand anything too complicated, haven't you? "Er... yes." Good, we hate it when things get all complicated and technical, but we do like the prospect of a beaut game and *Simon The Sorcerer* looks like just that.

● LINDA BARKER

"We've incorporated a lot of fairy tales and stuff"

...and dragons acquired large gold reserves, to protect against inflation.

It's a hard life being a wizard. Take this chap from *Flag*, he doesn't look too happy, does he? That's probably because everybody expects him to know everything and he, erm, doesn't. Shame.

This is also from *Flag*, and it's a kinda strategic screenshot. From the little inset you can clearly see that you're nowhere near the village yet. What are you – some kind of wastrel?

Beastball is violent – you can tell this by the fact that this screen has monsters on it rather than cheerleaders.

See that inset screen? That shows you where you're currently at. It really is all far too complicated to go into here.

For the gore-fiends amongst you, *Beastball* actually has a lot more blood than this screenshot's letting on.

MILLENNIUM

Games: *Beastball*, *Diggers*, *Dinoworlds*, *Flag*
Publisher: Millennium
Authors: Teque, Simon Cook, Ian Harling and more
ETA: June – November 1993

Briefly: After *James Pond 3*, Millennium have got four other titles coming up this year. *Flag* is a strategy game, so-titled 'cos the object is to seize your opponent's stockade and force them to lower their flag. *Diggers* is a strategy arcader where you co-ordinate diverse teams in order to become a bigwig mining executive with loads of pits to your name. The one/two-player *Beastball* is kinda like *Cyberball* or the Mega Drive game *Mutant League Football* in that it's based loosely on American Football and is played by androids with a particularly violent bent.

The creator speaks: These are all working titles at the moment – is much

else (apart from the titles) going to change much? "No. The basic storyboards and the gameplay are pretty much sorted out. There'll probably be added touches, but nothing drastic." With the exception of *Beastball*, it sounds like a set of very complicated games. "Well, they do sound a bit complicated when you're just given a basic game outline. It's always hard to explain strategy games satisfactorily – you really do have to play a lot of them in order to really understand what's going on."

Beastball, on the other hand, is a lot easier to pick up – it's a very 'immediate' game, isn't it? "Yes, we think *Beastball* is going to be really good, as it appeals to both those players who like sports games and those who like the idea of really violent games. And because it's got a two-player mode and is so unfair, you can have a lot of fun."

Diggers and *Flag*, on the other hand, are very complex – these aren't games that you'll buy on Saturday and be bored with by Monday? "I should hope not! With *Diggers*, there are actually four races of diggers who have

completely different characteristics, plus they can also make independent decisions. So it's all very involved. *Flag* is similar as each of the warlords (who you must challenge and defeat) have their own personalities, which means that each one must be dealt with in a different manner."

Dinoworlds has, surprise surprise, got quite a lot to do with dinosaurs. This is undoubtedly a good move as dinosaurs are renowned for their commercial qualities. (Got a brand of confectionery that isn't selling? Stick a dinosaur on the packet and it'll go like hot cakes!) Not that we're suggesting for a minute that *Dinoworlds* is merely cashing in on the dino craze. No! Here at AMIGA POWER we think dinosaurs are great – there's always

Goal-mouth action is so much more exciting when it involves the sundry ripping-off of limbs.

been a dinosaur element to our music. (T-Rex? Dinosaur Jr? We love 'em.) Anyway, *Dinoworlds* has got a few of the beaut beasts in it, which is only fitting considering it's meant to be an "amazingly accurate depiction of what life was truly like millions of years ago". You play a T-Rex who must lead the other dinos in a journey north to escape extinction.

"There's a lot more to *Dinoworlds* than first meets the eye. It's a strategy-puzzler which you can play in three different ways – against the computer, against a friend or as a conquest. There are eight different breeds of dinosaurs to control and each dinosaur has a mind of its own, so it can be very difficult. But it's also an incredibly rewarding game."

Verdict so far: At the moment it looks like *Beastball* will only be released on the 1200, and *Diggers* is coming first out on the 1200, followed by a 500/600 issue. *Flag* will be a 500/600 release only and *Dinoworlds* is to be put out on all Amiga formats. Watch out for them – it's going to be a busy year for Millennium.

● LINDA BARKER

"There's always been a dinosaur element"

This chap may look like an alien. But he's not. He's a miner. Honest.

Diggers is a game about mining with a strategic puzzle element to it.

The idea is to dig great big tunnels and ruin everybody else's.

atmospheric, scene-setting shot. And very nice it is too.

ALFRED CHICKEN

Game: Alfred Chicken
Publisher: Mindscape
Authors: Twilight
ETA: September

Briefly: Alfred is a chicken.
The creators speak:

...a bizarre, hybrid cross between the squawkings of, farm-yard poultry and Received Pronunciation English. No, not really, that's just my little joke. I talked to Mindscape's Mr Nice Guy, James Morris, who filled me in on the plot details without a hint of embarrassment, an impressive feat for a grown man when talking seriously about chickens with girlfriends.

"All of Alfred's friends have been egg-napped by the evil Meka-Chickens, and whisked off into their strange lair." Do you think the word 'whisk' was put in there as an extra omelette-related gag, or am I just reading too much into what people say these days? I wonder, but back to James. "Along with all of Alfred's mates, his girlfriend Floella has also been grabbed, but Alfred's not too bothered about getting her back, as she's just a girl." Oh dear, obviously Mr and Mrs Chicken didn't raise their boy properly, otherwise he'd have been a more caring,

Making progress through the level, Alfred was dismayed to fall for the old 'superglued ledge' routine one more time.

90s 'New Age man' type. Of chicken.

"There are ten different worlds, with two levels on each. The worlds are all themed, so there's Cheese World, Toy World, Wood World and so on. Alfred can collect diamonds and watering cans for extra points (*Really, who thinks these up?* – Ed) and has to comb each level to find balloons, which he pecks. Once he's burst the last balloon, he's transported to the next level."

It all sounds

a bit bog-standard for a platform game, but seeing as it's

Of course, with diamonds being one of the hardest substances known to man, Alfred's almost certainly going to die when he hits this enormous one here.

Depressed at the hostility of his environment, Alfred formed his own little storm cloud of unhappiness.

them for thirty seconds or so.

Take it away, James.

"To help you clobber all the clockwork mice and snails and things, you can find a gun that fires eggs at them." What? More ludicrously politically unsound behaviour from this so-called 'hero'? Surely breaking eggs is tantamount to killing his very own offspring? Is there a sinister subtext to this superficially cute game that James isn't telling us about?

He wouldn't say. He did point out that there are secret rooms, switches to make hidden blocks appear, and special doors that zap you to another part of the level. Oh, and that it'll be out in September. Can't wait.

Verdict so far: Looks like it's going to be another one of those cute, console-style platform romps, where you collect things before going to another level. And collecting more things.

● MARK WINSTANLEY

"There's Cheese World, Toy World, Wood World, and so on"

Cannibalism ahoy! Doubtless this cute chick will soon be consumed in a bloodthirsty frenzy. (Actually, that's Alfred 'hatching' onto the screen. – Ed)

An action-packed moment as one of Alfred's Stuka-style divebombing raids bears dead-bad-guy fruit.

"Damn. I'm never going to be able to explain this one to the lads. Could someone call the Fire Brigade?"

GAMES

Brainwashing was the new craze around the AP office this month. By writing catchy phrases on pieces of paper and sticking them up everywhere, the team hoped to subliminally influence others. So how did the experiment go?

JUST WHO DO WE THINK WE ARE?

LINDA BARKER

Linda surrounds herself with a lot of tack, but she seems to have gone completely over the top this month. When not busy doing whatever it is an editor does, she's been talking to her latest 'acquisitions'. Only yesterday she was heard telling a plastic saucepan with a face on it that "For God so loved the world that he gave his only begotten son..." Looking around, we found two bits of paper that had clearly had an effect. One said LUST AFTER POINTLESS THINGS and the other PRACTISE YOUR PREACHING. It worked!

STUART CAMPBELL

Stuart's main topic of conversation this month has been his parents. From all that we've been told, Mr and Mrs Campbell are truly great and, although we've never met them, we love them dearly. Did you know, for example, that Mrs Campbell never ever forced young Master Campbell to eat his greens? And she makes ace crisps. What a parent! Further investigation around Stuart's desk unearthed the phrases RESPECT YOUR PARENTS and CHECK WITH YOUR DENTIST MORE OFTEN. Go figure.

JACQUIE SPANTON

Jacquie tried to sell her flat this weekend. The problem is – it doesn't actually belong to her. Still, she wasn't going to let a piffling detail like that ruin her plans and so the flat was put up for auction in the AP office with an initial starting price of £2000. Halfway through the proceedings Colin the Publisher walked in and got a bit caught up in the spirit of things. After a few minutes of energetic bidding Jacquie managed to sell her flat to Colin for £2000 and 15 pence. A piece of paper with the command DEAL IN PROPERTY was later found stuck on Jacquie's in-tray.

TIM TUCKER

For a while, we gave up talking to Tim. Nothing he said made any sense whatsoever.

Even a simple question, like "Do you want a coffee?", led to a veritable barrage of nonsense along the lines of "The last time I took a dog for a walk it started to rain heavily. The best thing for corns are those round little pads you get in Boots." It took us ages to find the SAY ANYTHING message that was cunningly concealed on his AP binder.

DAVE GREEN

Being an alien, we thought Dave might be immune to the brainwashing process, so we stuck the phrase DO LESS above his Mac. We were stunned to see that Dave actually did start doing less, and less, and less. Eventually this got so annoying that we had to ask him to do some work. Dave was confused: "But this piece of paper that you stuck on my Mac says DO LESS. I was only obeying orders." Aliens, eh? They're just so literal.

MARK WINSTANLEY

Mark responded to his subliminal message very well indeed. All month Mark has been following Colin the Publisher around, making notes in a ring-bound notebook. When Mark fell asleep (after playing *Sim Earth*), we prised the notebook from his fingers and settled down for a good read... "Monday April 26th. 3.15 pm. Colin went into the ST Format office and asked if anybody had a light. He then proceeded through the old Your Sinclair office at a leisurely pace of about two miles per hour." After two pages of this we all fell asleep too, but not after peeling off the paper from Mark's glasses – it read SPY ON YOUR SUPERIORS.

LISA KELLETT

Lisa hasn't done anything out of the ordinary this month. As usual, she's plied us with cream cakes and chocolate and urged us all to have large lunches. Mind you, she has been joining in the eating binge – which is a tiny bit odd. All was explained when we spotted DIGEST FOOD on one of her posters. Next to it was MARRY AND REPRODUCE, which we quickly removed. Just in case.

DAVE GOLDER

Dave, being an ace drummer and a good cook, isn't short of pals but has acquired another, extra-special, friend. Dave's new chum is his Amiga 1200 and he's been showering it with the kind of attention usually reserved for one's very best mates. The rest of us got so annoyed when Dave stopped inviting us round and wouldn't even come to the pub with us (when we offered to pay!) that we went and took down the piece of paper that said THE COMPUTER IS YOUR FRIEND from his wall. He's promised to come out with us tonight.

JONATHAN DAVIES

As we expected, Jonathan refused to be brainwashed. We managed to stick two phrases on his desk and waited for something to happen. Luckily, we didn't expect much so we weren't too disappointed when Britain's tallest wargamer sauntered into the AP office and asked us why we'd stuck bits of paper saying FLESH IS ABNORMAL and LET NATURE REPEL YOU to his desk. We tried to explain the theory behind it all but JD just thought we were being silly and left with a stoical frown hovering around his lips.

How does our scoring system work, then?

1. We tell it like it is. We think very carefully about our reviews and games get the mark we think they deserve. Good game or bad, we'll make sure you know what we think.
2. Rating systems get confusing so we give a single percentage mark and a few summing-up sentences.
3. Third points? Old hat, guv.

GOAL!

Dino Dini is heading your way, with a whole new ball game.

Game: Goal!
Publisher: Virgin
Authors: Dino Dini
Price: £30.99
Release: June

BOB: Good afternoon and welcome to the show. Today we're going to look at the comeback of a near legendary player, Dino Dini, and assess what he has to offer an increasingly competitive sport. **TERRY:** The boy Dino, 'e's a good lad who really understands the game. He's had a lot of well-deserved success in the past with *Player Manager* and the hugely popular *Kick Off* and *Kick Off 2*, and now he's back with, er, *Goal!*

BOB: Why's it not called *Kick Off 3*, Brian? **TERRY:** Well Brian, it's something to do with the fact that it's published by Virgin, who don't own the rights to the *Kick Off* title, and at the end of the day...

BOB: But is it anything like *Kick Off 2*?

TERRY: Well, Dino himself considers *Goal!* to be the natural successor to the *Kick Off* games, so yeah, it's really *Kick Off 3* in all but name.

BOB: Of course we've seen some fresh talent in the game since *Kick Off 2*'s success, especially that young newcomer *Sensible Soccer*.

TERRY: Yeah, the boy *Sensible*, 'e's a good lad who really understands the game. In fact, he's the best player ever, according to us and all our viewers

(*Number One in the Readers' All Time Top 100*, and *Number One in AMIGA POWER's All-Time Top 100*. – Ed).

He's really given Dino some competition while he's been out of the game.

BOB: But do you think he can come back, Brian?

TERRY: Well he's got a good past record, and he's certainly got the fans behind him, so, sure, he's definitely in with a chance. I never liked his style as much as *Sensible's*, but that's not to say he can't prove himself worthy at this stage. At the end of the day it's the football that counts, and the team with the most goals at...

BOB: So how do you think he's looking?

TERRY: He's looking good, Brian, he's looking good. Detailed sprites with good animation, two zoom options, the further

Football is a sport played by two teams, each made up of eleven players. Both teams attempt to kick (using the 'foot') a spherical object (known as the 'ball') into the opposing team's Goal!

one with a *Sensible Soccer*-type feel, and the near zoom giving you a chance to really see the nitty gritty when you're dribbling and going for goal. Switching between the two is a simple matter of pressing the space bar, which you can do at any point in the game. When all is said and done, I'd

say he's the best looking football game in the, er, game at the moment.

BOB: Let's now go down to the ground and see the state of the pitch. Hello Brian, can you hear me?

[CUT TO OUTSIDE CAMERA, BLOKE STANDING BY FOOTBALL PITCH]

JIM: Good afternoon Brian.

BOB: So Brian, what's the pitch looking like down there?

JIM: Well you've got a choice between dry, wet, muddy and Wembley (*Wembley? - Ed*) (*No, it's Thursday. - Tim*) (*Me too, let's go for a drink. - Ed*), and you can

alter the wind speed too. Plus you can view the game horizontally or vertically, both with either of the two zoom options.

BOB: What's the visibility like?

JIM: There's a scanner on-screen to show the state of play on the rest of the pitch, but you can move it around the screen if it's in

the way of the action, or turn it off altogether if it simply annoys you.

BOB: Thanks, Brian, we'll see you later.

JIM: Cheers Brian.

[BACK IN THE STUDIO]

BOB: So it's certainly a good looker with lots of view options, but how's it playing?

TERRY: Well, although the control system's very much based on *Kick Off 2*, it's been vastly improved. It's really the opposite to *Sensible Soccer*. You hold the fire button down to trap the ball, and let go of it to pass to the nearest player in the direction you're facing. Dribbling the →

It's a Goal! Which, coincidentally, is the name of the game. Now you know why.

The close up view is good for when you get close to the area and you're going for goal. If you like that sort of thing.

You know I said there were eleven players on a team? I lied. There's thirteen. It's just that they don't all play at the same time, you see.

ball involves pushing the joystick in the direction you want to go, while shooting is just a press of the fire button, with aftertouch if you need it.

BOB: All the standard options really.

TERRY: That's just the start, Brian. You can chip the ball, by pushing the joystick up and down quickly, header when the ball's in the air, do sliding tackles – it's all there, and more. It's a bit more realistic to play, too. If you try to dribble too fast you lose control of the ball, but with practice you can perfect certain techniques including 180-degree turns (something you couldn't do in *Kick Off 2*), and quick changes of direction.

BOB: But is it intuitive play?

TERRY: Well I never found Dino's earlier games easy to get to grips with, but this is a lot better. You actually get the feeling that you're in control of the game and not dominated by it. A lot of people found *Kick Off 2* too difficult, but with *Goal!* you can alter the difficulty level, which enables you to work at your own pace. Difficulty is really defined by how fast you and your opponent play the game, which means that at a low difficulty the game is actually slower than *Kick Off 2*, but at the highest level it's about 30 percent faster, which

Here we see players 'expressing themselves' and also 'creating some space'.

"It's a massive improvement on *Kick Off 2*"

WHAT'S YOUR PITCH?

should give even the hardest *Kick Off 2* pro a challenge.

BOB: I've noticed that there's more control on the corners, throw-ins and free kicks too.

TERRY: Yeah, it's a great system which enables you to determine the height, angle and strength of the kick. With practice you can even score from a corner, something the great George Best was great at. The boy George, 'e was a good lad, really understood the game...

BOB: Wasn't Boy George a pop singer, Brian?

TERRY: I'd say that it has more control options than any other arcade football game.

BOB: What teams will be playing, Brian?

TERRY: All the Premier league's in there, with authentic home and away kits and up-to-date squads, as well as a full complement of International teams. You can also edit them to create your own custom teams, change the names of all the players and redesign the kit designs and colours, although the actual statistics of the individual players can't be altered, and the teams are all of differing standards. You can even choose the referee for the match, with each ref's statistics determining what percentage of fouls he spots and how tough he is on penalising. If a player gets away with a couple of fouls, he's more likely to get a yellow or red card when he commits another foul later on.

BOB: Can we see that again, Brian?

TERRY: Yes, you can get an instant replay of the action at any point during the game, and you can forward and rewind at fast, normal and frame by frame. You can save any replays to disk too.

BOB: Is there anything you can't do?

TERRY: *Goal!* has certainly got more options and features than any other football game around at the moment – it's stunning the amount that's in there.

BOB: But is it an enjoyable game?

TERRY: Well I'm happy to say that the whole experience of playing *Goal!* is a thoroughly enjoyable one. It's a massive improvement on *Kick Off 2* in every way. It's easier if you want it to be, harder if you want it to be, better looking, packed with options, boasts good atmospheric sound effects... and best of all, it's lots more fun. 100 percent improvement overall, I'd say.

BOB: Is there anyone who can touch the boy now, Brian?

TERRY: Well, despite all my trumpeting I have to say that it's still not quite up to *Sensible's* standards. There's something

At the end of the day it's the football that counts, and the team with the most goals...

about *Sensible Soccer* that transcends every other game ever, and despite a good run by Dino, this still falls short. Still, it's a game of two halves, and at the end of the day it's the football that counts and the team with the most goals... [FADE TO CREDITS]

● TIM TUCKER

UPPERS It's got everything you could plausibly ask from an arcade soccer game without being ridiculous. The difficulty settings help enormously to get you into the game. Massive improvement on the *Kick Off* games, great to look at and good footballing fun to boot.

DOWNERS Still not completely happy with the control system. There's loads of options, yes, but it somehow seems less obvious than the *Sensible Soccer* controls.

THE BOTTOM LINE

The bottom line is that this is a very good football game. Some will love it more than anything else in life itself while others will still find the controls irritating and turn back to *Sensible Soccer*. You know which we prefer, but don't let me put you off, this is worth every penny. Brian.

THE BOTTOM LINE

Goal! actually runs **A1200** quite a bit better on the 1200, because it doesn't slow down when there's lots of players on the screen.

Disappointingly, Domark decided not to bother with the expense of getting any real players' names to use in the game, so we get a load of programmers instead. Wow.

Mmm, there're some fabby options here and no mistake. The Sound one's weird - switch it off once and you can never get in-game effects back again, only music. Tch.

WE'RE NOT KIDDING — THIS GAME REALLY IS CRAP

Game: International Rugby Challenge

Since I started working for AMIGA POWER, I've had a lot of abuse from various quarters. Readers, rival journalists, complete strangers in the street, my own parents, they've all had a pop. It's all water off a duck's back, of course - I'm from Scotland. Now, though, for the first time, something's happened that's made me seriously consider my future as a writer. I'm faced with a three-page review of *International Rugby Challenge*, and I really and truly don't think I'm going to be able to find the words to describe just how dreadful it is.

"I've never seen anything this bad"

Let's set out our stall by starting with a quick comparison. The previous lowest-rated game ever in AMIGA POWER was *European Champions* by Idea, which got a less-than-impressive 4% in issue 17. And *European Champions* is, approximately,

A challenge? Yes. International? Perhaps. But is it rugby? It would appear not.

LEAGUE WORLD CUP 6 NATIONS TEAM 1 TOUR
FIXTURES EXIT

50 times better than *International Rugby Challenge*. Now (gulp), let's get specific.

The only way to do this, I think, will be to be methodical. So let's start with the options screen. The default set-up has you playing England, against Scotland, using mouse control (of which more later) in a 40-minutes-each-way match. To change any of these options, consult the manual to find out what the icons mean, then jerk the pointer slowly across the screen with the mouse and hold the fire button down for a couple of seconds until a menu comes up. Mostly, these are fairly obvious – if you don't want to play as England, click on the little team crest icon until it changes to the side you want.

If, however, you want to change the opposition (or if you want to play as Scotland, who you can't choose at first because they're your opponents), things get a bit more complicated. First you have to go to the 'Number Of Players' menu and select 'two players'. Now the game allows you to click on both the team crest icons and you can choose your favourites. Go

back to the 'players' menu and choose 'one player' again. Start the game.

Suddenly you realise you're still using the utterly ridiculous and unworkable mouse control. Quit the game.

This brings up a stats screen full of great info like how many 'trys' you've scored and how much 'possession' you've had, so have a bit of a chuckle and then choose the 'Manage' option which in fact gets you back to the initial options screen. Choose joystick control, and for good measure read the instructions on how to operate it properly. "When not in possession of the ball, click FIRE and hold to retain possession". Mmm, sounds like a good one. Right, time to start the game properly.

The line-out.
Fascinatingly, it's very
easy to run right
through the middle of it.

Injury time. That is,
time for an injury. Poor
old N Lea.

You didn't forget to choose a shorter match length, did you? Because the game IS prone to locking up in the middle of a scrum if you play a longer game. Good.

Damn. Being methodical isn't going to work – there just isn't enough space. I'm going to have to go for the 'edited highlights' approach instead. Like how in two-player mode, you can't both use a joystick. Like how it's practically impossible to tackle or be tackled, and hence the game consists almost entirely of one team kicking off, you picking up the loose ball and running it straight in for a try. Like how when you cross the try line, you automatically put the ball down behind the posts. Like how when you kick a conversion, your player's strip changes to white shirt and black shorts whichever team he's playing for. Like how the line judges are always the same number of pixels in height when you kick the conversion, and hence look six inches tall when you're doing a close-in one. Like how players try a diving

tackle, then immediately do another one from the ground, then another one and another one, so they're flapping around looking like they're swimming a 100-metres butterfly race.

Like how the ball catapults around senselessly at random and frequently disappears completely off the screen, leaving the scrolling to catch up with it five or six seconds later. Like how the player you control is almost never anywhere near the opponent with the ball, even though he's got three of your men practically standing on his toes, or how if the ball's loose one (or more) of your players can actually run right over it without picking it up or coming under your control. Like how sometimes you can actually have the ball, but be controlling one of the players in your own team who isn't the one who's holding it. Like how the ball's so small →

A fabulous all-action shot. Can't you just feel the roar of the crowd from here, pals?

One of my very favourite bits – Scotland, in the all-blue strip, take on France, in the, er, all-blue. Lot of people involved in writing this game, weren't there?

and difficult to see, and when the other team's got it the player in possession isn't highlighted, that you can never tell where it actually is. Like the 20-second loading delay before and after you kick a conversion. Like how you can throw the ball backwards for over 40 or 50 yards. Like how a ruck consists of the two teams lining up in single file behind each other a couple of feet to the side of the ball, which eventually leaps off one way or the other of its own accord. Like how line-outs are awarded without the ball going out of play.

Like how when you play Scotland against France, the two teams play in two practically-identical all-blue strips (both wrong, too – Scotland and France play in white shorts, you clowns) which are impossible to tell apart in the heat of play. Like how the game calls the French

Watch that spectacular run from your own try-line in glorious slow motion.

The screenshot on the left shows the game paused a few seconds into a 40-minute-per-half match. The screenshot below shows the same match unpaused again a couple of minutes (real-life time) later. Bloody hell.

A PAUSE, BUT CLEARLY NOT FOR THOUGHT

national stadium the Parc de Paris instead of the Parc des Princes. Like how the computer side will happily run around for 10 seconds with the ball lying in their try zone, waiting for one of your players to come and flop down on top of it and score a try. Like how when you pause the game, the action freezes but the clock doesn't – start a 10-minute game, score a try, pause, wait for 10 minutes and unpaue, and you've won.

This hasn't been much fun to read, has it? Not much zing, not much zip, not many jokes. Fact is, I haven't even started to list the awful, awful flaws in this game.

(Well, obviously I've started, but I haven't covered even half of them.) You really have to see it in action to believe it. I took two days of convincing before I'd believe that this was a finished version of the game and that someone wasn't trying to set me up. I've been playing video games for about 16 years

Rugby fans will be astonished to discover that this is, in fact, a ruck in progress. Ah-ha-ha-ha.

now, and I've never seen anything this bad.

The longer you play it, the worse it gets (the sound is a sick joke too, by the way). I loved Domark's original *Rugby – The World Cup*, but this, a year and a half's development later, is so inferior that it utterly beggars belief. It's inferior to everything. In the world. Ever.

● **STUART CAMPBELL**

International Rugby Challenge is bad. But exactly how bad is it? We decided to set up a scientific comparative test with some of the most-bad things we could think of to find out.

THE WAR IN BOSNIA

Hundreds of thousands of deaths, terrible atrocities committed in the name of 'ethnic cleansing', the disintegration of entire nations into endless warring factions pitting brother against brother and father against son.

Badness Rating: Not Nearly As Bad As *International Rugby Challenge*.

THE FAMINE IN SOMALIA

Hundreds of thousands of deaths, relief supplies being looted and plundered by corrupt officials, starving people being shot by the opposing sides in a prolonged and pointless civil war.

Badness Rating: Close To, But Not Quite As Bad As *International Rugby Challenge*.

THE RODNEY KING BEATING

Slight speeding offence punished by life-threatening assault with heavily weighted sticks, perpetrated by four armed police officers against a defenceless man lying motionless on the ground. Led to huge riots in Los Angeles area, causing millions of dollars' worth of damage and several deaths.

Badness Rating: Approximately Half As Bad As *International Rugby Challenge*.

DEPLETION OF THE OZONE LAYER

Wanton destruction of a vital section of the planet's atmosphere by entire population of the industrialised world. With aerosols. Lowered resistance to lethal ultra-violet radiation causes massively increased incidence of skin cancer, not forgetting catastrophic climactic change and global warming, which in turn brings on melting of the polar ice caps, widespread flooding of much of the world's arable land and hence massive food shortages. Combination of these effects almost certain to lead to complete eradication of human life on the planet within the next 200 years.

Badness Rating: Would cause death of Jeremy Beadle, therefore Still Not As Bad As *International Rugby Challenge*.

HAVING ELECTRODES ATTACHED TO YOUR GENITALS AND BEING FLOGGED SENSELESS WITH A KNOTTED ROPE

Self-explanatory, really.

Badness Rating: Actually, This One Probably Is As Bad As *International Rugby Challenge*. But It's A Close Thing. And No Mistake. (Right, that's it, you're coming with us, sonny. Get in the van. – *The Taste Police*)

LIFE'S A BITCH, THEN YOU PLAY INTERNATIONAL RUGBY CHALLENGE

▲ **UPPERS** The manual is slightly amusing, albeit useless as far as helping you play the game goes.

▼ **DOWNERS** We'd need the whole magazine to list them. We really would.

THE BOTTOM LINE

Quite simply, the worst game I've seen since I started playing video games with Pong back in 1977 or thereabouts. I'm not exaggerating. In your worst nightmares, you couldn't even begin to imagine anything as appalling as this. Half of the following score is for comedy value.

THE BOTTOM LINE

A bit faster and not as jerky. But still more abominable than human beings are equipped to appreciate.

Your Berserker is a hard geezer. Check out that axe for a start. He's the guy you want to throw into a fight as soon as poss.

This is the Bob Dylan of the group. He sings songs which boost morale and get the baddies waving their lighters in the air.

The Assassin has the ability to hide in the shadows. Of course we all have that skill, but she can do it in less dark ones than the rest of us.

The Runemaster. He's good at magic, naturally. And has the only hat available to the group.

TOLKIEN ABOUT MY GENERATION

Game: Worlds Of Legend
Publisher: Mindscape
Authors: In house
Price: TBA
Release: June

I'm getting a bit worried about review policy here at AMIGA POWER. It doesn't take long for one of us to get sort of typecast – Jonathan does the flight sims and strategy war games, Mark gets anything violent, Stuart gets anything he wants, and now it looks like I'm the RPG/Adventure man. No! Please, guys – I'll do the platform games you all hate, I'll do puzzle games and horizontally scrolling shoot-'em-ups, sports sims and god games, but please don't condemn me to a life of working out spell systems and trying to pronounce my main character's surname.

Don't get me wrong – I've got nothing against adventure games. In fact, I really like them. But just flick through this magazine and you'll see that this month I've reviewed *Knightmare* and *Legend*, tipped *Legends Of Valour* and *KGB*, reviewed *Nippon Sages Inc*, and now I'm on *Worlds Of Legend*. Apart from the fact that I don't know what particular 'legend' I'm involved in any more, I'm also not sure whether I'm in Mitterdorf, Trazere or Moscow, whether I'm called Zothien Runecaster, Mantric Shafthassen the Elder or Dino Fagioli, or what the hell's going on. I yearn for a name like Scooter or Biff, one that's easy to say and doesn't suggest that I had an abnormal birth and that I'm incapable of getting on with people my own age. (Look,

stop whinging and get on with the review or I'll kill you. – Ed)

There's a happy coincidence in this issue, as already mentioned – on page 71 you'll find a review of the newly-released-on-budget *Legend*, which this game just happens to be the sequel to. So, if you're unfamiliar with the original, I suggest you turn there now and have a good read. I'll just go and make a cup of tea...

Finished? Good, wasn't it? I wrote that. Anyway, *Worlds Of Legend* is the sequel, and I have to say that on first look you could be mistaken for thinking you'd got the original by mistake – the game engine is identical. I didn't have a lot of room for background details in the budget review, but I've got two pages here, so perhaps a little elaboration is in order.

First – the plot. One of the adventurers in your party receives a message telling him that his father, the Emperor, has been assassinated. The culprit seems to be one Ti-Mann MoChun, and you have to return to Imperia in the Empire of the Moon to sort things out. This involves a sub-quest in which you have to return the four shards of the Eternal Amulet to Aunt Sushiana so that she can reform it and the Empire may be saved.

The team consists of four characters: a Barbarian, a Wizard, a Bard and an Assassin. You can alter some of their characteristics before you start, and even change their sex and clothing, which is very politically correct I think. Each character has his or her own special power – the Barbarian goes into a Berserker rage, the Assassin can hide in the shadows, the Bard can sing enchanting songs and the Wizard of course is pretty nifty at magic.

Apart from the plot, the other major difference between this and its prequel is that *Worlds Of*

"The main action takes place in the dungeons"

This room took a bit of working out, but eventually it came to me. I'm clever, see.

F LEGEND

is *Worlds of it.*

Compared to its prequel, *Worlds Of Legend* is full of Eastern promise.

Legend has a mystical Eastern background, rather than a straight Dungeons and Dragons style. It's a good idea, but it's the only thing that separates the two games in feel. Everything else is exactly the same, from the character selection to the control system.

Perhaps this is no bad thing – after all, you would expect certain similarities between a game and its follow-up. And *Legend* was a great and immensely popular game, so why change it? True, but at the same time it wasn't without its faults, and I can't help thinking that this would have been a great place to put them right. Also, is it worth the money when what it amounts to is a data disk? We shall see.

There's a land map to travel around and you use this to enter various different towns. In the towns you can pick up clues, buy runes for spells, get equipment, pray at temples, and so on. However, the main action takes place in the dungeons. These are (naturally) full of peril, but they also contain gold, spells, weapons, scrolls and inevitably the shards of the Eternal Amulet. There's also a number of puzzles to solve, and keys to find which enable you to get on and move further through the dungeon, so your mind is kept busy too.

If you're not familiar with the control system, this is how it works. The view is isometric 3D, and the play area is like a board made up of small squares. You

Elliot the Dragon very kindly maps out the dungeons for you. Click on him to see it.

This icon brings up the inventory screen, where you can swap items between characters.

If you're getting severely slaughtered in a fight, click on the chicken icon and your gang, er, runs away.

These are used to choose which character to perform an action, and show the health of each.

The right and left hand icons. Weapons go in the right, and keys and scrolls in the left.

The mixing bowl is used to mix spells together. Only Runemasters have access to spells.

The rally icon. This causes the whole team to start fighting, or to group together.

THE SHADOWY FIGURE IS TRYING TO ATTRACT YOUR ATTENTION

control the four characters by clicking on where you want them to go with the mouse. There are plinths around the play area which you use to make your character fight and cast spells (in the case of the Wizard). There's also Elliot the Dragon (don't ask me), who sits at the side and does the handy task of drawing out a map for you as you progress.

You'd think in these days of amazing graphical advances and incredible game designs like *Legends Of Valour*, that this sort of game would go out of date. The truth is, *Worlds Of Legend* is so much fun that it doesn't matter how far up the RPG evolutionary

The fearsome Ti-Mann MoChun. He's the guy responsible for all this.

ladder it is – it works and it works well. If you've played *Legend*, you'll know what I mean.

But the criticism still stands that nothing's moved on since *Legend* – all you're getting is a different plot. It seems a shame when perhaps something more could have been done with it, and there must be a cheaper way of presenting a game with exactly the same game engine. I'm going to recommend it, because it is so good, and you can never get enough of *Legend*, but I'm tinged with disappointment that some new ideas weren't incorporated.

● TIM TUCKER

Use the land map to direct your party to other towns, but watch out for enemies.

In the middle of a fight, and the Berserker appears to be running away. Coward.

UPPERS Same as *Legend* – loads of fun, unusual graphics and delightful gameplay. Lots to do too, with a spell system to get your head around, puzzles to solve and scrolls to decipher. It'll keep you entertained for months.

DOWNERS Same as *Legend*. Seems a bit of a rip-off to be sold the same game with different rooms and quests – but then again, anyone who loved *Legend* (and that's a lot of people, myself included) should be well pleased that there's more for them to get their teeth into.

THE BOTTOM LINE If you've never seen *Legend*, go for the budget version – you're getting the same thing for a better price. If you've got through *Legend* and you're looking for more, this is of the same standard and is worthy of your attention, no doubt.

THE BOTTOM LINE It runs with **A1200** no problems on the 1200, but it's not any faster. **81** PERCENT

POOLS OF DARKNESS: Exactly.
[MORE LAUGHTER FROM AUDIENCE.]

MICHAEL: But I'm sure our next quest has never suffered the same problem. Ladies and gentlemen... The latest in line for a 'cute/console-esque/platforms' label... A game about a chap called Woody who's searching for a magic crystal to save the kingdom from some unspecified evil or other... Please give a great big warm welcome to *Woody's World*.
[AUDIENCE APPLAUSE.]
WOODY'S WORLD: Hello.
MICHAEL: *Woody's World* – your detractors reckon you're trying to look like *Super Mario Brothers*, but don't even come close. How do you respond?

WOODY'S WORLD: What detractors?
MICHAEL: Well, me for instance.
WOODY'S WORLD: Oh. Um. I suppose I do look a bit like a *Mario* game. Slightly. But you could say that about any platform game, surely?
MICHAEL: Yes, but there's something about you in particular. All that hitting-blocks-with-your-head business, maybe. Anyway, let's talk about your graphics.
WOODY'S WORLD: What you you think of them? 'Woody' like 'em – that's what I was wondering on the way here!
[SILENCE FROM AUDIENCE.]
MICHAEL: They're... well... they're okay,

aren't they? But not exactly startling. All the sprites are a bit titchy, and, although you claim to use 32 colours...
WOODY'S WORLD: Sure do.
MICHAEL: ...it doesn't look like more than half a dozen or so. And you look so flat.
WOODY'S WORLD: Probably because I haven't got parallax scrolling backgrounds, for some reason.
MICHAEL: Oh well, at least everything moves slickly enough. Which brings us to... the music.
WOODY'S WORLD: What about it?
MICHAEL: Well, how about giving us a quick tune?
WOODY'S WORLD: What, now?
MICHAEL: Go on.
WOODY'S WORLD: Crumbs. Er, it's not all that good. It sort of goes, er, tum te te tum te te tum, er, te te tum, er, tum. And so on.

DATA: Sensors indicate a Class M life-supporting level with lots of cogs that are quite tricky to jump onto, sir.
PICARD: Very good, Mr Data.

DATA: Readings suggest a level with pools of lava in it, sir. We could launch a probe.
PICARD: Make it so.

GEORDI: I'd say it was some sort of wormhole, sir. Either that or the exit.

piers. It's Woody's very own world of woodiness. Probably.

[SILENCE FROM AUDIENCE.]

MICHAEL: Hmm.

WOODY'S WORLD: I told you it wasn't very good. P'raps it's just as well it's really quiet, so you can hardly hear it.

MICHAEL: Ha ha ha ha. Now, to Woody himself. He's an odd little fellow, isn't he? For a start, he doesn't seem to have much in the way of personality...

WOODY'S WORLD: I suppose

not, really. Although you've got to admit it's quite handy the way he can jump on baddies' heads to kill them, and sometimes turn into a prince who can karate-kick them, and also fire blobs if he picks up the right sort of block.

MICHAEL: True. Although he can't pick up a cloak and glide around, can he?

WOODY'S WORLD: Eh?

MICHAEL: Or, for that matter, ride on the back of a dinosaur.

WOODY'S WORLD: Huh?

MICHAEL: Sorry – just my little joke. I must say, though, Woody's inertia and

everything is just about right, and he jumps about rather nicely. As controllability goes he couldn't be much better.

WOODY'S WORLD: So you reckon I play pretty well, then?

MICHAEL: Weeell... up to a point. Each level starts off looking very... not wonderful exactly... alright. But then they just never seem to go anywhere. Once you've

seen the first couple of screens of each one you've basically seen the whole thing – it's just the same sorts of obstacles over and over again. And they tend to be spread out rather thinly, so there are lots of completely empty areas, with just the odd miniscule baddy crawling about.

WOODY'S WORLD: Humph.

MICHAEL: And going back to this 'personality' thing – the game as a whole doesn't seem to have one, does it? Some of the baddies are reasonably cute (if you peer at them very closely), but you're unlikely to remember anything about them after a day or two. There's just no

coherent 'feel' to the game to hold it all together. Even the levels have got boring names like 'Cave' and 'Mines'.

POOLS OF DARKNESS: It's still reasonably good fun to play, though, I reckon. But don't expect it to last you for very long. There are sixty levels, but they're not breathtakingly long, and with the passwords you should have it polished off within a week or so.

MICHAEL: What, with all the little secret rooms and things? There are lots of them.

POOLS OF DARKNESS: Yeah, they're a nice touch, but, like the rest of the game, they hardly set one's pulse racing.

WOODY'S WORLD: Um, would this be a good time to mention my new book?

MICHAEL: Thanks very much, then, *Woody's World*. If you'd just like to stay put on the settee for a minute we'll welcome my next guest, *A320 Airbus*.

A320 AIRBUS: Hello.

[AUDIENCE APPLAUSE.]

(Could we stop this now, please? – Ed)

● JONATHAN DAVIES

"He's an odd little fellow, isn't he?"

HUGH SCULLY: It's a map, early 18th Century, and probably worth about £50.

WHEREVER YOU GO — THERE YOU ARE

WORF: My guess is that inside these boats are some levels that look uncannily like the Ghost Houses in *Super Mario World*, sir.

PICARD: Number One, assemble an away team.

PICARD: Ensign, Warp 9. Engage!

RIKER: But don't you want to investigate this outdoor level that's got platforms with spiky things that pop up out of them?

PICARD: No, not really.

TROI: It's... an underground cave level with... a boat with cannons on it and... nnggh... an interesting wibbly effect on the water. PICARD: Picard to Engineering. I need warp engines immediately.

UPPERS The basic guts of it work okay, and the levels are laid out in an orderly fashion, and as a result you'll be able to play it – if you want to – for as long as it takes it to complete it. And you'd probably quite enjoy doing it, too.

DOWNERS But it's not very exciting, is it? While everything's competent enough, nothing sticks out as being particularly brilliant. I'll try my very personal best not to, but I've a horrible sneaking feeling I'll have forgotten all about er... it by tomorrow morning.

THE BOTTOM LINE

It looks neat. It plays quite well. It doesn't do anything wrong as such. If you're hungry for more console-style action, *Woody's World* is worth a gander. But there's definitely something missing here – inspiration, probably.

THE BOTTOM LINE

I looked and looked, I really did, but couldn't honestly see any difference when *Woody's World* is running on an A1200. Sorry about that.

Game: Superfrog
Publisher: Team 17
Authors: Andreas Tadic,
 Rico Holmes, Allister
 Brimble
Price: £26.99
Release: Out now

Shock Horror In-Depth Superfrog Imposter Probe Alert! AMIGA POWER has conclusive proof that, far from being the most pumped-up and pert amphibian ever to don a dashing red cape, Superfrog is nothing more than a star-struck prima donna. Thanks to our exclusive image-enhancement technology, we can reveal that a poorly-paid stand-in was employed to undergo the rigours of platform exploration and suffer all those messy 'falling on spikes' experiences.

Shunning NASA's generous offer of a state-of-the-art CAT scanner, or a bit of down-time on their Hubble space telescope, we opted for what surely must be the highest-tech piece of picture scanning equipment available today, namely our very own 'Jacquie Spanton'. In the clinically-controlled experiment transcribed below, we established beyond doubt that the alleged 'super frog' isn't risking his own green warty skin, preferring to bask in the spotlight of fame, while immigrant, non-union stuntfrogs perish by the bucketload.

MARK: Are you ready to begin then?
 JACQUIE: Oooh, look at those lovely shores.
 MARK: What shores?
 JACQUIE: Thanks Cam, I'll have a lager and a crème de menthe chaser.
 MARK: Oh, hardy har har. Now I've got a picture from the intro sequence here, and one from the character

in the game. What do you think?

JACQUIE: I think it's about time you got them in. [WAVES

EMPTY GLASS] Look, you can get a pint in there.

MARK: No, but really, does this close-up look like the same frog as in the game?

JACQUIE: Not in the slightest.

Hey, can I go now?

We're missing some serious drinking time.

MARK: So there we have it, indisputable scientific proof that, for reasons unknown, the frog in the intro is some kind of imposter. Furthermore...

JACQUIE: 'Twas on the good ship Venus, By God you should have seen us...

MARK: Would you turn off that tape recorder now please, Tim?

Hmm, kicked the 'Jacquie goes to the pub lots' joke to death, methinks, so I guess it's time to get round to talking specifics. The big problem with platform games is what to say about them. I mean, love or hate 'em, be really good or a complete loser at 'em, they're all

pretty much the same game. Let's look at *Superfrog* as an example – your girly gets kidnapped by a witch, and you're turned into a frog. To get her back, you're transformed into a super hero

they can... oh, what a giveaway. – Ed), and then bounce your way through various themed worlds, collecting coins and fruit and jumping on the heads of various bad guys. Heard that plot before?

Okay, okay, so I'll talk about the game now. There are six worlds to battle your way through before you're reunited with your gal and (presumably) turned back into the handsome prince you once were. Each world is divided up into four levels and, at the end of each level, you can gamble your bonus in a fruit machine level to try and get an extra life or level password. Should you struggle your way through to the

FROG

end of the fifth world, there's another sub-game in the form of a shoot-'em-up where you head to the moon for a final, high-tech showdown with the wicked witch.

The frog may have a cape, but that's about the extent of his super powers, although he can jump on baddies à la *Sonic* and *Mario* and take them out. But, and here's the first of my dislikes, some baddies seem to be invulnerable to various attacks. Hedgehogs, or tortoises with spikes on their backs are obviously going to be bad news, but there are some others who just say 'no' to dying, for no apparent reason. Even when you get a handy (if barely controllable) little green thing which you can fire off at distant baddies, some of them still stay stubbornly alive. Oh yes, and there's another power-up in the form of a little set of wings, which enables you to fly.

Well, not really – if you press fire enough, you do get to flap his cape a bit, which slows your descent a little. Sorry, but I'm not impressed. Nor was I wowed by the between-level fruit machine sub-game. It's all very nice, but what's the point? It's just a bit too irrelevant for my liking.

Playing through the levels, I think that the Team 17 boys have probably got

the difficulty curve spot on. Despite the fearsome reputation we put around of us lot being games gods, I'm actually pretty crap at platform games, but I still managed to get through the first world with no problem at all, and found my progress slowing as the worlds got harder. With level codes available, a good player could jump through the easy bits and head for

the Ancient or Ice worlds, where things get really tough. The Ice levels amused me greatly due to the almost total lack of friction so, once you get going, you've just got to keep going, until you either finish, find a long stretch to decelerate on or (more usually) you die.

So there we have it. It's colourful and tuneful, but ultimately I've seen it all before. With *Arabian Nights* showing us that it IS possible to do something a little different with platformers, *Superfrog* seems just a little uninspired. That's not to say that it's not good, 'cos it is, but there are better ones out there, and better still, I think, to come.

● MARK WINSTANLEY

IT'S NOT EASY BEING GREEN

Lobbing this little green chap does all manner of naughty things.

That gratuitous product placement is everywhere!

Here's the little green chap again, in pre-pick up mode.

Flapping your cape a bit isn't the same as flying, fool.

For reasons never explained, hitting mushrooms produces coins.

Levels like this are fine for stopping intruders, but can you imagine the everyday stresses and strains of working in such a busy environment? And would your employer be able to get insurance? I wonder.

UPPERS Great cartoon opening sequence sets the tone for a thoroughly slick presentation. Good sound effects merge well with numerous boppy little tunes, and a plethora of secret passages add longevity to the game.

DOWNERS Instant death on the spikes – what a drag, as are the pixel-perfect jumps onto the tops of baddies. Also, some nasties can be jumped on where as others are oddly invulnerable. Finally, why doesn't the character in the opening sequence? A small point, indeed, and completely irrelevant to the game, but confusing nonetheless.

THE BOTTOM LINE

This line's starting to get worn out, but *Superfrog's* (yet) another fast and slick platformer for the Amiga. By now, platform fans must be in their horizontally-scrolling heaven, as the software companies are well up to speed churning out the sort of stuff we end up calling 'cute platformesque romps'. I just found this one, for all its speed, lacking in character and charm. You like platformers? Go for *Arabian Nights* instead – it's more fun, deeper, and far, far more lovable.

THE BOTTOM LINE

The game's the same, but the intro sequence is a bit quicker.

Game: Nippon Safes Inc
Publisher: DMI
Authors: Bruno Boz, Massimo Magnasciutti, Paolo Costabel, Marco Caprelli
Price: £29.99
Release: Out now

The sun was melting on the skyline, like butter on warm bread. The sea looks beautiful at this hour, when day and night make their brief encounter. The fishing boats were clacking in the mild breeze, but apart from that the only noise Tom could hear were the weary sighs of the fishermen as they prepared to make their way home for the night. "If only Katrina would return, I could make this my home," he sobbed, gazing forlornly at the dark brooding clouds as they moved menacingly in towards the harbour.

I'm sorry about that, it's just really hard to start a review about an adventure game, so I thought I'd go for stock intro number seven – the Harbour. Anyway:

Nippon Safes Inc. The first thing you notice is the international flavour of the game. A look at the list of authors should indicate the Italian background, but it's set in Japan, so it all gets quite confusing. Amusing, too, when the manual hurls us superb pidgin English like "hold down the right button of the noise" and "after getting into the umpteenth scrope he was thrown off the ship". I love it.

The first point of reference with

Nippon Safes Inc is your *Monkey Island*, *Curse Of Enchantia*-type games. You know, the new (ish) breed of adventures which are the latest word in user-friendly control (you'll have to forgive phrases like 'user-friendly control' – they just come out sometimes). You control your character by pointing with the mouse (or is that noise?) to where you want to go, and the character faithfully follows. The right mouse button brings up a menu which provides you with your basic options – open or close, take, examine and talk.

Having drawn the comparison, I must point out straight away that one of the really nice things about this game is its freshness and originality. Yes we've seen adventure games with

similar interfaces, but the look, feel and approach of this one really make it something quite new.

Plot-wise, you're not given a lot of clues to start with. There are three characters involved: the intelligent (but nerdy) criminal Doug Nuts, the strong but extremely stupid Dino Fagioli and the starstruck variety actress Donna Fatale. Great characters, these, and straight away you feel you're in for a treat of a story. The game begins with all three of them ending up in jail for various reasons, not all of them valid, and you take control just as they are set free. Various shifty individuals and mysterious strangers lurk through the narrative and motivate the gradually-

intensifying mystery that drives the plot.

But here comes the difference – you don't control the characters as a party, you take the role of each one individually. The game authors have dubbed this the 'parallaxion' system, as game authors are wont to do when they feel they've introduced something special. The idea is that the three characters' stories run alongside each other, and are indissolubly linked (at the start of the game they've never even met each other).

Thus you can play the part of any one of the characters at any time. If you want, you can play one character all the way and finish the game, then go back and play it from one of the other character's points of view. Or you could take the part of Donna until you got stuck, then switch to Doug Nuts and take him as far as you can go, and so on. Whatever character you're playing you cover similar territory to the others, but also find parts of the game that you wouldn't come across, and you bump into the other characters at various points too. Even choosing your character is fun, involving one of

Just out of prison – where to now?

those Cosmopolitan-style quizzes to decide who you most relate to.

The system is a great idea, and I must say it hangs together extremely well in practice. It's also a very effective way of getting away from the inevitable linear quality of most graphic adventures. Hurrah for that, then. Of course the idea wouldn't be worth much if there wasn't a good game to hang it on, and happily this is most certainly the case with *Nippon Safes Inc.* There's a cartoon-like feel to it, with vibrant characters and intriguing situations aplenty.

There's also a good deal of humour, which is important in an adventure of this sort. *Monkey Island* is packed with chuckles and guffaws, *Curse Of Enchantia* didn't have quite enough laughs, but this one, while not ever having you rolling on the floor, has an overall ambience of light humour which makes it always fun to play. There's even a joke at the expense of itself and *Monkey Island*, when two dodgy characters in the Hot Sushi bar announce they're writing a video game called "The Mystery of Ape Island", to which Doug Nuts replies, "But that's already been

Doug's scared out of his mind by the cabbie – and wouldn't you be?

The metro in Tyoko is extremely busy.

done, hasn't it?" (*Ho ho. – Nobody at all*)

A common problem with games of this kind is the level of difficulty. It's very hard to pitch the puzzles right in adventure games, and create the fine balance between intriguing brainstormers and irritating toughness. Again, I think *Nippon Safes* has got the balance just right here. There are parts which will have you baffled for a long while, no doubt, but nothing so unfathomable that it makes you want to give up. Also, you've always got the option of going to one of the other characters, remember, and sometimes their exploits can give pointers on how to make more progress with the others.

As you might have noticed, there's not a lot to

complain about with this game. Its only problem is a common adventure game gripe – too much disk swapping. It comes on five disks, and is hard disk installable, but if you haven't got a HD there are times when it's going to wind you up, especially if you've only got one drive.

The only thing I haven't mentioned is its size, and yes it's big. Very big. It's certainly going to take you a while to finish, and although I'm ethically opposed to games being priced over £25, you do get your money's worth here. Yep, it's cool on all counts. There's nothing left to say then but, er, go out and buy it.

● **TIM TUCKER**

UPPERS Great graphics, thoroughly enjoyable plot, superb 'parallaxion' system (yes, 'parallaxion' – read the review, you lazy git), lashings of humour and just an all-round top adventure game really.

DOWNERS Some of the translation (it's written in Italian, with four language options) is a bit rough, but you always understand what's going on. I don't like this trend of games sneaking up to the thirty quid plus mark and hoping we don't notice, though. Too expensive, but worth it in the end, I suppose.

THE BOTTOM LINE

An enormous amount of fun is abroad, and can be found on five disks with the words *Nippon Safes Inc* written on them. Er, in other words it's really good. Adventure gamers should buy immediately.

THE BOTTOM LINE

It's fully 1200-compatible, but with no obvious enhancements.

 PUBLISHING

HELLO!

Right then. What's happening on this page? We're trying to sell you another magazine, aren't we? Well, in a word, yes. We shan't beat about the bush, we shan't fudge the issue and there will almost certainly be no shilly-shallying. We'll just get on with it...

We know you've just lashed out the best part of three or four quid buying this mag, and you're probably quite enjoying it. So the idea of heading back to your local newsagent's is probably not particularly appealing. We can understand that.

But the point is that GamesMaster magazine isn't optional. It's essential. It's the only place where you'll get a true overview of the whole video games scene, every month. Each issue comes bursting with reviews, previews, tips, cheats and features guaranteed to keep your games knowledge at its peak.

This month, for example, our featured stories are the arrival of a new Super NES Batman beat-em-up, the launch of the UK Mega CD, East 17 and Said Florence's Celebrity Challenge and a background look at Probe Software - Britain's leading development house.

There's a full 40 pages of software reviews, 20 pages of tips and, er, 2 pages of Dominik.

So there we have it. The latest issue is out now, and at the thoroughly inexpensive rate of £1.95, the question you've really got to ask yourself is - can I afford to be without it?

ONE FLEW OVER THE CUTESY'S NEST

It's not all war and shooting in Mark Winstanley's head. Well, not any more. Nowadays he likes nice games too.

I'm sorry, I'm sorry, I'm so very, very sorry. The doctors here have been ever so understanding. I like the doctors. They've fed me, they've given me little tablets that make all the Bad Things go away, and they've even given me a room of my own. It's lovely, and they've carefully covered all the walls and the floor with soft cushions so that if I fall over, I won't hurt myself. Most of all though, they've made me see how very, very sorry I should be. They've shown me the article I wrote last month, and I now realise that it was a Bad Thing. A very, very Bad Thing.

I'm sorry.

Doctor Leary's given me some paper and crayons to write things with. Occupational therapy, he calls it, he says I should

purge all the Bad Things out of my system. He says I should write about pretty, nice games. I like Doctor Leary. Looking back on it, I find it hard to believe that I could write about all that blood and all those guns. He tells me that I've got to realise that guns are not big or clever. Sometimes it feels like it was someone else who wrote that article, but then I look at the pictures and it's me, and I get all confused. Then the nurse brings me my pills, and I don't feel confused any more, just sleepy. I like the nurses.

DYNABLASTER

Monday

Oops, choosing *Dynablaster* was a big mistake, but the doctors helped me see how very, very wrong I was. I don't like the punishment therapy, but now that the lights and noises have stopped I can see I was wrong. I mean, at first I thought it was a real cutie – what could be nicer than getting together with four of your bestest pals, and controlling funny little men around a big maze, being chased by funny little blobby things? “But what,” said Dr Voorhees, as he adjusted the settings, “what you forgot to think about was what the game makes you do to your pals.” And Dr Voorhees is always right. You collect bomb and flame power-ups, and try to blast your friends to little pieces. I used to think this was fun, I used to play it all the time, but then again I used to think that guns were sexy. I must try harder tomorrow.

Exploding dynamite expands at a rate of around 15 thousand feet every second. That's in no way cute or nice.

RODLAND

Tuesday

Today, dear reader, I weep big tears of grief. I tried, I really did, but Dr Myers had the straps on the restraining couch tightened even before I'd finished explaining. *Rodland* is just so cute (I thought) and so massively lovable (I thought) that no one could criticise it as a choice for even small children to play. What could be more nicerer than two kiddies trying to rescue their mummy from the clutches of a nasty monster in a far-off magical land? With only a magical rod to bop the baddies, and an enchanted ladder to get them out of trouble, these lucky boys and girls tumble playfully around the platform levels avoiding baddies almost as lovely and fluffy as themselves. Weeping sharks in wellies, startled sacks of potatoes, lobsters, mad bunnies and nubbly-nubbly nee squirrels – they're all there, and you've got to stop yourself from stopping and stroking them.

BUT – I overlooked the horribly graphic scenes of violence as you beat the life out of these defenceless creatures. And I forgot about the bombs too, the weapons of mass destruction that tear the lives out of other living thingies. Dr Myers tells me that hidden beneath the cute surface, *Rodland* is in fact a modern day parable preaching the virtues of the totalitarian arms trade from South Africa, and I for one believe him.

Tut – more violence spoils this pretty scene.

ROBOCOD

Umm..

When he saw what I'd chosen for today, Dr Gein phoned ahead and got his friends to order some extra prescription forms. By the time I'd told him that he'd got it all horribly wrong and that this game had nothing to do with the nasty nasty film of nearly the same name, he'd pulled down his big book of special medicines from the shelf and had poured me a glass of water. But then he calmed down and said he was very pleased at my progress. Jumping from the

deep blue briny, the hero James Pond is a funny little goldfish who's

protected from the dangerous lack of water by his extendable Robocod suit. It's extendable because it, well, extends really, allowing you to reach up to the top of levels. Doc was delighted that the most confrontational event in the game was bouncing on a baddie's head, and that active co-operation between Robocod and various friendly planes and cars was not only encouraged but also rewarded. But I still had to take my tablets. Something to do with me

Just to show you how fluffy this game is – the teddy's by far the scariest bit in it.

being such a special experiment boy, I think. As I slept that night, I dreamt of fish. On skateboards.

Funny tummy stretching antics, couldn't you just hug him?

BILL'S TOMATO GAME

Errr... Monday?

I've got it now, I've got it! As me and my cell were being hosed down this morning, the icy water enabled me to get into a better and friendlier state of mind. Bill was a nice man who wrote this story of a tomato's love for another one, and it now stands as one of the greatest romances of all time. Their love is hindered by 99 levels of funny puzzlement, and using only a strange blend of bizarre things like fans, jack-in-the-boxes and trampolines, you've got to blow, push and bounce the lovely friends from one side of the screen to the other. There were stern frowns when the doctors noticed the tomato bursting whenever he misses the platforms, but seeing as we were having spaghetti bolognese for tea, they didn't seem to complain very much.

Robocod wiggles his flippers and looks all fluffy-lubby-lee.

"Hello" said the hero fish. "Hello" said the funny little man, "aren't we ever so nice?"

BUBBLE BOBBLE

Ahh..?

I'm on a roll now after dragging this old favourite from the bottom of my disk pile and giving it a dust-off. It all looks very dated now, but two brontosaurus (or is that brontosauri?) wandering around platform levels and blowing bubbles at the (inevitably) cute, shuffling monsters is certainly my idea of twee. Doctor Bundy loved it, and was most

Bubbly monsters blow, er, well bubbles I suppose.

impressed that I even got old Mr Nicholson from Ward C to play with me. He wasn't very good, he kept getting killed and calling me bad names, but he seemed to like it anyway. As a special favour, I was allowed to sleep in my bed tonight for the first time in weeks. The floor had been so uncomfortable.

RAINBOW ISLANDS

Monday?

Doctor Kreuger forgot to give me my medication this morning, but I'm sure won't matter. This is it, this is the one. After a week of soul searching, I've reached the pinnacle of loveliness, the summit of cotton-wool-stuffed, velveteen-lined, lacy-trimmed niceness. This time there was no-one to fault my choice or doubt that this game was so pacifist, it wouldn't even hurt a fly. Moving on from yesterday's choice, it seemed wise to stick with the two-player theme, and it's been such a winner that they're allowing me back on the ward tonight. Equipped only with magic rainbows, the heroes have to get to the top of each level before the island sinks under the waves. They manage this by climbing up the rainbows, which crumble away after a few seconds. All manner of cute nasties are done away with by trapping them under the curve of your rainbow. Lovely? Certainly. Playable? Undoubtedly, but I'm left with a nagging doubt. Although I hid my thoughts from the doctors, I can't help thinking that it could be improved if it had, I don't know, a flamethrower maybe, or some spring-loaded man-traps in it. If this is the pinnacle of cute games (as it definitely is) then either there's something wrong with cute games, or there's something wrong with me. Maybe I'll make use of the reduced security I find around me these days...

In this magical land, a fat kid can be the hero without being called 'Bloaty'.

Stars, rainbows, dungarees – all the hallmarks of a right soppy game.

THE WESSEX SCOT INTERCITY 125

Wednesday (I think)

The towns flash by as I put as many miles as possible between me and the hospital while I finish off these notes. My brain's clear and unfuddled by chemicals, and as a final, desperate attempt at sensible journalistic integrity, I feel I've got to state the cases for and against so-called 'cute' games that have permeated my being to the very core for the past, er, week. Or was it a month?

A packet of twee – Cute games are pure fantasy, and never show anything that could be considered violent, well, no more confrontational than any Saturday morning cartoon show. In a world of overt sexism, cute games come out tops in the politically correct stakes, as the heroes are often heroines, and the games appeal to both sexes, rather than many of the more 'boysy' titles involving guns and tanks and things. These are the facts that makes everyone agree that cute games are great for young children, indeed the entire family, but I now have my doubts. I believe that there is a darker, more sinister side to these sweet games.

Sickly sweet conspiracy theory – The point of games is to have a good time, and I feel that a lot of this enjoyment is derived from the cathartic purge of unwanted feelings. So if you're feeling down, you play a cheery platformer and shed those blues, and if you're angry at your neighbour, a quick shoot-'em-up will purge you of all your violent feelings. That's the idea at least, but when you get to the cute games, where's the purge? Does knocking something resembling a gonk off a platform amid a shower of pretty stars give you a feeling of achieving something? Maybe for you, but not for me, matey. Show me a game featuring bunnies, and I'll show you a game that winds me up. Show me a game, though, where you can call down napalm on your enemy, or press key F1 to bite your opponent's face off – now that's what I call entertainment. ●

FOOTBALL TACTICIAN 2

We set the standards We break the records.

Widely accepted as the most accurate football simulation available, **FOOTBALL TACTICIAN 2** has taken the strategy scene by storm. Record after record is being broken:

- * Biggest ever multi-user system: up to 46 users! (who said four was the limit?) Now with new rating system reflecting managers' ability and achievements.
- * First ever fully interactive management game: intervene at any time during a match to change tactics, make substitutions, adjust formation or mark players.
- * Most accurate player definition: 30 parameters including real ages, aptitudes, skills, caps, playing positions, fitness, morale and market valuation.
- * Most accurate teams: 20-player squads updated EVERY WEEK! If your game still lists Des Walker at Forest or Eric Cantona at Leeds, then it isn't Football Tactician!
- * Largest results database: 21290 match results and league positions going back 20 seasons all instantly retrievable. All of which may be printed out.
- * Largest ever recording options: 36 matches always recorded IN FULL for instant full-scale replay, plus selected REAL matches that actually took place in real life.
- * First ever referee involvement: true to life behaviour. Beware of adopting 'rough tactics' when Jim Parker is in charge! The message is clear: know your refs.
- * Fastest ever setting-up time: initial start-up in less than two seconds, thanks to 900K of super-fast machine code. Smoothness of action is FT2's hallmark.
- * Most accurate editor: built-in intuitive editor capable of entering new players and fine-tuning all parameters. Essential for the serious user.
- * First ever simulation capable of replaying REAL matches (ex: the Leeds- Rangers clash in the European Cup)
- * First ever Scottish only simulation: FT2 Scotland now available separately.

FOOTBALL TACTICIAN is the first ever management game that includes strategy as an integral part of a successful campaign. Team selection, needless to say, remains a critical element. But the BIG innovation is your involvement during the match: for the first time ever, you will, as a manager, be able to alter your strategy: choose a defensive or offensive system, mark certain opponents, drop back some of your players if the pressure is tough, decide exactly when substitutions should be made, play the off-side trap, go for quick counters, etc... With full on-screen commentary and minute-by-minute feed-back, you're as involved in the match as any of your players! You will soon realise that this is no ordinary soccer manager. THIS is the REAL THING. You're in charge. You manage your side before and during the match. Nothing is left to chance. Can you rise to the challenge? Try FOOTBALL TACTICIAN and prepare yourself for the ultimate football experience.

- New features include:**
- * FA Premier League and Division One permanently in memory with full interaction, promotions, transfers, play-offs, local and European Cups.
 - * 900 players accurately and meticulously named, plus accurate European players
 - * Unique database-type search facility plus comprehensive data link giving access to additional, accurate, historical information on selected players. This feature may be further enhanced by the user himself.
 - * Intelligent behaviour of computer sides capable of changing tactics to respond to situation on the field or making substitutions based on fitness and fatigue.
 - * Three levels of commentary, from highlights only to ball by ball reporting. Plus mid-week transfer and fitness news.
 - * Friendlies, top scorers charts, precise transfer markets, club history, financial position and much much more!
- No known football game is more accurate!** FT2 is updated weekly: transfers, bids, injuries are recorded as they happen, not a year later. Users ALWAYS receive the very latest version.

And now FT2 SCOTLAND! With the Premier AND First Divisions and of course all the unique characteristics and playability of the original Football Tactician 2.

DIARY OF

The story so far: the Hidden programming crew (pictured left) are writing a game about spit. Intrigued? Now read on...

1993 JANUARY

The Christmas holiday is over, so what better way to settle down to the New Year than to do some work on *Spodland*? With Will all tied up (oo-er!) doing the programming for *Dong*, I decided to pop out and see some old chums at Dome software. Basically, I wanted their

Monday 4

opinion on what they thought of the claymation concept for the Spods. After approximately 97 cups of coffee and endless 'umming' and 'ahhing', the response was a measly, "Well, it's quite nice." Not exactly the "Wow! Amazing stuff!" reply that I was hoping for. So I'm really at a loose end at the moment – I don't know whether to continue with the claymation stuff, or go back to a more console-esque look.

1993 JANUARY

Worked on *Dong* for most of this week, though I did decide that I wasn't happy with black and white pictures for the *Spodland* 'spit-at-the-celebrity' sub-game. I wanted them in

Monday 11

colour! I told Will that I wanted a program which would convert a HAM piccy to a 32-colour one, and I wanted it by yesterday. I'm on a bit of a power trip today.

1993 JANUARY

Will came up with a program which did the job. I haven't digitised any celebs yet though, so I made do with a piccy of

Monday 18

a tiger and converted that. The result was excellent – three smug grins. Writing games is such fun.

1993 JANUARY

I thought of another sub-game today. This one puts the winner of the main Spod Spitting Tournament at the bottom of the screen. He/she/it has a large pile of gold which needs to be protected. To make things a bit more interesting, all the losing Spods keep trying to steal the gold. The Spods are going to move down the screen on different paths, but rather than just making them move in a straight

Wednesday 20

line I'm going to let them jump left and right too. But they can't just move downwards as the Spod at the bottom can spit at the descending Spods and knock them upwards to the top of the screen. When the timer hits 0, the Spod who's managed to get to the bottom of the screen keeps the gold. The whole concept is similar to those 'crush a crab' machines that you get in the arcades. (If you say so. – Ed)

1993 JANUARY

Today I showed Will's excellent piccy-changing program to Paul (the bloke who does our 3D stuff). He was most impressed: "Not bad – but

Friday 22

doesn't *DPaint 4* do the same thing?" We quickly loaded up *DPaint 4* and... oops! He was right. (Good grief. Are we still sure these are the right people for the job? – Ed)

1993 JANUARY

But enough serious techy talk. Here's a joke for you:
Q: I say, I say, I say, how many programmers does it take to change a light bulb?
A: None. They'll just tell the graphic artist that it was his fault it's all wrong and, as he's changing the light bulb, he might as well re-decorate the whole room.
Yep, today Will showed *Dong* to me and Simon. It was definitely faster and smoother, but all the graphics were

Monday 25

completely bodged. So they all had to be redrawn, remapped and resized. Argh! All the graphics that were sprites are now 'bobs' (blitter objects), and vice versa. The main difference between the two is that sprites have their own 16-colour palette, while bobs can use a much wider range of colours on the screen. Of course, what this really means is that we've now got a hell of a lot of work to do and that I'm ever so slightly annoyed!

Spods - the aptly-named inhabitants of the *Spodland*.

A GAME

1993 MARCH

After a long period of rest on the *Spodland* project (due to work on the recently re-titled *Donk* – WH Smiths objected to 'Dong' for some reason), I found the only floppy disk containing all of the work I'd done so far. After wiping away the dust and loading up the piccies, I decided that the

Monday 1

claymation concept was still the best look for the Spods in the game. However, I'm not exactly Tony Hart when it comes to sculpting, so I've decided that I'm going to design the rest of the Spods, and get someone else to actually make them. The question is, who?

1993 MARCH

Keeping with the real-life Spod look, and still in a decisive mood, I decided that I would make the Fight Arena look like the secret little magic corner which everyone has at the bottom of their garden. (I know I certainly do. – Ed) After

Thursday 4

getting some stones from the beach, polishing them up and arranging them in my garden, I had to video it really quickly before the rain set in. The result, once digitised, looks nice. Very nice, actually.

1993 MARCH

Today I pondered the ways of saliva. How does spit actually fly and move, and, more importantly, how does it splat when it hits the target? I devised a test, basically involving spitting at various objects in the garden, all set at various distances from where I was standing, and making notes on how the spit got there. (Don't try this at home,

Thursday 11

kids: your mum'll give you such a clip round the ear. – Ed) It didn't really prove much other than the more pressure you use, the further it goes. Not exactly ground-breaking stuff, but it can be translated so that the longer the fire button is held down, the more powerful the spit.

1993 MARCH

Really grossed everyone out today when I tried to digitise my spit.

Tuesday 16

1993 MARCH

Went to see Norwich City walk all over Aston Villa today (Well, it sure beats football. – Ed), and who should I see there but Jon Hare from Sensible Software! I should have

Wednesday 24

guessed that the person who wrote the best footy game ever would support the best team ever – up the City! (That's enough of that. – Ed)

1993 MARCH

Managed to drag Will away from coding *Donk* to do a bit of coding for the Spods.

Monday 29

1993 MARCH

Will presented me with the start of the *Spodland* source code. This mini-listing deals with the setting-up of the base pointers, one for the hardware and one for the variables. Apparently these are used to help speed up the program and make it easier to read. They then switch off the system, which stops all of the Direct Memory Access (DMA) and interrupts.

This makes the Amiga suddenly all vulnerable and unprotected, enabling it to do things it wouldn't normally do. Will likes to think of as a blank book, waiting to be written in. He's a bit poetic that way. The main guts of the program are then initialised, followed by the main loop of the program – which I'll tell you about later.

Anyway, that's your lot for now. If you've got any ideas for *Spodland*, please send them in – it is the AMIGA POWER game, after all. So, until next time, this is Craig saying 'Byeeee!' (Do that once more and you're fired. – Ed)

For the first time ever, we bring you exclusive claymation-style footage of *Spodland*. Spit on!

NEW

AMIGA

THE WORLDS MOST POWERFUL JUST LOOK AT THE UNMATCHED RANGE OF FEATURES

SAVE THE ENTIRE PROGRAM IN MEMORY TO DISK

Special compacting techniques enable up to 3 programs to fit on one disk. Now saves directly to disk as Amiga Dos - reloads independently of the cartridge - even transfer to hard drive! Works with up to 2 Megs of Ram - even 1 Meg Chip Mem (Fatter Agnus).

NEW

SUPER POWERFUL TRAINER MODE

now with DEEP trainer. Even better than before - allows you to generate more or even infinite lives, fuel, ammo. Perfect as a Trainer Mode to get you past that "impossible" level. Easy to use.

IMPROVED SPRITE EDITOR

The full Sprite Editor allows you to view/modify the whole sprite set including any "attached" sprites. PLUS A RANGE OF IMPROVED FEATURES.

VIRUS DETECTION

Comprehensive virus detection and removal features to protect your software investment. Works with all presently known viruses.

NEW

BURST NIBBLER

Now this super disk copier program is built into Action Replay Mk III. Just imagine a superfast, efficient disk copier program at the press of a key - no more waiting.

SAVE PICTURES AND MUSIC TO DISK

Pictures and sound samples can be saved to disk. Files are saved directly in IFF format suitable for use with all the major graphic and music packages. Samples are displayed as screen waveform.

NEW

PAL or NTSC MODES SELECTABLE

Useful for removing ugly borders when using NTSC software. (Works only with newer Agnus chips).

NEW

SLOW MOTION MODE

Now you can slow down the action to your own pace. Easily adjustable from full speed to 20% speed. Ideal to help you through the tricky parts!

MANY MORE INSTANT CLI COMMANDS

like Rename, Relabel, Copy, etc.

NEW

RESTART THE PROGRAM

Simply press a key and the program will continue where you left off.

FULL STATUS REPORTING

At the press of a key now you can view the Machine Status, including Fast Ram, Chip Ram, RamDisk, Drive Status, etc.

POWERFUL PICTURE EDITOR

Now you can manipulate and search for screens throughout memory. Over 50 commands to edit the picture plus unique on screen status "overlay" shows all the information you could ever need to work on screens. No other product comes close to offering such dynamic screen handling of frozen programs!!

JOYSTICK HANDLER

allows the user to select Joystick instead of Keypresses - very useful for many keyboard programs.

MUSIC SOUND TRACKER

With Sound Tracker you can find the complete music in programs, demos, etc. and save them to disk. Saves in format suitable for most track player programs. Works with loads of programs!!

COMPLETE control

In today's fast-moving society, life is busy and games are hard. And from time to time we all need the helping hand of Jonathan Davies, with his magic bag of level codes, secret rooms, and infinite-power-up cheats. Yes, you can live forever – with AMIGA POWER.

It's your party and you can give it unlimited power if you want to.

THE CHAOS ENGINE

(Renegade)

This is another really big, important game that's attracted lots of attention from the more tip-minded among you. What we'll do is present a random assortment of your thoughts on the game, ranging from sets of codes to cheats and general tips.

Here's a typical example, from Stephen Jacques of Newbiggin-by-the-Sea: "On world one, level four, proceed to the left (the long way round) and then up to the left until you find the entrance to a forest which should be on the right side of the screen. Don't enter yet, though. Go left and up a bit more until you find a party power star. Collect it and run back to the forest entrance before the countdown runs out.

"After appearing in the forest you should notice both characters are powered up in firepower and speed, just as if you had collected the party power star, but there is no countdown so your characters remain like this until you lose all your lives. I'm not sure if this works in two-player mode, but it does in one-player and CPU mode."

And here's another, this time from Nick Bridger of West Malling: "I've found the following cheats for *Chaos Engine*. Go to one-player and CPU and then, on the password screen, type:

HGGGFFDDCCB for Thug and Preacher with 13 lives each and 57814 cash, or
JJHHGGFFDDCC for Navvie and Brigand with 8 lives each and 10605 cash."

Giang Tong of Bristol starts off: "I've found these one-player passwords, which start you on world one, level one:

BBKMWWQW#8R35 to be Brigand and Gentleman,
BBJMQWQW#5R35 to be Mercenary and Navvie,

BBJLQWQW#5R35 to be Mercenary and Thug..."

And so it goes on for ages and ages, with subtle variations on this one password, and gets a bit boring, to be honest. So we'll cut him off there and move onto Anon of Coventry, who's simply got some level codes: "They're for Navvie (human) and Brigand (computer):

GVVCH5DMS7#N – world two
V35076X6S7WH – world three
6UCDXU25S7V2 – world four."

Ian Williams of Bedford has a rather bolder claim to make: "For the last word in *Chaos Engine* power-ups, enter the two-player password **N#F04C56Q2M0**.

"This will put you in world two with full power-ups and a fat wad of money. And as if that wasn't enough, when you finally reach B's Chaos Engine Boss it's impossible to die! Thereafter, worlds three and four can be accessed via the following two codes:

QHRCKH2Q3TN7 and
TX9K97LWCX38."

Sick of *Chaos Engine* codes yet? Tough. "While playing *Chaos Engine*, I must have copied one of the level codes down wrong or something," admits Maurice V Crey of Maasskluis (which is probably in Belgium). "Because, when I restarted the next day, I found that my party's fortune had grown considerably. I could buy anything at all, and it didn't take me long to finish this great game. Mind you, even with virtually infinite money this game is no pushover.

"I found the codes while playing Navvie and Brigand, so you'll have to put up with him and his mate:

ZBVKL9ZN5717 – world one
3V4J#4NJ#8QC – world two
QVWHN#MP#5MQ – world three."

BODY BLOWS

(Team 17)

The trouble with really popular games is that, if they've got cheat modes, roughly half the population of Europe seems to discover them simultaneously and send them into AMIGA POWER. In the case of *Body Blows* it happened last Tuesday. Now, the last thing we want to do is sound ungrateful – we don't know what we'd do without you lot sending in tips and things – but you'll understand if we don't list all 26,422,019 *Body Blows* tipsters by name. Instead, here are three picked at random: Mary Danson of St Helens, John Chapman of Liverpool and David Pender of Boness. Oh, and the cheat (for the four or five of you who remain in ignorance) goes like this:

Plug two joysticks in, wait for the options screen to come up, and then push the joystick that's plugged into Port 1 left and the joystick that's plugged into Port 2 right. Hold them like that for about six seconds and a cheat screen will come up where you'll be able to choose infinite energy and infinite credits, and have the option of playing Max.

Tired of Dan's jeans and Kossak's smug moustache? Then get the Max.

SWIBBLE DIBBLE

(Er...)

We've got absolutely no idea what *Swibble Dibble* is, or whether these codes will be of any use to anyone, but Mrs M Woodruff of BFPO 104 seems to think they will, so here goes. (And if this turns out to be a joke at our expense, we accept no responsibility.)

Level 10 – PITBULL
Level 15 – GUNS N ROSES
Level 20 – BATMAN RULEZ
Level 25 – METAL CHURCH
Level 30 – GUMMIBAERLI
Level 35 – TESCHNO BIET
Level 40 – SOLIUS

Level 45 – EICHBAUMPILS
Level 50 – GAMEBOYSUCKS
Level 55 – HALLO LITO
Level 60 – ANJAMOUS
Level 65 – ODIN HOL IHN
Level 70 – SPERMINATOR
Level 75 – TACH NANA
Level 80 – YOU SEXY MF

Going for gold? Have a bash at bronze first.

LEMMINGS 2

(Psygnosis)

"I'm writing to tell you about a kind of cheat for *Lemmings 2*," begins Paul Guerrieria of Marlborough. "To make the game much, much, much easier to complete, on the first level of each tribe save only one lemming, for which you will get a bronze medal. Now go through all the other levels of that tribe with just one poor, solitary lemming, making it a lot easier. Each time you save this lemming, notice that you get a gold medal. Now, when you've done all ten levels on, say, the Medieval Tribe, select 'Award Me' which will come

Five million credits? Let's take off and nuke the site from orbit – it's the only way to be sure.

(Team 17)

"I've found a cheat that comes in very handy," trills Matthew Froude of Warrington. "Select the two-player mode and switch the Share Credits option on. Then start the game. On the first level, go to the computer and log on. Instead of typing PPEAB to go straight to level ten, as suggested in AP 23, type PPPEAB. (Note the three P's.)" (Cor.) "When you now log off you'll go straight to level ten, but if you go to the nearest computer (a few screens above where you start) and log on you'll find you have a staggering five million credits, which really helps."

- 5) "I nearly cancelled my subscription." – Ian Aston of London

up after you've completed the last level of a tribe. This will show that you've gained a silver piece of talisman. Now simply go back to the very first level of the tribe and complete it, saving every lemming. You'll receive a gold medal for that, making it all golds for your tribe. Again, select 'Award Me' and the talisman will now be gold! If you repeat this tribe you will complete the game in a reasonably short amount of time, but it won't be easy!"

To be quite frank, we lost Paul somewhere near the beginning there, but he might have something.

DON'T FORGET

We don't make up the tips in Complete Control. Which means that these pages can't hope to survive unless you lot out there keep sending in your tips, cheats, level codes, highly personal observations and all the rest of it. There are prizes for the very best ones, so send everything you can possibly muster to:

HISTORY LINE 1914-18

(Blue Byte)

Why is it that tips for games like *Body Blows* tend to come scrawled in biro on the backs of old chocolate wrappers and things, while wargame tips arrive neatly word-processed and immaculately spelt on crisp sheets of A4? That's the kind of thing you begin to notice when you're half-way through *Complete Control*. You also begin to get really, really annoyed by the whirring noise the printer's making in the corner of the room, and the way the Shift key on the keyboard doesn't seem to work about every tenth time you use it, so you have to look up at the screen each time to check it worked, and you can't help thinking about all the really great telly programmes you must be missing. You also begin to measure every key stroke in pence. That last sentence was probably about another 23.2p or something, for example.

Paul Kirby of Leeds has some helpful advice for *History Line* players. And it's so neatly typed it's hard to see how AMIGA POWER'S typesetting process could possibly do it justice.

Over to you, then, Paul. "First, here's a complete set of codes:

TWO-PLAYER MODE

"(Not that you need these codes because they're conveniently contained within the instruction booklet.)"

What? Well I'll be blown if I'm typing them all out, then. On with the tips!

"Now for a few tips for those players having a spot of bother winning. The easiest way to beat the computer is to position your forces in the following manner. Retreat to your buildings, put all your artillery in front of the door and surround them with your other units. Then put all your spare units inside the buildings. On your movement turn, wait for the computer to select its attack targets and then move the targeted units into the buildings for repair. Replace these units with the undamaged units from inside the buildings.

"On your attack phase, only use your artillery, as using the perimeter units will only weaken them (thereby giving the computer a better chance of destroying these units on its attack phase). Only shoot enemy units adjacent to your perimeter units, as they pose the biggest threat. (If there aren't any enemy units next to yours, then the computer player can't do much damage.)

"The most dangerous enemy units are the aircraft, so shoot them down as soon as possible. For some strange reason, the computer doesn't like to put its aircraft in for repair, so this gives you a good opportunity to whittle them away. After this, go for the computer's artillery. Then, when you feel strong enough, go for the kill.

"Of course, all this doesn't make the game particularly interesting, but at least you should win."

...and I should know – I had to 'repeat' my History A-Level exam three times.

1 Attempt to leave your room. After the phone call, go into the bathroom and inspect the lamp over the basin to find the coded message. The phone call contained the keys to the code. The mirror wall tiles in the bathroom produce the following grid:

	B	O	R	I	S
3	A	B	C	D	E
7	F	G	H	I	J
4	K	L	M	N	O
5	P	Q	R	S	T
2	U	V	W	X	Y

The message is also written backwards and instructs you to switch your bedroom light on and off three times, then call the number you heard in the phone call (and used to decode the message): 37452. Call that number and you will be given instructions and a clandestine appointment for 7 o'clock this evening. Leave your recording material and microphone/transmitter, along with the files on the local KGB people, in your room. Then go to KGB Department 7 and tell the man at the entrance that Kusnetsov of Department 7 is expecting you.

2 You'll soon end up in Kusnetsov's office, be respectful and leave as soon as you can.

3 Then visit Agabekov's office and chat briefly. Note his two phone numbers. Go into the vacant office and phone Agabekov on his outside line. Tell him you have information concerning a visitor for him from Moscow, and that you'll be waiting down in the street.

4 When Agabekov leaves his office, go in and inspect his trash can. Take the cigar butt, or at least inspect it. (*Remember kids, smoking isn't big or clever.* - Ed)

5 Go back to the Gostinitisa hotel, pick up your recording equipment and take the Metro to Lagoda Park.

6 Go along the path as far as the bench, hide the microphone on the bench and then cleverly conceal yourself behind a convenient tree. Switch the recorder onto 'record' and wait. When Romeo's contact (Savchenko) and the new man (Chapkin) have finished their discussion, follow Savchenko.

7 As Savchenko sets about punching in the code to open the warehouse door, take out your camera and use it on him. You'll see the series he keys into the pad. Wait for him to exit the warehouse and then hide the microphone on the desk in the small back office. Open the loft skylight window. Go back down and out the way you entered and go into the bar beside the warehouse. Move through the bar and upstairs. In the top room, open and go through the skylight. Climb through the warehouse skylight... and you're back in the warehouse loft. Walk downstairs, hide in the back warehouse and wait for Savchenko to arrive with the gang boss (Mechulaiev). They'll do a little moving around and talking - listen to them. Another man (Obukov) arrives and joins Mechulaiev in the latter's office. When Obukov leaves, go up to the lofts, through the skylight, down through the bar and back onto the street where you'll see him going down into the subway. Follow him.

8 Follow Obukov into the cocktail bar of the Syevyemaya Zvezda hotel and wait. Agabekov enters and they both go into the lobby. Go into the lobby, where you'll see them in conversation, then go back onto the street. When Obukov comes out, follow him back to the warehouse, go back into the warehouse and wait until Obukov goes away. It's then time for you to leave. On your way out of the loft, don't forget to use the headphones to listen to all the recordings on the recorder. When that's done switch the recorder back to 'record' and leave it there. Go out by the skylight again.

9 Go round to the back of Gostinitisa and wait for Cut-Throat to arrive at 7pm. When he says 'cut-throat' show him your ID. He'll want to know if you've been smart enough to gather all the information he ordered you to. The answers to his questions are: you found a cigar in Agabekov's office; Mechulaiev and Savchenko are holding the video cassettes;

5

Inspect the park.

6

7

Put the microphone on the desk.

8

cocktail bar

the Moscow-Leningrad contact is called Yakuchev; Viktor Matsnev will handle their exportation; the cassettes will be exchanged for crack and Mr X is Agabekov.

10 When Cut-Throat leaves, go up to your room where you are to meet your controller (Savinkov) at 7.30pm. He arrives with a body. Inspect the body and you'll find a phone number. Phone that number and say "... Yes... Come up...". When Savinkov tells you to prepare for the bad guy's arrival, move the body into the bathroom and take his hat and coat. Put them on, return to the bedroom and turn off the light. When the bad guy knocks on the door, tell him to come in. Savinkov knocks him out as he comes through the door. When he wakes up he'll tell you who he is. Savinkov asks you for a report - it doesn't matter whether you tell him about Cut-Throat.

11 Savinkov gives you an hour to throw the body into the canal along from the back window, take off the hat and coat and put them back on the body. Move the body to the room nearest the stairs opposite yours (it's the only one you can enter) and look in the bed, where you'll find a bottle of vodka. Use it on the body, then go downstairs, outside and round the back and give the rest of the bottle to the down-and-outs. Go back up to the room and throw the body out of the window. Go down to reception and tell the receptionist that someone's making too much noise upstairs.

When the receptionist has gone, have a look at his desk, then take the wheelchair out into the street and round the back. 'Use' the wheelchair on the body. The body will appear in the wheelchair, and you can then move the wheelchair towards the canal. The militia men will show up - if the body has his hat and coat on and reeks of alcohol, you'll have no problem dealing with them. Throw the body and wheelchair into the canal and return to your hotel room. When the hour is up, Savinkov will arrive. He tells you to go along to the Hotel Syevyernaya Zvezda to discover who sent the two killers after you.

12 At the hotel all you have to go on is a room number. Go into the cocktail bar and talk to the mini-skirted blonde (Natasha). Ask her about Room 304 and, as she talks, Tamara will come in. Ask to visit Room 304, and you'll find that she won't go until you've got some dollars. You don't have any so you'll need to get some. You get the dollars like this: when you see the American, Greenberg (you spent some time with him at the end of Chapter One), go and speak to him. You'll be intercepted by a woman called Wallace. Be nice to her for as long as it takes to wheedle some dollars out of her. Then go and see Greenberg. Be nice to him too and answer his questions truthfully.

13 When Greenberg leaves, you can return to Tamara with your dollars and go up to Room 304 with her. Ask her about the other room she uses and she'll give you the number '416' for \$50. When you've finished talking to her, go up to room 416, bribe the landing lady with \$10 and enter the room. Inspect it if you like. Use the light on the mirror and you'll discover it's a two-way job - so smash it with an ashtray. Take a look around the room beyond the mirror, and you'll see Chapkin's photo - take it.

Leave the hotel and make a quick trip to the warehouse (go in through the front door) to pick up your tape recorder (you could also have done this before going to the hotel). Listen to the recordings that you haven't yet heard. Remove the headphones, stop the machine and leave it set to 'voice-activated playback'. You won't be able to get the microphone from Mechulaiev's office as it's locked and the door's solid.

14 Return to your hotel with the tape recorder and then go to sleep. You are brutally woken up by Chapkin - obey him. You'll have a chance to act in the bathroom: choose a dialogue option containing the word 'comrade' to voice-activate the tape. When Chapkin turns, slug him. Take the syringe from his pocket and inject him with the contents. Ask him relevant questions of your choice - it's important to learn all about Kusnetsov and Viktor Matsnev. Chapkin will die after a few minutes as the drug is experimental. Wait for Savinkov to arrive and tell him what you learned about Kusnetsov. Savinkov will furnish you with a replacement for the camera which couldn't take photos. He tells you to wait in your room until morning and then leaves. Hide Chapkin's body in the cupboard and sleep some more. When you awake, it's time to start disobeying Savinkov.

15 You have an appointment with Cut-Throat at 11am in the alley behind your hotel. There you'll meet one of the previous night's down-and-outs. Ask him to give you the newspaper he's holding, which he'll do in exchange for your camera. Make the swap and look at the paper. Decode the message using the same key and grid as before. Go to the phone booth in the street in front of your hotel and wait for the call. Get any information you want - you should be told to expect Yakuchev's address tomorrow.

16 Go to Lagoda Park and meet Greenberg again. He'll tell you that Yakuchev is Pamyat (*This makes sense when you're playing* - Ed), concluding Chapter Two. In Part Three (next month), you'll be going to sea aboard the good ship Viktor Matsnev. ●

13

You've been interfering with my girls, Rukov. What's more, I need to know who of what led you to my modest recording studio in room 418.

Imagine calling this 'truth' Everything's a relative, as the comrade said. Let's see...

I've got just one thing for you and I don't know what it's worth. There's a guy called Yakuchev. You must've heard of him. It seems he's Pamyat.

More trees and walls and things. Just like real life then, where trees and walls are in abundance. Except for some bits of Thamesmead, where you won't find any trees.

There's some wonderful scenery in Mittedorf, like this tree by a wall.

One thing that really winds me up in LOV is getting arrested for 'acting suspiciously'. It's such a pain.

You are under arrest for acting suspiciously

Second level tasks

Last month we told you how to go about completing the first level tasks for four of the nine guilds. And now, here are the second level tasks for the same guilds.

1. Men At Arms

Meet Orlak the Warrior at the Casino. Orlak tells you to find the 'Salty Captain' at the Mermaid, and he'll lead you to the contraband. Follow Captain Birdseye (for it is he) when he leaves the Mermaid until he goes into the next building, and into an inner room, where you'll find the contraband.

2. Asegeir

Find Forseti and return with the scroll of truth. Ask for directions to the Halls of Justice. At the Halls a man approaches, and instructs you to go to the Casino and tell Forseti it's his scroll you want. Ask his name (Denby). A notice at the Casino directs you to Denby's scroll, which is downstairs at the Halls.

3. Thieves

Steal a day's taxes. A notice directs you to the Troll's Arms, where a man approaches and tells you he's cut the purse strings of the collector, so all you have to do is follow him until he drops the purse.

4. Set

Collect the sacred flask from the embalmers. A scroll at the embalmers' yard says that the key is next door. Go next door (to Wanlock Tombs), find the key, unlock the door in the yard and collect the flask.

LEGENDS

Part the Second, in which high-ranking guildsman Tim Tucker lets you in at the

is the Seaman's Tavern. Join a temple, because this makes healing a lot cheaper and you also get wages from them. Always sleep in your room and carry no more than thirty groats around.

Avoid the town guard at all costs. They don't like adventurers, and are liable to throw you in prison or fine you. Always spend at least two days between quests resting, eating and sleeping – don't sign up for the next quest immediately. Buy LOTS of life insurance. When you've got some spare money, spend it on weapons training. If you get possessed by an evil spirit, don't get 'cured' if you can help it – it's beneficial to your health, and your appeal and energy are boosted.

Making money

There are three main ways of making money in Mittedorf – commodities trading, running errands, and mugging people. The best way is trading – buying cheap and selling high – if you know your way around town and don't mind carrying large amounts of money and goods on your person. Last month we gave you a list of how shop prices compare in Mittedorf,

so check that out to see where you can get the best bargains. If you want to make some quick cash, go

round to the back of the

Custom House (the first place you entered when you started the game, opposite the town gates), and you'll find a mysterious passage. Follow it down and you'll come across the Tax Collector's daughter, who sells stuff cheaper than her father. Buy as much Ore from her as you can, then just nip back upstairs and sell it to her old man for a tidy profit.

After building the largest chess piece ever, Bill wasn't sure what to do with it.

The quickest and most profitable run is usually between the Prison Stores/Ship's Chandelers and Hotch's Armoury. Use the West Wall route, veering round the Temple of Freya, the Casino, the Mercenaries' Guild and then up to Castle Boulevard. Try not to carry more than 250g at any one time, as that's just what you need for a full load of goods. If you're powerful in a temple and a magic guild you can use your sanctuary/warp spells to good effect.

Running errands is useful if you haven't any money and need some capital to start your commodities trading, but it doesn't pay a lot – between 10 and 20g.

Mugging can get you large amounts of goods, but the resulting healing fees mean it's often not too profitable.

There are other ways of making a fast buck. You can deal in bat snacks, a delicacy in these parts. Just throw your weapon at a bat, pick up the remains and sell it for 2g – much more than its nutritional value as they are a delicacy. (Oh, yuk. – Ed) You can also sell off unwanted quest items, such as scrolls and so on. The temples and guilds offer small wages, but they're fairly nominal. Some of the objects lying around town are worth picking up – for example the potion bottles are worth 30g each, but most are only worth 1g.

● Still hungry? Then keep an eye out for *The Official Legends Of Valour Tips Book* – available soon!

Have you ever seen that film *Legend* with Tom Cruise in? Impressive visual technique I thought, but it really needed more character development, and some sort of plot would have been nice.

When Debussy composed his first masterpiece 'Prelude à l'après-midi d'une faune' it ushered in a whole new era, due to the inclusion of atonal elements for the first time in Western classical music. It's also a very nice tune.

Long ago there was a strange and ancient race – the Druids. Nobody knows where they came from, or where they went – or what they were doing. (I said NO Spinal Tap jokes. – Ed)

Plato's view of the world might be categorised as 'idealistic', in the sense that he perceived objects as representations or imperfect copies of more real and perfect 'ideas'. Aristotle found this view entirely wrong, of course.

DIZZY: PRINCE OF THE YOLKFOLK

Q "Please tell me – how do you get past the troll on the bridge?"
Michelle Skidmore, Holywell

A What you need to do is get the holy cheese from St Peter, which he'll give you in exchange for the harp, and

then drop it into the cage in front of the fluffle in the forest. The fluffle will run into the cage, and if you pick it up and put it down in front of the troll it'll scare him off.

KING'S QUEST 5

Q "I'm in the lab at the weird contraption on which I've placed the wand. I then placed the cheese in the

LOOSE ENDS

These are all questions that I can't answer, but – hopefully – you might be able to.

Q "In HEIMDALL, I haven't a clue what to do. I've visited every room on every island, cleaned out every chest and done everything I can do, but I can't seem to get off the first map. I've got a whole host of spells (including Desericion, which I can't use anywhere) and a scroll with loads of funny runes written all over it. Please help!"
Martin Mathers, Stanmore

Q "In LEGEND, on level seven of Fagranc, there's a room split by water which can be entered on either side. The east side has a switch which opens a door on the west side, but as soon as I enter the door on the west side the door I opened closes. How can I get the door to stay open?"
Julian Jones, Wrexham

Q "The trouble is an old chestnut called NEUROMANCER. I can't for the life of me get past Larry Moe to get into the Panther Moderns' meeting room.

Please help me – even Electronic Arts have run out of clue books."
Chris Jones, Erith

Q "I've just reached the final level of BRAT (level 12) but I can't work out the solution to the eight colour-coded pads. Can anyone help?"
Philip Sadler, Darlington

Q "I'm stuck on D/GENERATION. I've got to Floor 84, Scene 82/84, but I can't make any sense of the ramblings dished out by the bloke who's meant to give me the computer terminal password."
Darren Wall, Halesowen

Q "On HARLEQUIN, how do you get from TV World back to the Dream Mile and back?"
Chris Kelly, Londonderry

Q "On CADAVER, I've just teleported to level three, but only have seven units of energy left. This makes it near-

impossible to continue. Should I have done something before I left?"
Philip Sadler, Darlington

Q "In VOODOO NIGHTMARE, how do I get the hourglass which I think I need to complete the Eagle Temple? And how do I hack through the jungle? And where and how do I get some bananas?"
Jan Holmes, Hull

Q "In SPELLBOUND DIZZY, I've saved Dylan, Grand Dizzy, Denzil, Dozy, Dora and Pogie but I don't know what to do next. I've probably got the objects I need, but I don't know what to do with them."
Jan Holmes, Hull

Q "I can't open two of the doors on EYE OF THE BEHOLDER. They're down in the Drow levels. The first is on the level of the stone dagger portal, down the right passage and on the right-hand side just before the Hall of Thieves. The

second is where it says 'Combination – be quick.' I've tried lots of combinations."
Simon Bullows, BFPO 53

Q "How do you get the spiral design off the wall of the temple in INDIANA JONES AND THE FATE OF ATLANTIS? I've opened the lamp and used it with the darkest spiral, but Indy just says 'That doesn't seem to work.'"
Steven Sherwood, Bately

Q "And I'm in the same game, at the stage where I have to set the Worldstone, Moonstone and Sunstone on the dial near Atlantis. I have tried many combinations but he just keeps saying 'That didn't do anything.'"
Allan Smith, Leuchars

Q "And I can't work out where the entrance to Atlantis is. I can find the airlock in the German sub, but can't enter it as the sub goes behind it. I've found a gap in the cliff, but no luck there either."
Kirsten Gillespie, Glasgow

Q "I'm stuck on ELF, level 6. I've found everything, apart from the sledge that Albert wants. I can't open the exit, either."
Russell Flandes, Southend-on-Sea

machine. There's a lot of noise and bright lights, after which I'm told that nothing happened. Before I can do anything, the evil magician appears and zap! I'm dead."
Scott Connolly, Glasgow

A You actually need two wands at this point – Mordack's, which you should put on the left-hand side of the machine, and Crispin's, which, you've guessed it, should go on the right.

OPERATION STEALTH

Q "I've been thrown overboard by the soldier off the boat. I have operated the bracelet which freed me from the ropes. I can't find any way out."
S Cutts, Nottingham

A Ah, well, you've got to free Julia as well by 'operating' her.

SOME GAMES

Q "Could you tell me whether you have any back issues with a solutions to: (a) Level 2 of *Cadaver*, (b) *Heimdall* or (c) *Curse of Enchantia*?"
B Timson, Barnsley

A (a) Don't think so, (b) Ditto and (c) Yes! – issues 21 and 22.

SHADOWWORLDS

Q "I'm on level four, I've teleported down onto the planet surface, and I keep getting blasted. Shooting back seems to be a good way of getting killed quicker. Running away seems to keep you alive, but only for a short time. All I can see of interest is a crate by a flare in the wall, but the robots seem to congregate around it, so you get blasted if you get near it. Secondly, how do you work credit card slots? They just swallow my card and nothing happens. The manual is pretty unclear over this."
Ben Nichols, Taunton

A It's a bit deceptive me printing this here, 'cos I haven't a clue what the answer is. But I've been on that planet surface (I couldn't get anywhere either), so I really do sympathise. Can anyone help?

POLICE QUEST 3

Q "I'm trying to solve the pattern to the murders on the computer 'draw and plot' set-up. I have all the co-ordinates to the murders which I plot on the map. Now I don't know if I plot the murder locations on the streets or the blocks. When I draw the pattern, which I believe is the pentagram, nothing happens. If I'm right about the pentagram, where do I place the last point, and when do I know if I'm right?"
Scott Connolly, Glasgow

Q The fifth point is actually on Palm, between Eighth and Ninth Street. You'll know when you've got it right.

EXTREME VIOLENCE

Q Sometimes I get surrounded by walls and can't attack the other player so we have to quit the game.
Dan O'Brien, Clapham South

A Press the 'help' key and you'll get a new maze without losing a life. ●

CASES CLOSED

"If you're not part of the solution, you're part of the precipitate." (As they used to say in my Chemistry class.) These puzzles have been solved by AP readers, acting alone. Respect is due.

LEGEND

Q Nicola Lindsell of Willesden Green was on level four of Fagranc.

A "Wander around a bit until you attract some monsters. Flee to the room with the chest in it and at least one monster should follow you. Get him to stand on one of the four squares which you teleport to. Position three members of your party on the other squares. The remaining member of your party should then be able to get to the chest. Inside it is a key which will let you get further."
Daniel Stow, Tunbridge Wells

THE SIMPSONS

Q Rhiann Harwood of Pontypool was trying to spray some flowers.

A "Jump up from the window ledge to the top of the door, and then jump up to them, spraying as you jump."
Ray Smith, Milton Keynes

BAT

Q Andy Yates of Gloucester couldn't quite locate Vrangor's Station.

A "You need the Drag to get there, which is ahead of the Northern Airlock. Sloan is needed to pass the guard, and you need 5,500 credits. Before leaving, you must have the access code for Epsilon as well as plenty of ammo."
Ray Smith, Milton Keynes

ZAK McKRACKEN

Q Allan Smith of Leuchars presented us with a long list of questions.

A "(a) To see in the dark, assuming you mean in the Mayan Temple, search for a torch and light it with your lighter. (b) While in the toilet, block the sink with paper and let it overflow. When this happens, push the help button. You can then go forward and put the egg in the microwave. (c) Assuming you mean Annie, in 14th Avenue put the blue crystal in the slot in the red door."
Ray Smith, Milton Keynes

THE BARD'S TALE 3

Q S Marsh of Elland was stuck in the Ice Keep.

A "To get into the Black Tower, cast Mage Flame, Shock Sphere, Word of Fear, Summon Elemental and Spell Bind. To get into the White Tower (the one with the shimmering curtain), cast Levitation, Anti-magic and Phase Door. To get into the Grey Tower, cast Elik's Instant Wolf, Wind Hero, Fanskar's Force Focus and Kylearan's Invisibility Spell." (Yeah. What it says. – Ed.)
Janet Campbell, Taunton

FANTASY WORLD DIZZY

Q Mark Kessock-Philip of Weymouth was having trouble with the ore crushers. (Oo-er! – Ed.)

A "Go up the tree house until you reach Grand Dizzy. Talk to him and he'll give you the crowbar. The fourth key is down the well. I'd drop the window frame – it's completely useless."
Daniel Stow, Tunbridge Wells and Jan Holmes, Hull

GOBLINS 2

Q James Cooper of Barnet was trying to wake up a giant.

A "The answer's quite a long one (*Cripes, it is too.* – JD), but here we go. Deep breath, everyone.

1. On the opening screen, position Fingus behind the two men next to the bottle. Using Winkle, try to grab the sausage while standing next to the man by the house. While the men are laughing, get Fingus to grab the bottle.

2. Go to the screen on the right and use the bottle on the fountain to get the water. Go back to the opening screen and use the water on the flower. Then give the flower to the man by the house, position Winkle on the roof and, when the man falls asleep, get Winkle to get the sausage.

3. You need to go to the screen with the fountain and get into the house using the rock. Once in the house, get the key from the cuckoo clock and go outside. Use the key on the cellar and get the wine.

4. Now go two screens to the left and get Winkle to grab the chicken by the neck. At the same time, Fingus should hit the chicken over the head with the sausage. Now you've got the egg. (*Oh, and next month's 'outdoor recipe' is for Spaghetti Bolognese... – Ed.*)

5. Fingus should then put the sausage down the hole. At the same time, Winkle should walk past the dog. Then he should go through the hole in the tree, creating a hole in the rock for Fingus to go through. Fingus should then light the wood with the matches (from the house). Then he should put the egg on the fire to wake up the giant."
Jeff Pearce, Wolverhampton

OBITUARY

Q Fran and Lote of Leicester had only managed to find two of the mystic gems.

A "The only way I could complete this game was to map each section as I came to it. One of the remaining two gems is in Cullen Castle, which is reached through Cullen Dungeons. To

get the last gem you need the blue gem from Falconwood and the item received in exchange for the bound spellbook in Burville Castle – this is the only thing that'll kill the knight guarding the fourth gem. The gem is found by opening the secret passage in the catacombs using the blue gem. Kill the knight and work your way northwards until you find a very strong knight. Kill him and you'll find that the gem is behind him."
Jan Holmes, Hull

CRUISE FOR A CORPSE

Q The Mumfords of Shoreham-by-Sea were looking for a tool box.

A "Pick up the key from Julius's room. Later on, nearing the end, you need a screwdriver from the engine room, but you don't need a tool box."
M Francks, Hinkley

DUNGEON QUEST

Q J A Aldcroft was experiencing a conflict of interests with a dragon.

A "Kill the dragon with the dragon nip. You can't escape the maze, so don't go in – use the other door instead."
Jan Holmes, Hull

SPELLBOUND DIZZY

Q Only last month, James Bachelier was pondering the significance of many marvellous items. Oh yeah, and he wanted to get past the Beast's Lair too.

A "I presume that you have collected the bag from the Old Mine workings. You must collect three rocks from the Sandstone Quarry and take the shamrock down the Windy Shaft. Take the third shaft on the right and jump over the water using the plant. You will find a Leprechaun who will ask for a "yellow, leafy thing". Give him the shamrock and he will give you a talisman. If you are holding this when you walk into the Beast's Lair it will stun the beast so that you can get past. The human bones are for use when getting yourself eaten by the man-eating plant (if you use them on top of it then it will swallow you up). The pepper pot is used on the Whale's snout to make it sneeze – you then stand on the fountain and push up and left or right at the last second and you'll be propelled in that direction. And the megaphone is used with Grand Dizzy's ear trumpet to get Dylan's vibes."
Andrew Norris, Ashford

20-ish levels of platform-leaping japes, meeting tricky traps, perplexing puzzles, mixed-up machinery and nasty, er, nasties on your way. The usual, in other words. But hey, that doesn't make it a bad person...

kicks, is

These days, we seem to be in the middle of something of a platform game renaissance. We've had some corkers recently (*Arabian Nights*, *Flashback*), there're some great-looking ones coming up very soon (*Soccer Kid*, *Yo! Joel*), and now we've got the long-awaited *Beavers*. This is a game that's gone through a few changes since we first previewed it donkey's years ago, but it's still a platformer at heart. You play Jethro Beaver, whose beaver babe's been kidnapped by some evil rabbit dude with a machine gun, for unstated but doubtless immoral purposes. Of course, you can't just pop round to Bad Rabbit Dude's place and sort 'im out – nope, in true traditional style, you have to slog through

"Aargh! Annoying slippery-slidey snowy worlds"

I have to make a point before we start. Something that I thought we'd left behind a long time ago has reared its ugly head recently rather too often for my liking. I'm talking about multi-disk games which don't recognise the presence of a second disk drive. *Beavers* isn't the only one this month, but in a completely arbitrary and unreasonable way I'm going to single it out, mainly because right now I can't remember what the other ones were. In these testing times, this kind of thing is simply grist to the mill of those who say computer games are old hat, tedious and incompetent compared to the latest flash-bang technical wizardry on the consoles, and what's more it's a slap in the face to everyone who's invested in the future of the Amiga by forking out hard cash for the extra hardware that can make a gamer's life so much nicer. Sort it out, programmers.

Jethro holds his breath, but starts to hallucinate seagulls with Walkmans.

But back to the game. There isn't really much I can tell you about *Beavers* that you can't figure out for yourself by looking at the pics. It's pretty basic stuff, lots of jumping around, taking out the odd baddie with a swipe of your spade-like tail, flicking the odd switch to operate lifts and suchlike,

and searching each level for the Davy Crockett hat that'll enable you (for reasons best left to the imagination) to go through to the next stage. There are about four different types of level, including underwater sections, tough auto-scrolling bits where a second's hesitation will result in your being squashed to death by the side of the screen, and – aargh! –

annoying slippery-slidey snowy worlds where (surprise!) Jethro's inertia takes on a life of its own. Every sixth level you meet an big boss, and that's about your lot.

It's all engaging enough, but it does get pretty repetitive once you've seen all the graphic styles, and the control isn't nearly as precise as it ought to be in a game with the unforgiving collision detection that this one's got. Truthfully, the word that came mostly to mind while playing this was 'Next!'

● STUART CAMPBELL

The first level – don't get discouraged, it gets a bit easier after this.

Fair warning time – the next game I have to play with a slippery-slidey ice world gets docked 30 percent straight away.

building dams and gnawing sticks.

UPPERS Lots of levels, huge bosses and a nice mix of thoughtful puzzley adventurey sections and outright platform-leaping arcade antics.

DOWNERS The colour backdrops are a bit crude (especially the borders), and the controls can make it easy to accidentally the select the 'creep' mode, which can frequently be extremely dangerous on the auto-scrolling levels. AND it's got bloody slippery-slidey ice worlds. Grrr.

THE BOTTOM LINE It's all very sweet and everything, but in the wake of platformers like *Arabian Nights* and *Flashback*, it's all just a little too simplistic. Perfectly nice, but I fear it's destined to be lost to history fairly swiftly.

THE BOTTOM LINE It's the same, there's no difference. **71** PERCENT

Gower's performance was hampered by his insistence on scratching his back as he bowled. Still, it's a good chance to see the spin speed menu.

Oh no, looks like he got hold of that one. Again.

Another of Tim's fielders entirely fails to get to grips with a slow-moving ball. What a shoddy performance.

An umpteenth 'fast' ball gets the treatment and sets off to the Vauxhall Bridge Road.

It's got bats. It's got wickets. And it's really just the ticket.

My problem is that I'm just too trusting. When I was at school I was forever being caught out by the most transparent of ruses. For instance, there I was, minding my own business, when the music teacher, Froggy Davies by name, said, "Norris, you like music, don't you?"

"Yes, sir," I replied.

"Good, help me move this piano."

Now the more cynical sort of chap is never tripped up like this more than once or twice. But not trusting old Tim, oh no. I never, it seems, managed to work out that nothing is ever quite as it appears, and that no-one – not even someone as pleasant and apparently ingenuous as Linda – is ever without their own secret hidden agenda.

Take, for instance, my experience of earlier this month. It was a hectic day and I thought I'd better get away from my desk for a bit of a break. I decided that a visit to my old chums on AP would do the trick, so I wandered into their office for a bit of a chat. Linda looked up from her daisy-covered desk and said in her lovely Hackney accent, "Ere, Tim – you went to public school, didn't you?"

"Yes," I foolishly replied.

"Oh good, you'd probably like to review *Graham Gooch World Class Cricket* for us, then." Caught again. If only I were a little more suspicious of people.

On the face of it, it's difficult to

capture the magic of England's summer sport in a computer game. What, after all, is cricket? What do you think of when someone says 'cricket'? Beer tents, chaps in white trousers playing a bizarre game in the middle of a huge circle, beer tents, old chaps in blazers and gaudy ties who used to wear white trousers but are now,

because of their fondness for beer tents, too fat and lazy to play the game and prefer, instead, to pontificate at length about how much better 'the game' used to be. Oh, and don't forget the beer tent.

Magic aside, though, the mechanics of the game are fairly straightforward. A bloke chucks a ball, a bloke hits the ball with a stick, a bloke catches the ball. It's all down to timing, co-ordination, skill and luck – just the things you need for a good game. But for some reason it seems to have been really difficult to get all these things together in a decent cricket sim. Until now.

My first game was England (me) against India (the machine). You can choose any of the international teams and each has a squad made up of current players (there's also a team of cricket legends). There are statistics for all the players and they do affect their performance in the game. There's also the facility to create your own players.

So, I had the machine pick my best 11 players (rather than picking my own team, which was the other option) and off we went. England won the toss (quite neat graphics) and elected to bat. At the end of the first over England were one for five (quite realistic, really).

Your batsman has eight strokes in his playing armoury controlled by moving the joystick at the appropriate moment. Judging the stroke to play and the moment to play it is, as in the real game, the key to batting success.

By the end of the fifth over England were all out for nine runs and there wasn't

even the hope of rain stopping play.

Maybe we'd have more luck fielding. You can set your field (with a pop-down menu) and then select the point at which the ball will pitch. Now choose your spin direction – for the spinners – and waggle your joystick to control either pace or spin.

By the time play was halted by switching off the machine and going home, India were 156 for one and I couldn't bear the fake steel drum music any more.

As I practised, I did, of course, improve. And, as I improved, I found that I was really beginning to enjoy myself. As a two-player game it's great fun (as these things always are) but if you're on your own you'd have to stick at it for a while to get anything from it. If you do, though, you'll find it quite entertaining.

● **TIM NORRIS**

UPPERS It's definitely the best cricket sim so far. The graphics are extremely neat and the control system is comprehensive without being confusing.

DOWNERS It sounds awful (the applause sounds like a toilet flushing) and it can be just too damn difficult to be fun as a one-player game. If only the computer would make a few mistakes.

THE BOTTOM LINE

If you're a cricket fan, you'll certainly enjoy it despite its limitations, but it's not a game that'll grab everyone.

THE BOTTOM LINE

Well, it all looks and plays pretty much the same except that the computer itself is somehow whiter and more expensive.

80 PERCENT

TOM LANDRY STRATEGY FOOTBALL

It's just like watching the real thing on Channel 4. And do you miss the pop music and presenters? No.

More plays than a year at drama school!

simulation, so it's well worth keeping them on, just to remind you that it's American Football you're playing and not chess.

John Madden is the best American Football game you can buy, but it's a little unfair to compare it with this because the two games have very different styles of gameplay. Having said that, *Madden* has a good strategy element as well as the chance to get yourself playing the game arcade style. I'd

recommend *Madden* first, but if you're a complete American Football nut, this comes next. It really does give you the feel of the game, and battling wits against an opposing coach is incredibly absorbing. Unfortunately, you can't customise the teams and put your own name in as manager, which I personally would have liked. And there's no option to call an 'audible' at the line of scrimmage, so once

you've called a play, you're stuck with it.

For the non-fan, I'm not so sure. It's certainly a great way to introduce yourself to the game, as it gives you all the information you need and there are help menus available too. But, if you like strategy games, well, that's exactly what this is, and you may find you like it. And as for me – I'll be playing it for ages.

Game: Tom Landry Strategy Football
Publisher: Merit Software
Authors: Kerry Batts, Allen Mitchell, Dewayne and Eric Fletcher, Rob Wallace and Tom Landry
Price: £44.99
Release: Out now

Now here's a subject I could witter on about for hours if anyone would be bothered to listen. American Football – I love it. Beneath the surface of glamour and violence, American Football is actually an extremely tactical game. It takes place as a series of plays, with each team trying to outwit its opponents with clever formations and tactics. *Tom Landry Strategy Football* is a simulation of the sport which concentrates entirely on the strategy aspects, without any concessions to arcade action.

Basically, you're the Head Coach and it's up to you to call the plays. You can play the computer or another human (over a modem link if you like), and choose your teams from a list of 28. It would seem that the game doesn't have a licence for the NFL teams,

because the teams are just place names like San Francisco and Dallas. The team colours are pretty accurate though, so you can easily pretend you're in the NFL.

At first there is a baffling array of options, but it doesn't take long to get stuck into the proper game. Whether you're 'Defense' or 'Offense', you get an extremely comprehensive array of plays to choose from. Once you've come up with your formations and plays, you can either watch the play acted out in animation or just see the result of the tangle. The animations are full-screen, and are about the best I've seen in any management

"You can easily pretend you're in the NFL"

23.2% of the public believes that there's too many statistics in American Football. About 36% too many, to be precise.

And here's Mr Landry himself, a generous hat-wearing gent who can only talk in capitals. It's actually his own personal 'Strategy Football' that you chuck around.

UPPERS Excellent American Football strategy game, with all the facts, figures, and stats you could possibly want. The animations are really very good for this sort of management game, and, all in all, it's a thoroughly absorbing and entertaining experience...

DOWNERS ...if you like American Football. I suppose there's not much here for anyone else, but it certainly might convert the uninitiated to this mighty sport. Lack of a proper league system is a bit disappointing (you have to play all the league games yourself if you want to simulate a typical season), and there's no Super Bowl or playoffs to aim for. 45 quid's EXTREMELY expensive too. It's also a real downer that the Miami Dolphins got beaten in the AFC championship by Buffalo earlier this year, but that's got nothing to do with this game.

THE BOTTOM LINE

I love it, but I may be in a minority. At £45 it's far too expensive, and if you're looking for an American Football game, *John Madden's* is still the first choice. Despite all that, if American Football fascinates you, this will too.

THE BOTTOM LINE

Totally compatible, with slightly faster responses and animations – as you might expect. It still plays exactly the same though, so no big surprises there.

Game: Cohort 2
Publisher: Impressions
Authors: Edward Grabowski, Andrew Prime, Jeffrey Von Brakenton
Price: £29.99
Release: Out now

Put your feet up, stick on your favourite Garfield slippers and give out a huge sigh of relief, Mr Jonathan Davies, 'cos your wargaming days could well be numbered. It's a particularly well-hidden fact here on AP that Jonathan isn't actually the huge wargame fan we make him out to be – it's just that up to now, the regular staff writers hated, loathed and despised most wargames with the sort of venom and antipathy generally reserved for cabinet ministers. But not any more though: enter stage left Cam "Way back in the 'Nam" Winstanley, the guy who's proud to admit that he likes guns, the guy who spent three years at college blowing things up and filming them, the guy who genuinely DOES love the smell of napalm in the mornings. (Okay, so it's all hype, but I reckon that building a 'larger than life' magazine persona is one of the many facets of the job. I mean look at Stuart, he's got size 6 shoes but his ego's a 13 at least. But I digress.)

Although it's a game in itself, *Cohort 2* can be linked with *Caesar*, to form a sort of all-encompassing Roman extravaganza experience, only minus the lions and the being-graphically-unpleasant-to-Christians bits. Apparently, it's also (and I quote from

the box) "a more than worthy successor to the original *Cohort*". Blimey, I think it has to be a Good Thing that I never saw the original without all the 'enhanced' features.

The idea behind the game is to create a table-top battle on a computer, which is a concept that I can definitely get my head around. Many were the weekends I spent during my teenage years, crammed into the spare bedroom with my mates, moving little legions of Orks and Goblins and Elven miniatures across a large expanse of green felt and rolling entire helmetfuls of dice to decide the outcome of each conflict.

So: why doesn't *Cohort 2* impress me then? Well, for a start there's no two-player option that would let you mash your mates, leaving you completely in the solitary world of Lonelygamer, Nofriendsville. Secondly, even though there are eight different terrains, they're all pretty similar, and once you've got two armies wedged in, there isn't very much room for manoeuvring, or tactics, or anything that makes wargames such a pleasure for those who prefer a more cerebral form of entertainment than pressing the fire button.

The control system's mercifully user-friendly: all you have to do is click on a unit, then tell them which way to face, where to move to, and how fast, and they're off. The action freezes whenever you give orders, so there's no pressure to react to the battle in real time. However, once you've moved your troops near the enemy, things rapidly get confusing, and any semblance of order goes out the window as the entire battle regresses to something resembling your average European Cup Quarter Final terrace brawl.

This isn't fun, or interesting, or anything really.

"Something resembling your average terrace brawl"

Good evening sports fans – and welcome to the biggest, bloodiest battle of AD122.

And here's our team, lead by Noxious Vapus. Look at that incredible line discipline.

And they're off! Flanking round the barbarians is a fine move when the fists really start to fly.

It's man on man in this battle of two halves, as they hack and slash for 90 minutes.

Ten minutes into the fray and... er... I really don't have a clue what's going on. Anyone, anyone?

We'll get back to you on the outcome of this one later.

Clockwise from top left: firing squads, formation dancing and cross-dressing modes.

Arrows have a tendency to change direction mid-flight and then not injure anyone anyway.

A typical example of your average battle ending up as one big ruck.

COHORT 2

Where did Caesar keep his armies? Well, on his floppies, if this Roman battle wargame is to be entirely believed.

UPPERS A user-friendly control system, and it's remarkably easy to get into. The horse-whinnying, sword-clashing, battle noises are kind of atmospheric too.

DOWNERS It's possible to win a battle without giving a single order, which certainly brings the tactical value of the game into question. Too few terrains, too limited scope for tactics, too much like a school playground ruck simulation.

THE BOTTOM LINE

Probably a fair representation of how battles were fought way back when back. However, manoeuvring your units for a few minutes before the whole thing dissolves into a confusing scrap isn't much fun, and, it must be said, doesn't really bring out the Julius in you. Only worth considering if you want it as an expansion for *Caesar*.

THE BOTTOM LINE

A1200 Well, it seems to run slightly faster on the 1200, but (typically) this doesn't make any big difference to the gameplay.

52 PERCENT

Loads of extra courses for the race that keeps on running...

THE HUMANS - JURASSIC LEVELS

Passing the time was always a great problem for cavemen...

But standing on each other proved to be a rewarding pastime.

Does anyone remember the dismal 80s movie *Breakdance 2 - Electric Boogaloo*?

Game: The Humans - Jurassic Levels
Publisher: Mirage
Authors: Dave Lincoln, Rod Humble
Price: £29.99 stand alone, or £19.99 data disks
Release: Out now

You like statistics? I'll give you statistics. Slam in the first of the three disks you get with *The Humans - Jurassic Levels*, and you'll be forced to endure eight different intro screens telling you how good Mirage is, how

good the game is, how wonderful Imagitec are, how funny *Humans* is, and so on. Three disk changes and almost eight minutes after you decided to have a quick game, you finally get to play. In the same time, you could cower in terror at two separate nuclear missile attacks, write this much of a review or even cook a couple of soft boiled eggs. One after the other.

Not the ideal prerequisites to get me in the mood to play a game, but even after this hassle, I was initially still really

into the idea of

Humans. I'd seen all manner of screen shots and read the sort of press release stuff that said "It's just so much better than *Lemmings*". However, as Flavor Flav from Public Enemy once put it so succinctly, don't believe the hype.

The *Jurassic Levels* isn't *Humans 2* (which is due out later this year) but another 80 levels using the original system, hence the stand alone or data disk options. Seeing as I never played *Humans*, I can't really comment on how this compares, but the scenery and character graphics really are impressive

and impossible-to-fault throughout, with the cavemen going through all the actions necessary for evolution in a cheery and well-presented manner.

You've got to complete various tasks such as discovering fire and rescuing fellow tribe members, and along the way, your quest is aided by spears, ropes, stone wheels and even witch doctors. The trick is to get the right piece of equipment in the right place so that the Humans can clamber all over the level to their goal.

This is a great idea, with the comic cavemen looking good, and the puzzle-filled gameplay giving you something to get your synapses into. The game comes apart when you get into the mechanics of it. To lower a rope over a cliff, for example, the Human has to be right over the edge, or the rope won't go all the way down. Unfortunately, if you go over by so much as a pixel, you end up with one splatted caveman which means a decreased chance of finishing the level.

Another supposedly simple task is getting the boys to form a tower. You do this so often that there really should be an icon to do it automatically, but instead you have to click on each one and move them into the formation, then take them all down again afterwards. All this is a bit tiresome, and it wound me up so much, I was forced to flick elastic bands at Lisa until she started crying and I felt bad about it. Not really one to recommend, I'm afraid.

● MARK WINSTANLEY

UPPERS Great graphics, funny little characters, bongo drum-tastic effects, and lots of thought needed. Oh yeah, and you get some neat cardboard puzzles included free.

DOWNERS How many different intro screens does any game need? About half a dozen less than this one, I'd imagine. Instant death by placing humans one pixel too close to the edge results in many a rude word shouted. Takes ages to achieve anything, which is heartbreaking when you mess up. Tedious disk swapping too.

THE BOTTOM LINE

What's all the fuss about? It's inevitable that this kind of save-'em-up will tend to get mentioned in the same breath as *Lemmings*, but the fast and furious puzzler element just isn't there. Lurking in its place is the ability to make you feel little or no enjoyment in the game. Playing more than three levels at a time seems like a chore.

THE BOTTOM LINE

A1200 Not 1200-compatible, just like the original *Humans*. Sorry!

I am, the pun in this game's sub-title ("Starring Dim Passengers") is, of course, a Kim Basinger gag. Yeah, I know, it looks obvious written down, but it completely eluded me for days, so I thought I'd save you the head-scratching.

Get past the awful jokes (the hero of this aquatically-themed game is called Kevin – oh be still my aching sides – Codner), and you find that *Sink Or Swim* is a platform-based puzzle game with a number of distinct similarities to *Krusty's Super Fun House*. You're a trouble-shooter on board a sinking passenger liner, and you have to save the 'Dim Passengers' of the title by guiding them through escape

hatches to safety. (Obviously. They'd be pretty crap escape hatches if they led to a tank full of piranha fish, or something.) To help and hinder you, there're various items and

"But there's a flying fish in the ointment"

bits of machinery to negotiate or manipulate, and the whole thing takes place over 60 levels of (obviously) increasing difficulty.

So far so peachy, then, but there's a flying fish in the ointment. Your character (I refuse point blank to use that terrible, terrible name) moves in blocks, rather than pixels. That is to say, graphically he

moves in pixels, but one move of the joystick moves him several

pixels at a time. What this means in practice is that

when, say, you're climbing a ladder, the slightest twitch of the stick to the left or right will make the character walk unstoppably off the side of the ladder and fall to the bottom again. Now,

considering this is a game which calls for some fairly speedy

manoeuvring around the screen once you get past the first few levels, that's a flaw which isn't just irritating, but utterly wall-nuttingly infuriating.

The controls in general are really skittish and over-responsive – just a little bit of calming down would have resulted in a lovely, playable feel, but the way it is at the moment you simply haven't got a chance after level ten or thereabouts

– well, not unless take the rather extreme measure of soldering up the diagonals on your joystick.

This is so close to being a really nice platform puzzler that it hurts – the difficulty curve's good, there's just the right number of elements to manipulate to stop it getting too repetitive (and each new one gets introduced with a nice simple 'teaching' level), and the actual puzzles are well designed. It could be better than *Krusty's Super Fun House*, but the sloppy and infuriating controls all but scupper it. When it comes to the crunch, the puzzles themselves are hard enough without your character leaping all over the place of his own volition.

● **STUART CAMPBELL**

UPPERS Lots of levels, looks nice, a bit more variation than the average puzzler. The intro music is very Jean-Michel-Jarre-ish, but despite that it's pleasantly mellow, and some of the in-game sound is excellent too.

DOWNERS The imprecise control is really annoying, and having passwords after every level means it won't take you forever to play through to the end.

THE BOTTOM LINE

A sweet enough platformy puzzler, but in all honesty, the way it stands it's a budget game at full price. After *Lemmings 2*, the puzzle game goalposts have been shifted, and this attempt just isn't up to the price tag any more.

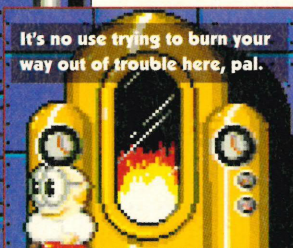

THE BOTTOM LINE

The game's a downright change-free zone on the big 12. No obvious differences to report.

BUDGET

Come on down to the budget pages, where the price is right, the beat is fresh, and much general cheapness abounds. We've reviewed so many criminally low-price games this month that we're practically illegal. And that's true.

METAL MUTANTS

Publisher: Daze
Price: £9.99
Release: Out now

I have a problem. No, not that one – the extensive course of psychotherapy took care of that a while ago. As a matter of fact, my problem concerns this game. You see, I know that it's crap, but for the last few days I've been regularly loading it up and trying to get further than the last time. The thing is, I've been going through a bit of an identity crisis this last week, as well as losing a fair amount of sleep over all the usual unsolvable mysteries of the cosmos and the ultimate futility of man's place in the universe, and... (Tim, please get on with the review. – Ed).

It's this sort of horizontally-scrolling robot beat-'em-up – although it doesn't scroll, it jumps from screen to screen when

Just like Transformers™, *Metal Mutants* are robots in disguise. As dinosaurs.

you reach the edge (Dizzy-style) which I hate. Your character can morph between being an ordinary common-or-garden cyborg, a robotised dinosaur (you've got to see it to believe it) and a tank-type-thing with laser guns. Each of your three alternative characters has different abilities, and each one is best suited to dealing with a particular sort of menace. For example, the bees can only be destroyed by the robo-dinosaur's fiery breath, while their nest has to be shot down by the tank-type-thing.

I suppose you could say this adds a puzzle element to the action, and indeed there are puzzles of sorts to solve, so I guess it's not as completely mindless as I first suggested. The controls are fairly flexible, but some of the fights are hardly exciting – the robo-dino biting swamp reptiles on the shoulder is hilarious the first few times, but it soon gets boring.

LEGEND

Publisher: Mindscape
Price: £14.99
Release: Out now

Cast your mind back through the mists of history, to the Dark Ages, the Lost Era. A time when the Youngers regularly met in the flickering gloom to gather around the ancient map. A time of 12- and 24-sided dice, of miniature figurines called things like orcs and hobbits which were lovingly hand-painted by their owners. A time when your Mum made the tea for everyone who turned up.

Yeah, there was a lot more to Fantasy Role-Playing Games in those days. You all had to sit around in a circle, and it was fraught with real danger, like the constant threat of tea being spilt all over the graph paper, or somebody at school finding out that you were playing Dungeons And Dragons and laughing mercilessly at you all the way through puberty.

Then computer role-playing games were invented and, not long after, computers themselves inevitably arrived on the scene (I think it was that way around). *Legend* (the game under consideration here, in case you've forgotten) is of this genre, but avoids being like anything else you've seen,

which is just one of the reasons why it's so darn groovy.

The perspective's unusual for an RPG, being an isometric 3D view of the action (although anyone who's seen *Hero Quest* will find the look eerily familiar). I'll dispense with the plot, only to say that it's all about the struggle between good and evil in a world driven mad by the dreams of

chaos (I've always wanted to say that), and you control a team of four travellers whose mission is to vanquish this evil. It's a big game. You have a land map to travel around, which can result in impromptu tussles with evil hordes, dungeons to explore, towns

...but the tiled bathroom is warm and cosy.

to investigate, ancients to meet and exchange runes with – it's all here.

The control system is very smooth and easy to work with. The characters react intelligently, fight sequences are actually entertaining, there's lots to discover and plenty of brain-numbing puzzles to solve. And gone is the need for graph paper, 'cos there's a mapping facility on screen.

Okay, but there's a couple of niggles. First, why do we have to put up with all these statistics? It can take half a day to work out what sort of state your character's in by comparing his hit points with his armour class, strength, constitution, luck and all that wibble. Is he close to death or what? – that's all we need to know. Second, the over-complex spell system. There are a lot of runes to learn in spell casting, so why does the Damage rune look like the letter S and Teleport have a strong resemblance to an R? It just means that it takes that much longer to learn the system, which isn't fun when you've got foul unmentionable demons from the gates of hell bearing down on you.

But these are minor points and don't detract too much from this otherwise fab and gripping game. On budget it's a bargain, so if you think you've seen everything the RPG can offer, give this a try. You can't go wrong.

● TIM TUCKER

THE BOTTOM LINE

Here's a bottom line for you – it's only fifteen quid (all games should be this price), it'll last you ages, and it's great. So buy it.

88 PERCENT

Graphically, it seems to consist of about four colours (green, light green, dark green and red), and quite honestly looks dreadful. The sounds are bog-standard (*Excellent swamp-based pun there, Tim. - Ed*) and the gameplay is minimal and predictable. Like I said, I have a problem, in that I have been enjoying this for the last couple of days. But I know for a fact that, even at ten quid, if I recommend this I'm gonna get lynched. It clearly lacks all the things that make a game great, or even good for that matter. So I'll have to put my mild addiction down to mental illness. Yes, that must be it.

● **TIM TUCKER**

THE BOTTOM LINE

Crap really, but it has a certain charm (the dinosaur's gait is pure comedy), and it kept me playing for a while. I can't recommend it, but it does have something to offer (like, maybe if you're really stupidly rich) and it is only ten quid.

52 PERCENT

KNIGHTMARE

Publisher: Mindscape

Price: £14.99

Release: Out now

In the world of Fantasy Role-Playing Games there are two things which have a lot to answer for. The first is J R R Tolkien, who wrote some great books but is also

The dungeon is ready blah blah Helmet of Justice blah blah falsehood blah blah truth accepted. And so on.

directly responsible for some dire derivative rubbish. The other is *Dungeon Master*, the first computer FRPG with an easy-to-use graphic control system, and a cracking good game to boot.

Knightmare is a game that owes a lot to *Dungeon Master*. The control system is practically identical (although the graphics have a slightly different feel to them), the fighting system's similar, object manipulation is the same, and even the way that you encounter the bad guys is straight out of *DM's* book.

This is no bad thing if the result is a good game, and in this case I'm happy to say it is. You control a party of four adventurers, which you can choose before you start the game, and there are some interesting variations on the usual stock fantasy characters, including a Genie, Ghoul and Insectole (whatever that is). You have four different dungeons to explore in order to complete

your quests, which involve retrieving a shield, a cup, a sword and a crown.

There's plenty of atmosphere, loads of fighting and puzzling to be done, and with four fair-sized quests you should be kept busy for quite some time. Some of the fights are a bit irritating, especially if you lose a party member and are forced to either re-trace your steps to the life regenerator or load up a saved game, but it's not enough to deter you from playing the game. If you're hungry for a good RPG, this is a great bargain.

● **TIM TUCKER**

THE BOTTOM LINE

After *Legends of Valour*, games like this are starting to look a little out of date, but this is still a good game that's worthy of your attention. If you're new to the genre, try *Eye of the Beholder 2* and *Dungeon Master* first, but if you've been all through them and are looking for more, try *Knightmare* for size.

MOONSTONE - A HARD DAY'S KNIGHT

Bright purple is still regarded as a fashion mistake.

Publisher: Mindscape

Authors: Anderson Art Studios

Price: £14.99

Release: Out now

If there's one thing guaranteed to warm the cockles of the heart of this particular writer, it's a game (like this one) that includes the option 'gore on/off'. This presumably means that someone in the marketing department was worried by the programmers' bizarre and borderline

some far-off ancient kingdom. The time of the Moonstone is upon this land, and four knights, one from each corner of the kingdom, set off to find the four keys that'll enable one lucky contender to enter the Valley of the Gods, where he'll have the privilege of being torn limb from limb by a huge and scary Guardian. Assuming you can crawl away from this conflict victoriously clutching the Moonstone, it's just a quick hobble to Stonehenge where the druids will thank you kindly, grab the stone and then tell you to leave them alone, in a 'game over' kind of way.

As with most games, indeed as with life, there are a number of

obstacles to overcome before you gain this grudging gratitude. For a start, the keys are guarded by all manner of entertaining monsters, the other knights are out to get you, and there's even the option of losing all your cash in some sort of moon-related dice game. You move your knight across the main map, which shows the four terrains making up the kingdom. Whenever you encounter another knight, or a monster's lair, then hurrah! It's fight time.

It's probably just a little sad to admit it, but what makes the fight scenes so much fun is the amount of blood spilt. It jets through the air, flows from gaping stomach wounds and gathers in huge puddles on the ground. Baloks jump on you, bursting you like a ripe watermelon, wild

unicorn dogs gore you, and nasty Troggs run you through with spears and then dangle the dripping corpse several feet off the ground. It's all done in such an over-the-top way that it's impossible to (a) take it seriously, and

Summer yellows (as worn by both models here) are now back in.

(b) not to think of Monty Python and the Holy Grail.

Moonstone... is pretty much a hack-and-slash game with a quest thrown in but, with four players, you have the added option of waiting until they kill the monsters, then mugging them for all their money, with which you can buy better armour and weapons in the cities. The trading's quick and easy, and leaves plenty of time left for hacking things up. And that, I think, is where I came in.

● **MARK WINSTANLEY**

Loose-fitting scarfs go well with the 'outdoor' look.

Gavin's tunic is smart but practical, allowing full freedom of movement.

THE BOTTOM LINE

Moonstone... straddles the area between beat-'em-up and adventure, and produces fair versions of both. You can probably finish it in a few days, but that doesn't really matter, since the adventure aspect's a bit lame anyway, and just an excuse to trash some bad guys. The disk accessing's intrusive at times, but robbing your friends gives the game long-term appeal.

74 PERCENT

EDD THE DUCK 2 - BACK WITH A QUACK

Publisher: Zeppelin
Price: £7.99
Release: Out now

Look, what the hell's going on here? It's not as if we expect very much from budget games in the way of plot depth or character exploration, but this is just insulting. On the crappy little bit of folded paper that accompanies the disk, you get a couple of paragraphs of insipid puns about a Wild West saloon. Then there's a little diagram of what the joystick does. And that's it. Like, sorry if I'm being picky here, but WHAT ARE WE SUPPOSED TO BE ACTUALLY SODDING WELL DOING?

Looking to the game for help proves equally fruitless - it throws you straight into the (and I use this term loosely) action, which is stodgy, slightly-animated, almost-soundless scrolling platformy stuff where you throw custard pies at some baddies. Reaching the exit of the first level

The generally less-than-wonderful Mr Edd.

is easy, but you can't go out of it until, experimenting, you pick up a brown lump that might be a hat of some sort. Or it might not. Whichever, why it lets you go through the exit is never satisfactorily explored. Level two brings you, er, some more of exactly the same, ie more pitiful dross against a strikingly similar backdrop, and proceedings continue in the same vein for as long as you can stand it - in my case, about four minutes.

Really, I can't imagine how anyone, having secured such an, er, prestigious licence, could have written a game to go with it in a more desultory, slapdash, shoddy manner. I know it's only eight quid and all that, but I haven't seen a game this awful in a very long time. I'd rather spend the rest of my life locked in a room with Andi Peters and all the presenters of The Disney Club than play it again.

● **STUART CAMPBELL**

THE BOTTOM LINE

Astonishingly rudimentary platformer that, remarkably, somehow manages to be even worse than the first *Edd The Duck* game. *Back With A Quack* makes the language that we're allowed to use in a family magazine seem woefully inadequate, and gets 3 percent for the quite-nice intro music and screen.

3 PERCENT

THE GREATEST

Title: The Greatest
Publisher: Beau Jolly
Price: £29.99
Release: Out now

Compilation time again, folks. This time we're looking at *Dune*, *Lure Of The Temptress* and *Jimmy White's Whirlwind Snooker*, a trio of Virgin titles of varying vintage, on release again not from Virgin, oddly enough, but from budget maestros Beau Jolly. It's a cerebral kind of pack, with even the token 'arcade' offering being a game that calls for a fair amount of thought-power, and at ten quid a game it's a little more demandingly-priced than the usual compilation. But, hey, let's not complain - two of the titles here are less than ten months old, all three are still performing pretty impressively in the charts, and all three were originally 30-quid games, so you're hardly getting ripped off. Still, enough of that. What you really want, I know, is a little mini-review of each game in the pack followed by a dinky summing-up paragraph, so let's go.

Jimmy White's Whirlwind Snooker is a 3D, every-way-scrolling and zoomy-in-and-outy snooker game. It's got some great sound effects in it that Archer Maclean made by rubbing two balloons together (no, really), and if you were to have a really wild dream in which you imagined the best computer snooker game possible, it still wouldn't be any better than this one.

Lure Of The Temptress is my personal favourite so far of all the 'Monkey Island-ish' adventures that we've seen such a bundle of recently. It's got a lovely, dingy atmosphere and (it seems to me at least, although these things are kind of subjective) less intrusive disk-swapping and accessing than most in the genre.

Lastly, but only leastly in the sense that it's very slightly less good than the two other very good games on the collection, there's *Dune*. Manfully resisting the temptation to

Rounding off the afternoon, it's fancy-dress sumo wrestling.

THE PLAGUE

Publisher: Global Software
Price: £7.99
Release: Out now

I'm desperately searching for something, anything, nice to say about *The Plague*, so that this review'll start on a high point and you'll have to read all the way through it to work out whether the game's worth buying or not. I think I've finally got one, so here goes. *The Plague* is the first game I've ever seen where you can actually sign your name when you get into the high score table. Like, I bet that one's got you scrabbling for your £8 and heading for the shops right now, hasn't it?

Dropping any pretence of storyline, the flimsy leaflet makes things quite clear with its concise instructions to "destroy everything that moves". So, even the

Always look on the bright side of life...

novice games player browsing through the latest releases down at his local 'Platformers R Us' megastore could deduce that the elements of strategy and planning are kind of non-existent in this title. Add to this list enjoyment, addiction, good graphics, superior stereo sound and any reason to play the game more than three times (other than a rabid programmer with a large gun up your left nostril, which is the only one I can think of) and you're getting a fuller picture of just how far from my heart this game is.

At 2pm we've got snooker, live from the Crucible in Sheffield...

...followed by freestyle Temptress-Luring at 3.

turn a film licence into a multi-level scrolling platform game, Virgin came up with an inventive strategy/adventure/wargame affair which, nonetheless, was apparently most remarkable (well, according to our original review by Dave Golder) for featuring a character who looked like Francesca Annis. Dave's hormones aside, though, this is a well smart game which'll keep you engrossed for more than a tenner's worth of time for sure.

All of which leads to the inescapable conclusion that this is the summing-up paragraph, and far be it from me to buck tradition. For ten quid each, all of these games have to be seen as extremely good deals. In fact, even if you've already got one, 15 quid apiece for the other two is still way short of unattractive. *The Greatest* is a compilation oddly bereft of the usual obligatory turkeys, and for that novelty value alone it's worth a buy. And for the three great games too, of course.

● **STUART CAMPBELL**

THE BOTTOM LINE

Top-quality compilation of largely recent and still-popular games for the more thoughtful gamer. If you've ever had a thought of any kind at any time in your life, you'll do well with this compilation.

85 PERCENT

Gameplay goes like so - badly animated barbarian runs from left to right, shooting things. Bizarre backgrounds struggle vainly to conjure up an image of the world laid to waste by genetic mutation, while weak bloopy noises limp out of the speakers. Lizard men get shot, bubbles and lava pits kill you and you rapidly wish you were somewhere else. *The Plague*? I'd rather have tetanus.

● **MARK WINSTANLEY**

THE BOTTOM LINE

Anyone who'd been encased in carbonite for the last thirty years and saw this couldn't help but be impressed at the extraordinary progress of computer technology. The rest of us should kick sand in the face of this game and then steal its bike. Top entertainment for the chronically bed-ridden.

THE SIMPSONS – BART VS THE SPACE MUTANTS

Game: The Simpsons – Bart vs The Space Mutants
Publisher: The Hit Squad
Price: £9.99
Release: Out now

With the other Simpsons games still dragging their heels (seen *Krusty's Super Fun House* or *Bart vs The World* in a software shop near you recently? Thought not. What on Earth are Acclaim playing at?), the re-release of this first adventure of the spiky little yellow dude is a welcome sight for all of us post-modernist sociological satire fans. *Bart vs The Space Mutants* is a straight conversion of a game which you can now buy on pretty much every format from the Game Gear upwards, but which originated on the clunky old 8-bit NES.

Yes, that's right, the NES – an ultra-primitive piece of kit with hardly

any colours, a deep reluctance to display more than about three sprites at any one time, sub-Spectrum sound and a general level of sexiness on a par with Bernard Manning in a bucket of sick. NES games, as you might expect, are very rarely anything to write home about. The Amiga version of *Bart vs The Space Mutants* is, save for a slight tidying-up of the graphics and marginally brighter colours, exactly the same as the NES game. You might also expect, then, that it'd be rubbish. Sorry, folks. Wrong again.

This is a smashing little game, for an unconvincing-sounding collection of reasons which I'm about to try to outline. For a start, it's bloody hard. It's a good deal less obvious than it first

seems, with a fair scattering of puzzles that still regularly manage to stump Last Resort correspondents to this day, and the puzzle aspect is married to platform-leaping requirements as strict

(in its way) as, ooh, *Prince Of Persia*. It's only five levels long, but they're fearsomely big ones and every inch of progress is hard-won.

It all feels very Bart-y too, which is odd considering that there's very little of what you could term Bart's World in it. Somehow, though, you really do get the impression that you're wandering around Springfield. I think it's probably the big solid blocks of primary colours and the simple sprites that do it – the true art of cartoonery, after all, isn't

just drawing fluffy things with big eyes. It's giving an impression of something that's loose and ambiguous enough for you to impose your own imagination on it, hence allowing yourself to relate to and be drawn into the cartoon's universe, and that's something this game does expertly. Still, that's going a little deeper than I'm paid for, so let's get back to the game.

Bart vs The Space Mutants has a plot so ridiculous that it's a stroke of genius, presentation so cursory that it feels like a new version of *Workbench* rather than a front end, sticky controls that take half a day to come to terms with properly and graphics that your little sister could knock up with *DPaint* in half an afternoon. It's also a game that I've been playing on and off on my NES and Amiga for well over a year now, and I've still only just managed to scratch the fifth level. Normally I've got as much patience as a man with only half a pack of cards, but I keep on playing this, and that's got to count for something. Or maybe it doesn't. But hey – that's enough philosophy.

● **STUART CAMPBELL**

THE BOTTOM LINE

Uncomplicated but much more demanding than you might think, you really shouldn't let the fact that this is a conversion of an NES game put you off buying one of the Amiga's better character licences.

DOC CROC'S OUTRAGEOUS ADVENTURES

Publisher: Zeppelin
Price: £7.99
Release: Out now

If you didn't have us lot at AP to aid you in buying games and just went for the ones that looked interesting, I reckon you'd end up disappointed a lot of the time. Here's a case in point. Stuart rather kindly let me choose the budget games I wanted to review this month, and after looking at the plot lines and screen shots I chose this as one of them. I thought it looked wacky, different and refreshing.

Basically if I'd have been in a shop clutching eight quid, this is the one I would have gone for. Let's see how it strikes you. A video printing press has been invented, but has been accidentally blown up by Doc Croc, blasting the latest edition of the comic he works on all over the sewers. There are four characters which you

It's just like *Have I Got News For You*. With crocodiles. In a sewer.

control around the sewers to pick up the bits of the video printing press and the pages of the comic and bring back the joke punchlines.

You choose the character you want to control from the Doc's office, then choose one of the four drains they can enter. From then on it's 8-bit-style platform antics all the way, with the emphasis on jumping and avoiding things. If you find that character's comic page you can enter the page and play a little sub-game to get to the punchline jokes. If you find another

character's comic page, remember where it is and on the next go send that character to get the punchline. (*If all this sounds familiar, it's because it's all based on the old kiddies' TV show Round The Bend. In fact, the game was a Round The Bend licence in its 8-bit incarnation, but now, probably because the show's not on any more, it's*

got a new name. Shame they didn't change the title screen, though. Okay, Tim, all yours again. – Ed)

There's a time limit to do it all in, of course, and finding a punchline increases the time left to complete the task. See? It sounds great, doesn't it? Unfortunately, it doesn't live up to its promise. One of the most irritating factors is that if you get hit by anything you're immediately sent back to the office, which is more than a bit annoying when you're just getting the hang of one of the drains.

The graphics have a very 8-bit look to them, which isn't too shabby but definitely could be better. Probably the worst thing about the game, though, is that you never feel rewarded for your efforts, I guess until you've finished the game (which I haven't). Okay, so you might find a few pages, but half the time you're using the wrong character so you can't do anything with them. The levels get easier with familiarity, but can still be annoyingly tricky, and before you know it time's up and the game's over, and you feel like you've achieved nothing. Most of us play games to get some sort of feeling of satisfaction, even if it is from the complete annihilation of a species, so I can't see this one being on anyone's playlist for long.

● **TIM TUCKER**

THE BOTTOM LINE

Not terrible, just disappointing. Great plot, and yes, a refreshing variation on the standard platform fare, but still it's too frustrating to be fun. Please – somebody take the idea and do it properly.

ROBIN HOOD - LEGEND QUEST

Publisher: Code Masters
Price: £7.99
Release: Out now

Okay, let's kick off with a quick joke:
Q: Where does Robin Hood buy his
flowers?
A: Sherwood Florist!

Okay, let's get on with the review.
I've got a problem with my Amiga at home
- I have to fight to get a go on it. It's very
popular in my house is our Amiga,
especially when *Stack Up's* in the drive. I
tried to play *Robin Hood - Legend Quest*
over a weekend at home, I carefully
unpacked it and, in my excitement, I
accidentally knelt on the cellophane
wrapping just as I slipped the disk into the
drive. My brother (visiting for the weekend)
came rushing in, grabbed the joystick from
me and started playing.

I tried to recover the joystick, but I
was thwarted at every turn. "Look, I've got
to review that. Let me have a go."

"No, I'm doing
really well here. It's a
shame it's not in colour
(you really should get
that telly fixed, you
know), but it's a nice
little platformer."

"It's not that good,
look at the way Robin
Hood's animated, he
moves like some sort of
wooden puppet."

"Well, okay, he
doesn't exactly glide
along and he does look
a bit awkward when he
bends down. But that's

cos he's so big, it'd be a lot better if he
was smaller. I think you should give it a
good review. It's really hard too, but watch!
I'll show you where I can get up to. First
I've got to collect all the keys, jump on all
the chests and avoid all the arrows. It's
like most things in life, just watch your step
- take things one at a time and you'll be
okay. Right, now this is the bit I can't do.
Gently does it... ah... oh damn. It's
impossible, I can't do it. You try."

At last! Right, this is fine... dum de
dum de dum... aha, it's the difficult bit, I
bet I can do it. Okay, here goes... damn.

A whole two hours later and the
Barker household still hasn't got past that
tricky bit that's just ten minutes into the
game. Maybe we should have persevered,
but somebody put *Stack Up* in the drive
and we forgot all about poor Robin.

● LINDA BARKER

THE BOTTOM LINE

Decent enough platformer in the
Gods, er, tradition (ie it's almost
exactly the same), but too jerky and
not original enough to keep you
interested for more than,
well, the 10 minutes it'll
take you to get to the hard
bit we got stuck at.

LOST DUTCHMAN MINE

Publisher: Global
Software
Price: £7.99
Release: Out now

Moseying into the Lost Dutchman
Computer Exchange and Console Mart
(circa late 1800s) you'd have been most
surprised to discover that, although a copy
of this game currently retails at a tad under
eight quid (that's about 13 bucks), it would
then have set you back an astounding 400
folding greenbacks. Not only that, but
you'd then have to hang around for the
best part of a century to actually play the
durned thing. Downer.

Taking the role of a Wild West
prospector, the idea of this hopelessly sad
and not quite terminal mess is to find the
legendary Lost Dutchman Mine, which has
sort of been, well, lost really. On the way
are all sorts of equally sad sub-sections,
such as the fishing game (too dire to go
into here) and the poker game, which gave
me bizarre ZX Spectrum flashbacks.

BIGNOSE THE CAVEMAN

Game: Bignose the
Caveman
Publisher: Code Masters
Price: £7.99
Release: Out now

At first sight this budget
release from the Codies
looks like a poor man's
Chuck Rock, and after
playing it for a while you realise that's
because it is a poor man's *Chuck
Rock*. But that's not necessarily a bad
thing if you get some good
gameplay for your eight quid (and
let's face it, with some games
putting you back up to £40 in
the middle of a recession,
there's more incentive than
ever to look to the budget
section for your games). So,
let's give it a fair old try.

I have to admit that on
loading this game my first thoughts
were "What a turkey". It looks and
feels like an 8-bit console game - you
know the sort of thing by now, keep
walking right hitting things and
jumping over dangerous chasms, and
in this sense it's incredibly linear.

At the start of the game, your
trusty club is the only weapon that you
have to dispense baddies with, but
there are rocks on the way which you
can pick up and from then on you have
stone-throwing capabilities. That is
until you get hit by a baddie, at which
point you're back to your club again.
There are also bones to pick up which
give you 'bone-us' points (their joke,
not mine), and other pick-ups in the
shape of large rocks
on the ground,
which can be
smashed

"Whereas this chap,
by eating harmful
aphids, is truly the
gardener's friend."

for goodies or booby prizes.

Well, it's hardly breaking new
ground then, but despite my initial
misgivings, it's not all that bad. It's
actually quite addictive, mainly due to
the very simplicity which at first seems
to make it inferior. There's always that
feeling that you could get a bit further
if only you stuck with it, and
consequently time passes and you find
you've been enjoying this game for
quite some time.

Having said that, it's not the kind
of game that's going to get you
massively involved. There's not much

depth to the gameplay, and at some
point I reckon you're going to get
bored with the concept and put it
down. It's not too big either, so even if
you do stick with it I shouldn't think it'd
take you that long to finish, and when
you have you won't come back to it
again. But then, hey, it's eight quid, it's
enjoyable enough, and I guess that
might be just enough to make it a
worthwhile purchase. A mild diversion
rather than a serious distraction.

● TIM TUCKER

THE BOTTOM LINE

There are so many good platformers
about, even on budget, that it's hard
to make this a solid
recommendation. This is the sort of
game that you might flirt with, chat
up and buy a drink, and maybe even
take home for a cup of coffee and a
snog, but wouldn't actually want to
form a deep and meaningful
relationship with. Still, if you go for
it, you can rest assured that it's not
going to have cost you all that much.

appears to have become
mysteriously politically
incorrect. Sorry.)

BATTLE SQUADRON

Game: Battle Squadron
Publisher: Global
Price: £7.99
Release: Out now

Wait a minute. What's going on here? Didn't we do this last month? Ah, no. *Battle Squadron* is the second in a genealogy of four

games notable for their almost total similarity to each other. Starting off about a billion years ago with a game called *Hybris*, the line takes in this game, then *Wings Of Death* (released by Thalion), and finally last month's 70-percent-scoring *Lethal Xcess*. All the games were vertically-scrolling shoot-'em-ups, all of them boasted attractive, metallic graphics, all of them (as far as I can remember) had simultaneous two-player modes, and all of them shared the same power-up system.

What this involves, and off the top of my head it's a system unique to these games, is that there are several power-up paths you can take. When you blast a power-up-yielding baddie, he'll relinquish one of several different kinds of power-up (or a single one which cycles through all the types). If you keep collecting the same type, you'll build up your main weapon to a fearsome degree, but if you get one of a different type, your gun will revert to the lowest level of that type's power and you'll have to start all over again. It's a weird system, and I'm spending so much time going on about it because it has a strange effect on the balance of the game(s).

At first, *Battle Squadron* is off-puttingly hard. The baddies are a little more intelligent than you might be used to (if you don't shoot them when they appear, they'll often come after you, hound you into a corner and waste you, rather than just drift off the bottom of the screen), they're resistant

to more shots than usual, and right from the start they're pretty heavily armed. Consequently, you'll spend most of your first couple of attempts in a ball of flame, and begin to get a little dispirited. Another couple of games in, though, and you'll begin to power up your gun, to a point where most enemies disintegrate at the mere thought of it. Beyond here (and we're

The Enforcer handles well, and is nippy both around town and out on the open road.

only talking about maybe two-thirds of the way through the first level) things get ridiculously easy and hence very boring, unless you

accidentally pick up the wrong power-up or somehow manage to get shot, at which point the game gets totally and utterly impossible again.

Many shoot-'em-ups suffer from this kind of flaw (the baddies at a certain point being designed solely under the impression that by then you'll be powered up to a certain level, with no chance for the player who finds himself in a different situation to drag himself back into contention), but it's precisely the one that sorts out the good shoot-'em-ups from the bad ones, the *SWIVs* from the *Project Xs*. *Battle Squadron* is all technically very fine and everything, and it's undoubtedly one of the better games in a genre strangely short of good ones, but I'm afraid it just doesn't light my candle at all.

● **STUART CAMPBELL**

However, parking can often be a problem, due to the large turning circle.

Is this out on the C64, and if not, why not? The graphics look 8-bit beyond belief, but that still doesn't excuse the gameplay. Keeping fed and watered takes most of the time, but occasionally you can pan for gold in the river, or dig at existing mines. You trade in the gold for money – and let me tell you, you need plenty of it, what

"What's that, Lassie? Billy's trapped in the old mine shaft? And he's got a silly hat?"

with a box of matches weighing in at five dollars, and a loaf of bread an astonishing ten buckeroones. Unbelievable.

Which is a word that pretty much sums up the entire game. There's one last thing – when you die, the game asks you "Play Again?" Be glad you are given this choice. You should answer: "No".

4TH & INCHES

Publisher: Hit Squad

Release: Out now

Many people don't understand American Football. They don't understand the fact that even though the game time is one hour, it actually ends up taking about four. It's all to do with the pace of the sport, you see. Soccer is played over 90 minutes, cricket is often played over a few days, and American Football takes about four hours. But none of this explains why it takes *4th & Inches* an intolerable amount of time to simply take the kickoff, let alone perform a Short Hook passing play with play action fake.

This is slow. So slow that any metaphor would be hopelessly inaccurate. It attempts to offer an arcade American Football game, but ends up as one of the most laughable experiences ever committed to disk. You choose your formations, plays and which player you want to control and then laugh hysterically as what looks like a geriatric morris dance is enacted right before your unbelieving

THE BOTTOM LINE

Eerily similar to *Lethal Xcess*, despite being several years its elder, this is a tough and pretty shoot-'em-up that only really suffers from a lack of character and a bit of a power-up imbalance. Doesn't really compete with *SWIV* or *Sky High Stuntman*, but it's well up there in the League Of Vertically-Scrolling Shoot-'Em-Ups. Not that that's saying a lot.

There's more than just a few problems in this game – it's virtually unplayable. It seems to be incompatible with just about every Amiga I tried it on, for a start – the 500 Plus runs appalling slowly, the 1200 produces some sort of flickering block over the players, and both of these are supposedly supported. The 600 produced the best results, but no matter what computer

For a bit of a change, I'm asking you to look at this picture and guess what happened before it...

Correct, they were all doing up their shoelaces at the same time.

I played it on, it stopped working after the second play and froze up.

Now even if it didn't have this alarmingly inconvenient bug, you wouldn't want to touch this with a bargepole because (a) the animation is simply dreadful, consisting of about two frames of

action, animating at a hideous rate of about one frame per two seconds, (b) the gameplay lacks any excitement due to the agonisingly slow speed of it all, (c) there is never the feeling that your control of the players has any significant consequence in the game, (d) there are only two teams to choose from – All-Pro and Champs (I mean, come on), (e) there's hence nothing resembling a league system, and (f) I could go on forever, but you get the point. The point being that you couldn't spend your tenner more disastrously than on this game. Avoid it. Please.

● TIM TUCKER

THE BOTTOM LINE

Just crap, with no redeeming features whatsoever. This gives American Football a bad name, and you'd be infinitely better off saving up the extra fifteen quid for *John Madden's*. I've said why above, so let me use this space to give my own public support to the Miami Dolphins next season. Go for it, boys.

STORM MASTER

Publisher: Games Worth Playing
Authors: Silmarils
Price: £12.99
Release: Out now

Those crazy-mad French blokes are at it again. They really are completely potty, or at the very least have an imagination beyond the realms of us normal, sane (ish) types inhabiting the real world. Recently the same team came up with the lush-looking but thoroughly flawed *Transarctica*, a game based around the less-than-mainstream subject of post-apocalyptic train management, but all those who missed one of their earlier efforts can now check it out on budget. So what, you may wonder, have those wacky Gallic funsters come up with this time? Check out this storyline, and then tell me that I'm not the only one

who's concerned about the ground-level sanity of the Silmarils team.

For reasons never fully explained, the neighbouring islands of Eolia and Sharkaania on the planet Urgaa have been grumpy for centuries, and you've been honoured by being appointed the Grand Magister of Eolia, ruling over the Council of Seven. In this privileged position you have the run of the land,

you are the ruler of all you survey, and you're undoubtedly heading for a surprisingly premature grave. You see, to gain the admiration and adoration of your people, all you have to do is pillage and destroy the seven enemy cities of Sharkaania (a feat your fathers and their fathers before them never quite pulled off) but if you slip up in any way... eek! Game over, man.

The Council of Seven control all aspects of Eolian society, from science, agriculture and commerce to religion, the military and even the seedy covert world of spies. As their boss, you've got to distribute the wealth of the nation between them, ensuring that there's always enough food for the masses, soldiers for the wars and materials for the warships. Unfortunately, when they're not getting bumped off by your enemies, the council are a miserable bunch who tend to feel neglected and wander off if you don't pay them enough attention.

Now, unpronounceable place names aside, the really bizarre thing

about this is that the planet is ruled by the wind, so all travel and fighting is achieved using big flying boats. You get to customise your own fleet, and then set off to (hopefully) trash the bad boys in them. Should you come into air-to-air conflict, you play one of the strangest battle games I've ever seen, seeing off all manner of attacking craft with a catapult (as in medieval conflict, not the Bash Street Kids, stupid) and two massive crossbow bolty things.

"So, take care if you've left your washing out to dry."

It's hard to know who to recommend this game to, as it's neither an adventure game nor a wargame. It's best to think of it as a

football management game, where you're the 'manager' of the world. You juggle figures, keep everyone happy, and since you're trying to destroy the other island, it's a game of two halves (arf, arf). It's a tough game to get into though, and definitely one for the shoot-'em-up up posse to avoid.

● MARK WINSTANLEY

THE BOTTOM LINE

At times *Storm Master* is a lot of hard work for little reward, and to get the most out of it, you'll have to put in a lot of hours. megalomaniacal power-trip. You mess around with your followers by altering their isometric world and encouraging them to build on the flat bits. In turn they adore you, giving you enough psychic energy to trash the followers of another god. When your boys kill the others, you've won.

The addition to this version is a data disk with five new worlds on it, like a Wild West and a French world. It's really funny watching comical French types building Arcs de Triomphe all over the place, but what does it add to the game? Not a lot, I'm afraid, and if anything the modern settings detract from the idea of gods ruling over primitive man. This is a very old game now (in Amiga terms) and I reckon that 13 quid's asking a bit much, even with a flossy addition.

● MARK WINSTANLEY

THE BOTTOM LINE

Populous is a brilliant game - fact. However, this is now the fourth or fifth re-release of it, either on its own or in compilations, and the *Promised Lands* data disk just offers you different sets of characters rather than any new challenges. This set as a regular budgee? Definitely. But for thirteen quid, you'd be better off grabbing the original second-hand.

One thing that really bugs me is being sunk before dinner time. Cruising the Straits of Hormuz certainly strikes me as a good way of passing the time, it's just that I get just so wound up when Exocets start scratching my paintwork and sending the entire fleet to the polluted bottom of the Gulf.

Oops, sorry about that, I lapsed into a hypnotic state for a moment there, lulled into a world of passive dipping sonars and Phalanx anti-missile cannon systems by this little gem from the Hit Squad.

"I say, you couldn't give me a lift to shore, could you?"

"And, to return the favour, perhaps you'd like to join me on my boat, tomorrow...?"

It's one of their Platinum Edition releases, which is another way of saying that even though it's a budget re-release, you're still getting slammed for thirteen quid. In this case though, you're getting real value.

Strike Fleet is a modern-day naval battle sim, where you get to control a surface fleet of up to 16 vessels against all manner of air, sea and sub-aqua enemies. This isn't one of those WW2 sim jobbies, where you criss-cross the Atlantic plinking at destroyers. No way, what we have here is a state-of-the-art, fly-by-wire kind of

wargame, simulating all the electronic wizardry that let the allies win the Gulf War with no worse casualties than a few dozen headaches from looking at TV monitors for too long. (And all the guys the Americans shot. - Ed)

The game's a breeze to get into, simply work through the tutorial in the manual and you'll have the mechanics sussed within twenty minutes.

Everything's mouse-controlled, and once you're into the actual game (as opposed to equipping your fleet) you have a complete overview of the game from just two well-presented screens. There's the map screen, that plonks you and your foes in some theatre of war, be it the Falklands, Gulf or Atlantic, and then there's the bridge screen. Remarkably, you can pretty much control the entire shooting match from this one screen, which means that the programmers thought long and hard before working out the game mechanics. And then went and got them spot on.

You control the fleet through a flagship, but can also split up the fleet and send them off individually. Clicking on a target on the radar presents you with a view of it, and allows you to zap it with a weapon of your choice. Easy.

As well as views from all the ships, you can even fly helicopters around, boosting your radar and anti-submarine capabilities. About the only downer in the game is the size of the graphics window, which tends to give you the feeling of fighting a war looking through a letter box. The actual graphics are great, with huge plumes of water splashing up to signify near misses, and columns of smoke lingering around sunk ships for ages after the event, but I tend to think it was the graphics window which was compromised to fit everything on one screen. It's no great problem though, and certainly won't stop me giving this one a big fat nautical thumbs up.

● MARK WINSTANLEY

THE BOTTOM LINE

One of that handful of wargames that's slicker than a Shetlands coastline, *Strike Fleet* looks good, plays well, and will keep you entertained way into the night. Ever read *The Hunt For Red October* or *Red Storm Rising*? Tom Clancy would go ape over this.

CDTV works with Amiga 500PLUS machines but older Amiga 500's require an internal modification and upgrade. This upgrade enables your 512K RAM expansion to be included with the onboard memory to provide the 1Mb of CHIP RAM needed to allow all CDTV software to work. Simply return your machine and payment of £29.95 quoting REA 1000. This price assumes you already have a 1Mb machine by having an extra 512K RAM expansion in your topslot. If you do not you should add either £18.95 (RAM 0509) for a 512K RAM board without clock or £23.95 (RAM 0510) for a 512K RAM board with clock.

'BEING A PSYCHIATRIST'

To all at AMIGA POWER, Whilst I'm probably one of the most aged readers of your periodical, a young at heart 53, I can't help but find this computer games lark just so jolly enjoyable. I've also found that it helps many of my patients. Being a psychiatrist, I've recently noticed how playing computer games reduces tension and allows patients to have an outlet for their anger and frustration.

Greg, before his tragic and unfortunate death, found computer games as a new way of taking his anger out on something, instead of his former way of venting his anger on himself. I truly believe that if the power cut hadn't taken place, he would still be alive today.

So to conclude, I certainly believe that computer games are a good, entertaining way of recovering from mental illness, and that parents should be encouraged to support their children's gameplaying enjoyment.

Yours, Dr S Buscemi, Croydon

Yeah. What he said.

'FROM A CAR BOOT SALE'

Dear AP, As a new convert to the Amiga, I've a few questions which I hope you can clear up for me. (Sure! Fire away! – Ed)

1. Are all film licences commercially-minded pap? For instance, are there going to be game versions of Thelma And

Louise, Peter's Friends or Reservoir Dogs? (We can only hope. – Ed) Or are we doomed to suffer a diet of rubbish Arnie games for the next fifty years?

2. My only game is *Herewith The Clues*, which I bought from a car boot sale for 75p. I think I've solved it, but don't know whether CRL still exist. Do they, and if not how can I find out the solution? (You could always try *The Last Resort*, with Large Jonathan Davies. – Ed)

3. Is *Sonic* out on the Amiga? My boyfriend says it is, but everyone else thinks he's mad. Is he? (In a word, yes he is. – Ed)

Oh, and finally, thanks for a great mag, which could only be improved if Stuart Campbell posed naked. Any chances, Stu? Kindest regards, Sally Menke, Crawley

Stuart says: "What, THE Sally Menke, the one who was the Editor on *Reservoir Dogs*? If so, pop round with the Polaroid any time." But for now, here's a little pic of Stu we found in our files...

'I'M NOT EVEN FEMALE'

Karyn Rachtman, c/o Wimmin's International Rights Suffragette House

Dear Sister, How could you betray your sex so blatantly? I am a civilised wimmin, but if I were not, then surely I would threaten your life for immersing yourself so thoroughly in the company of such rapists. Computing is a predominantly scumbag hobby, and in my view, they are welcome to it, but for you to become editor, to control the uncontrollable, to be in charge of all those MEN, I find flabbergastingly unforgivable.

Actually I don't. I'm not even female. Oh I love you, can't you see that, Linda. Marry me, or I kill myself.

Joe, London

Oh dear.

'THE ONE AND ONLY'

Dear AMIGA POWER, Re: Mandi's letter about 'that Word'.

I bought my eight year-old son 'the Power' today, and to keep up to date, I read it from cover to cover. The one and only thing I didn't enjoy reading was 'that Word' (you know the one I mean). (She means 'crap', everyone. –Ed.)

I entirely agree with Mandi and her friends and many others I know, and although you've already covered all of this, I feel so strongly about the unnecessary

use of bad language, especially for impressionable young children, that I had to write to you.

Why should we parents admonish our children for a word YOU put into their minds and mouths? (You shouldn't. There isn't anything wrong with saying 'crap'. It's a word, for goodness' sake. – Ed) We can all be expressive with thousands of other words than this one. (But why not use one that's perfect for the purpose? – Ed)

How about 'diabolical' or if you really want to use a four letter word for publishing purposes, what about 'dead'? Surely this says it all.

PLEASE – in these awful times of the lowering of acceptable standards in English, can't AP take the initiative and be the first magazine to uphold GOOD grammar? Apart from this, thanks for such a good and enjoyable magazine.

Yours faithfully, Zofia Watchorn, York

PS I've lived for nearly half a century and have never used 'that Word'. I'm pleased to read that younger mothers have standards too.

'Dead'? 'This game is a load of dead'? Doesn't really work, does it, Zofia? And you're right, we have covered this pretty extensively already. Sorry, but 'crap' stays until the day that there are no more games deserving the description.

'MY SON IS VERY DISAPPOINTED'

Dear Sir, As an offer for two years of Mountain Bike UK subscriptions my son received a free MBUK binder. He recently ordered two binders, one for AMIGA POWER and another for Mountain Bike UK magazines. I note that you market both and wish to make the following observations.

Whilst providing 12 steel rods, the divisions within the ends of the AMIGA POWER binder only permit eight magazines to be filed. The MBUK without divisions allows for 12+ magazines.

I note that the patent is pending on the AMIGA POWER binder and I feel that to change your other binders to this format would be a retrograde step.

My son is very disappointed with the Amiga binder as he still has magazines which he can't file. I welcome your reply. Yours faithfully, P M Locker

Well, P M (and incidentally, as an appendix to our *How To Write To AMIGA POWER* guide in issue 20, this is the last time we'll print a letter from anyone without a first name), unlike MBUK, AMIGA

FAB COVERDISKS winner

'HARDER TO RESIST'

Dear AMIGA POWER, It's now been over 18 months since magazines stopped putting full games on coverdisks. Before this happened, people who couldn't afford games every month had access to a cheap way of buying games through the magazines. Now of course they haven't, and so when they come across a chance to pirate games, they'll find it harder to resist.

It's hard to understand why ELSPA were so against full games on coverdisks in the first place, as most of the games were already out at a budget price, poor quality or delisted. Ironically, it was only when the decision had been made to ban complete games on covers that the quality of

these games improved, and we've seen with the budget release of *Kid Gloves* that the fact it had been covermounted didn't affect its sales in the slightest.

Is it possible to contact Roger Bennet and find out if he believes that banning full game coverdisks has benefitted the software industry in any way? It seems unfair that mags have had to ban full games off every one of their issues and that some sort of compromise couldn't have been worked out. I suggest the following points:

1. Each mag is only allowed to put three or four full games each year.
2. The cover game must be at least two years old, or...
3. The game must have been released on budget for at least 6 months.

By putting this delay in, you practically guarantee that everyone who wanted the game would already have bought it, so for people getting it on the magazine, it's just a nice addition. Even if you're not allowed full games on your coverdisks, couldn't you include more previously unreleased games, such as *Puggles*, so you always have a full game on every issue? I'd be interested to hear your (and ELSPA's) views on this.

Yours, Chris Gare, Street, Somerset

CYBERRACE POSTER winner

'THE MEDIA LOVE THE IMAGE'

Dear AMIGA POWER,

Piracy – yes, it's wrong. We should all hate it even if software is so expensive. Forty quid for *Legends Of Valour*! Don't they know there's a recession?

The real question, though, is: who's behind it? The media love the image of the schoolboy pirate running off illicit copies at 50p a time to give out to his friends. Certainly this happens but there's another far more serious side that needs to be explored. My case for the prosecution – *Flashback*.

As I write, the game hasn't yet been released, but I've played a demo and I'm saving up my pennies. "But wait!" says a friend, "I've got it, I can do you a copy."

"But," says I, "it's not out yet, how can you have it?"

"Oh, I've had it for weeks. It's really good, but there's a bit of a problem – it's only a development copy, so it's not all there yet."

Now my case is this. There are, as I see it, only two places a development copy could have come from. There's the software house who are producing the thing, or a magazine which has been sent a review copy.

There's no other way that a development copy could have found its way to the public and the pirates so long before the release of a game. The issue, then, is where should ELSPA be directing their efforts? If it's the magazines then there are some serious questions to be asked about your integrity, not to mention honesty.

If, however, we find that the software houses are themselves responsible then I think it's time the whole issue of piracy was re-opened. How can anybody condemn piracy if we find out the software houses are behind it? If anyone has an answer, I'd be pleased to hear it.

Yours sincerely, J Christian Flett, Edinburgh

Almost certainly, the pirate copies of Flashback currently doing the rounds are coming from France, where the game has been on release for months (the delay in UK release is largely down to translation hold-ups). No magazine would be stupid enough to put pirate copies of review software out – it could kill the mag (most games these days are fingerprinted, and would be easily traceable), and there'd be no benefit in doing it anyway. Bizarrely, it is sometimes the case that games get leaked by their programmers, but you'd have to ask them exactly why.

POWER is perfect-bound (glued into a rigid spine rather than stapled). This means that if we were to put 12 copies of the mag into a single binder, the spines would wedge together in a manner which would make it next to impossible to actually open the issues up and read them without ripping large chunks of pages out. Or something like that, anyway.

'CLEAN AND UNCRUMPLED'

Dear AMIGA POWER,

I would first of all like to point out that I am not usually a Victor Meldrew. I am not a idiot so that's why I buy the best Amiga magazine on the market, AMIGA POWER. I am really pleased with the quality of the magazine and have taken advantage of your excellent subscription offer.

The reason I'm writing this letter is to complain about the amount of time I have wasted recently. Instead of doing worthwhile things like helping old ladies across the road, doing my homework, watching Neighbours (it's a brill show really) or playing some of the excellent games that are out for the Amiga I've been trying to frantically work out how to fit twelve AMIGA POWERS into the flashy binder which cost me a fiver.

I have brought a lot of binders in my time to keep my other magazines clean and uncrumpled and also in order. So, when I read the ad at the back of one of my issues and saw how I could keep twelve issues of my prized magazine pristine and perfect in your gorgeous white binder, I immediately sent off my well-earned cash and looked forward to receiving my binder. ("Well-earned"? – Ed)

When it came I decided that I would put the issues I had collected into the binder. I was in for a trying time. I don't know whether it's because you are giving us massive magazines packed full of info (Yes it is. – Ed) but I have struggled to get eight issues into this binder. At one stage I had nine in but they all fell out. It would probably be fine if it didn't have three bits of plastic dividing the tracks. It was then

that I worked out that this meant I had to get three issues into every gap. I warn other readers to stay clear of the binders. **Yours Sincerely, Graeme Donohoe, Irvine, Ayrshire**

Hey, we never said you could get 12 issues into a binder. See the above reply, and get off our case, man.

'CRIED MYSELF TO SLEEP'

Dear AP,

After buying your mag since the very first issue, I'm leaving for pastures new, namely PC Format. Having laughed through the Matt Bielby golden era, cried at Stuart N Hardy and his pitiful brother, envied Rich Pelley (where is he now?) and his Omar Sharif looks, cried at *Epic*, chuckled at *Wizkid*, cried myself to sleep over Lisa Nicholls (wot a babel!) etc etc, I've decided to buy a PC instead of shelling out £500 for an A1200 and a hard disk. My collection of AP is up for sale, as is all my software, and I'm saving up for my dream PC. Any donations should be

made payable to the Campaign Against Stuart Hardy (CASH for short) and sent direct to my house. **Thanks very much, Ivor Whopping 386, Northumberland**

'SPDANNG!'

Dear AP Guys and Gals,

I am blessed and cursed with the ability to see both the positive and negative sides of any situation or argument. What does that have to do with the price of fish? Or, even, computer games? Well, just read on...

I often see sequels receiving lower marks than their, um, prequels, simply because they're sequels. If a game's really good, what's wrong with giving the public some more of the same but different? Take *Turrican 2* for example: it's basically *Turrican* with new and better weapons, bigger levels, and more guardians, but without any of its parent's good features being removed. And yet (and yet!) all the magazines I read marked it a few percent less than *Turrican 1* (yes, I know that you didn't review it). How about *Eye Of The Beholder 2*? It's kept exactly the same

gameplay of *EOTB 1*, and added more levels and pics to it, but you give it two percent less than its predecessor because you don't think that it has improved enough. Sure, two percent is nothing to squabble over, it's just the fact that you don't think it's as good as the first that gets me. It's based on *Advanced Dungeons and Dragons*. You don't go out and buy a new rule book every time you play a new AD&D adventure, so why do you expect a brand new engine for *EOTB 2*?

But then it hits me (SPDANNG!). By saying this, I'm justifying companies churning out low grade cash-ins as well. Look at *Lotus 3*. It's probably the best one to get out of the three, as it puts the first two together, but that's all. It's not so much *Lotus 3* as *Lotus 2+*. So there you have it. I guess I'm trying to say that there's no excuse for not improving on a game if you get the chance, but don't put the boot in on a game that doesn't improve much but was good to begin with. I think.

Yours Well, um, yeah-ingly, Josh 'Antipodean' Addison, New Zealand

*It's not so much that sequels aren't as good as the original games, Josh, it's more that, for their time, they're not as impressive relative to the game scene generally. If, for instance, *Turrican 2* comes out a year later than *Turrican 1*, then compared to the rest of the games around it doesn't look as good as *Turrican 1* did, because the state of the art has moved on. So it doesn't get as good a mark. That's the only sensible way you can mark games – otherwise, what happens when (say) *Xenon 2* gets 90% when it gets released (because it looks good for 1989 or whenever), but then two years later something like *SWIV* comes out which is, ooh, maybe twice as good? By your system, we'd have to give it 180%, which is obviously silly. Isn't it?*

SOCCER KID BADGE winner

'SURPRISED STUART DIDN'T HEADBUTT MR CREATOR'

Dear you lot at AP,

Seeing as this is the only word I can use that will get printed, I shall damn well use it. CRAP!

Are you trying to pull the wool over our eyes? We lovingly pay our £3.50s every month and this is what we get. Stuart, back me up on this one, okay? The subject of these ramblings is *FA Premier League Football* (or should I say crapball?)

For the creators to even suggest that it's the best football game ever written causes me to gawp at my

magazine in pure disbelief. Fair enough, we've only seen your demo, but tinny sound, unresponsive characters and an uncontrollable ball are not factors that will beat the true crème de la crème of football games – *Sensible Soccer* (hurrah), for the sound on that is gorgeous, the gameplay is unbelievable, and in one word, *Sensible Soccer* is pure sex! (Er... that's five words. Count them. – Ed)

I'm surprised Stuart didn't headbutt Mr Creator when he said *FA Soccer* was better than *Sensi*. (He was on the telephone. – Stuart) This ain't what I pay my dosh for. Please, don't put down my beautiful *Sensi* again, or I'll cry.

By the way, I'll beat you at *Sensible* any day Stuart, even if I play Croatia with 4 red cards. And Mark, you're rather a good games reviewer, but unfortunately you have a sad, sad wardrobe.

Ta ta, Mike Sharkey, Warrington

We've got our doubts, Mike, but FAPLF has already improved quite a bit on that demo, so let's wait and see how it finally turns out before we put the boot in. Everyone gets a fair chance at AMIGA POWER. Except Mark.

DO THE write THING

'A STUPID IDEA'

Dear AP,
Having read your letter guidelines in issue 20, I saw that it'd be good to include something that no one has talked about before. Being the master of logic that I am, I thought that if I talked (or wrote in this case) about absolutely nothing whatsoever, then you'd view this as an original concept and consider publishing my scribbles.

I pondered whether this would be feasible material for a letter in a magazine of such high calibre as yours is (I wouldn't have every issue if I didn't think you were good), and I was thinking so hard all the way to school this morning that I ended up in Bognor Regis! When I finally got home, I loaded up *Stunt Car Racer* when what I actually wanted to do was make a cup of tea, so intense were my thoughts on this matter. In the end I thought that it was a stupid idea and didn't bother.

Yours, Richard Cherrett,
Stockton On Tees

'ONLY SPECULATE'

Rumours are now circulating about the apparent resignation of Mark Ramshaw, editor of the highly regarded AMIGA POWER. It's believed that Mr Ramshaw will continue to work for Future Publishing, possibly under an assumed name. Reasons for his resignation are unsure, however Mr Ramshaw has been under

continual pressure after several press smears, talking of obesity problems, severe hair-loss and personality defects (including allegations of a train fetish). Pressure has also come from other areas calling for his replacement, with Stuart Campbell taking his seat. There is still uncertainty over Mr Ramshaw's replacement, and as no one on AP was available for comment, we can only speculate. It does, however, seem to be a two-horse race between Stuart Campbell and Tim Norris, with neither Lisa Nicholls or Gary Penn in with much of a chance, and only a tiny chance for either Tim or Mark's clones (Mr Tucker or Mr Winstanley) or indeed Jackie Spanton (Art Ed and all-round mystery woman). We can only hope for a short and fairly peaceful war...

'SCRUFFY HIPPI... AXED'

AMIGA POWER, Hi!

So Commodore have announced a four-million-pound advertising campaign to support the new Amigas. The most prominent feature is the TV advert, which must be condemned as a near-complete failure.

"Better sound" they say. So why show a flash of sheet music followed by a keyboard playing an exceedingly poor sample? I have a tracker program *OctaMED Pro*, which was on a free coverdisk. Following a simple guide, in two hours I'd constructed a pretty decent rave track, not Top of the Pops material maybe, but a great demonstration of the power of the Amiga and its products. While it plays the track, even the screen looks pretty impressive, and I think that this would have been a much

better display to encourage people to buy the Amiga. As for the kid using the computer, is he really going to turn anyone onto the Amiga? Sega originally had a scruffy hippy as the star of their ads, but after showing the ads to 'the kids' he was axed and the cool dude they now show took over. Whether you like him or not, the ad campaign is a good one.

I could go on, but I've made my point. If Commodore are serious about promoting the Amiga and want to keep the support of software houses, then they shouldn't make such naive mistakes. I bought an A500+ for the same price as an A1200 now costs and yes, I am feeling cheated. But I'm devoted to the Amiga and am happy with what I have. Let's face it, Commodore just don't deserve the Amiga. Cheers, Paul Duncan, London

PS And another thing, on C4's GamesMaster, why is the word 'Amiga' never used? Even when they play an Amiga game, they never say so. A conspiracy theory in action?

Ah, no, what happened was that Commodore's marketing department said that the word 'Amiga' was copyright, so nobody was allowed to use it except them to promote the machine. (Note to lawyers: this is a joke.)

We printed this letter because it was weird – we got it the day the last issue hit the streets, which raises a couple of 'interesting' questions. If the writer had a copy of the mag, then he'd have known that Linda was the new Editor, making the letter completely pointless. If he DIDN'T have the new issue, how did he know that Mark was leaving? We asked ex-Ed Matt Bielby to comment. (Spook! – MB)

'MIGRAINES, HALLUCINATIONS ETC'

Dear AMIGA POWER,
I have a complaint to make about *Lemmings 2* – it's horribly addictive. I spent over 19 hours playing it yesterday, and have even started skiving off school! In the review though, you didn't mention

anything about addictiveness and the fact that it can cause migraines, hallucinations, etc. One day I was told that I'd been walking around wearing beach bum outfits shouting "Yippee! Oh No! Splat! Etc!"

A few questions: Can you admit me to a loony bin? Are there any plans for *Lemmings 4*? When is *Sonic* out on the Amiga? (You're right, you ARE mad. – Ed) Yours sincerely, Oliver Mustoe-Playfair, Sittingbourne, Kent

PS I'm no saddo, I'm no saddo. I'm not!

'BIG WIGS'

Dear AMIGA POWER,
I'm upset! I sent my wife to the newsagent's for my copy of your magazine, and when she came back there was no run-down on the A1200. Boo hoo, I've waited a full month for your knowledge of my machine, and it wasn't there. So now I'm sat here watching German satellite TV, as I was laid off a few months ago. I bought an Amiga to keep me from going insane with boredom, and play mostly adventure games as they're my favourite. I bought one a couple of weeks ago though, and now I've finished it, so it's no use to me. What I'm getting at is this, why don't shops either trade in old for new or operate a swap shop?

What about you lot? The amount of people who must have software they no longer want is unbelievable. You claim to be a best-selling mag, so let's see some action! Would you also think about organising a boycott of buying software for a week or so until the big wigs dropped their prices? You know the sort of thing – together we stand! I also think that Commodore are out of order on not giving you information that you ask for. I don't like the Amiga being called 'humble' compared to the PC – me and my friends have respected the Amiga for years.

POWER TO THE PEOPLE!!
Yours, unemployed, 25, with two kids, Chris, Oldham

Well, Chris, why don't you take a trip to *The Secret Garden*? You'll find the form in *True Stories*, and we'll meet you at the cemetery gates...

DRAGONFLIGHT T-SHIRT winner

'GEEKY, SPOTTY, SEXUALLY FRUSTRATED'

AMIGA POWER,

(The first two pages of this letter have been edited out, due to sheer tediousness. So fast forward to... – Mark, typing in the letters.) You're probably thinking that I'm a real sad case, and you're probably right. I am sad, sad at you, but then are you any less sad for working on a games mag? (Maybe not, but we're having a great time. – Ed) You're just another cog in the great capitalist consumer machine (Well, we never claimed to be perfect – Ed.) Your function is to promote products and in return I suppose you get your kickbacks. For all your talk about attitude, you're really just a flea on the dinosaur's back. It must be difficult not to become jaded.

Despite Mark Ramshaw and his dreadful 80s goth haircut, I like your mag. I like the way you don't stoop to the kind of xenophobic, racist, sexist garbage of certain other Amiga mags. These mags continue to conform to the stereotypical image of the social inadequate, politically illiterate, geeky, spotty, sexually frustrated games player, and speaking as a married, twelve-stone, six-foot, 30 year-

old, multiply pierced, tattooed skinhead philosophy student, I object strongly to this kind of generalisation. (Blimey, I'm glad it was Mark who called you 'tedious' earlier on. – Ed)

On a final note, I like football games, but why are they all so unrealistic? When playing *European Football Champ*, I've yet to be awarded a throw-in even when it's blatantly my opponent who's kicked the ball out. Even in the wonderful *Sensible Soccer*, it's possible to hoof the ball towards the goal straight from the kick-off without passing first. Illegal, surely!

For me, the ultimate football game would be one based around Billy The Fish and Fulchester Rovers. Can you imagine it? You pass the ball out to the wing and suddenly it takes on a life of its own and appears to race down the touchline all by itself – until you realise that you've inadvertently passed to the Invisible Man, and you really were controlling the ball all along. (Hey! Subverting the Viz-reading-student stereotype! Right on! – Ed)

Just think what your opposing teams could be made up from. A team full of suited chartered accountants from Milton Keynes, or maybe a crack SAS troop who attempt to blow up your defence by planting mines and then shooting your centre forward when the ref's not looking. Better still, a team of Ancient Greek philosophers who, instead of playing football, stand around scratching their heads, musing on the burning issues of the day such as "What is courage? What is justice?" while your team bangs in fifteen goals. Now that's attitude, remember that?

Yours in anger, amusement and honesty,
Thrash, Cleveland

PD

Look at this, readers – it's the way to do it. Here in the public domain, you get your software for nothing and your disks for a nominal copying charge. And most of it is working, even on the 1200. This month's Hawaiian noises were made by Dave Golder. Err... thank-you.

ROACH HOTEL

Telescan Computer Services
1200 compatible

Apparently, *Roach Motel* aims to prove that you can write professional games in AMOS. Well, I don't think the sorties will be queuing up for the distribution rights.

It tries hard, there's no denying that. It's a cutesy platformer that doffs its tiffers in the direction of the consoles (ie, you kill the nasties by bouncing on their bonces). You leap around the very un-hotel-like screens exterminating the large mutant roaches that infest the place.

Roach for the skies, six-legged vermin!

There's lots going on – skiddy ice platforms, conveyor belts, matter transporters, stuff falling from the ceilings, larger levels for people with one meg machines – but it's fatally let down by a muddy control system, massive slowness and some really quite hideous graphics.

VERDICT: A lot of good ideas, but the whole is considerably less than the sum of its parts.

RATING: ★★★

OBLIVION

Telescan
Not 1200 compatible

Remember *Defender*? Well, how about its sequel, *StarGate*? If you get hold of *Oblivion* you won't have to, because you'll have *StarGate* there in front of you. As clones go, this one is just about perfect.

There have been a few graphical tweaks, but the sounds are spot on and the gameplay, while simple, is as addictive as it ever was. And the speed of the game and the unpredictability of the alien attackers still make it a thoroughbred blast.

VERDICT: Okay, so rehashing old games is a bit lame, but if you want some good old-fashioned blasting action this provides the goods.

RATING: ★★★★★

Here's a little-known *StarGate* fact: the European version is called 'SpaceDoor'.

ESCAPE 2

Pathfinder PD
1200 compatible

The aim of the game here is simply to get from point A to point B. The problem is that you have to take the kind of circuitous route that involves visiting every other point from C to Z and well into Greek alphabet territory as well.

Escape 2 is a futuristic puzzler featuring matter transporters, vanishing tiles, switches which operate sliding doors (usually on the other side of the screen) and tight time limits.

The graphics are impressive and the basic concept is fine (although, admittedly, it's hardly original), but the game relies far too much on the try-and-die-and-start-again school of puzzling.

There's no real logic involved – you just have to remember what does what. The collision detection is a bit dodgy too, and you keep getting stuck in doorways.

VERDICT: I still prefer the version with Steve McQueen having an argument with a barbed-wire fence.

RATING: ★★★

Further escapological escapades... follow.

POO POO DREAMS

Telescan
1200 compatible

Yes I think it's a crap title too. And it's only a hidden game on a demo (*Demon Download*). But I found it quite jolly, so that's why it's getting a mention.

You control a white line that moves relentlessly around a maze. If it touches the walls or its own tail, then that's game over. The longer you live the more points you get. There are pellets you can pick up which make you longer and multiply your points. So basically you weave about the maze trying not to get tangled and getting ever longer. It's dead simple but dead addictive. There's even a two-player mode which can get very vicious.

It's a shame there is only one maze; indeed the game has the feel of an idea that hasn't been fully developed. But the idea's still good. (Warning – the demo uses rude words, so if you're the prudish sort, perhaps you'd better avoid this one.)

VERDICT: It's small, it's samey, it's not entirely original, but in the short term it gets its hooks in.

RATING: ★★★

Don't go poo-pooing my Poo Poo Dreams.

TETREN

Bus Stop PD
1200 compatible

Oh no! Not another PD *Tetris*. Oh yes! But this is *Tetris* with a difference! You've probably heard that one before – but in this case the game does actually add a few new twists.

You're still slotting falling shapes together to form lines which vanish, but in *Tetren* you have goals to reach – it takes a certain number of lines to complete a level. And the levels become progressively more difficult, and not just because the blocks start falling faster. There are levels in which the screen blanks out, where acid rain rots away the blocks and where blocks

shuffle sideways off the screen.

Add to this a two-player competitive mode, a password system and some above-par graphics and you've got a rather nifty little game.

VERDICT: Do you take just one *Tetris* into the shower? Then why not take *Tetren* as well? (But remember, kids: water and Amigas don't mix. – Ed)

It's here, and it's now – the biggest and best guide to all the latest Amiga games around. With the added bonus of a simple colour-coding system: (1) If it's new, it's in blue, (2) If it's way ahead, it's in red. Let's go to work...

THE BOTTOM LINE

(AND HOW TO UNDERSTAND IT)

★★★★★ Excellent ★★★★★ Nearly there ★★★★★ Very good
★★★★ Has its moments ★★ Flawed ★ Dire

The whole point of *The Bottom Line* is to cram as much information as possible into this small space. Here's how it works...

The top bit is easy:
GAME NAME
Publisher Price

Then we get (just for your information really) the issue of AMIGA POWER in which the game was originally reviewed, the mark it got at the time, and the reviewer's initials. If the game appeared in our new All-Time Top 100, its position comes next, followed by

the mini-review and a final rating out of five stars (with red ones to show which ones are real 'must buys'). And there you have it – all you could ever possibly need to know about just about every full price game you're even slightly likely to think about buying.

A-TRAIN

Ocean £34.99

AP24 82% RL Top 100 No.81
Slow-paced but thoroughly engrossing god sim, where you build up towns around a fledgling train network. Stunning graphics and gameplay so deep you'd probably break your ankle if you fell into it. A visually attractive strategy game – now there's something you don't see every day. ★★★★★

AIR BUCKS

Impressions £29.99

AP17 70% MR

Fighting for supremacy of the skies can be a messy business, especially when it's peacetime and you run a commercial airline. This is an intriguing and engrossing business sim for budding Richard Bransons, but you need to make too many allowances for sloppy programming for it to be 'fun'. ★★★

AIR SUPPORT

Psygnosis £25.99

AP19 55% RL

Uninspired and a chore to play, *Air Support* misses the mark as a strategy game and as a 3D blaster. It's a nice idea to combine two genres but it falls short when all the good bits are missed out. It's a sad, bad game, which is a pity. ★★★

ALIEN³

Acclaim £25.99

AP22 85% GP Top 100 No.38
Not a totally accurate representation of the third in the Alien saga, but it does capture the feel of the Alien films in general and, more importantly, it's a great game. A platform blast-'em-up that's not particularly original but provides loads of fun and atmosphere. Good stuff. ★★★★★

AQUATIC GAMES

Millennium £25.99

AP19 60% SC
James Pond's latest adventure sees him competing in the underwater Olympics. It's one of those joystick waggler games that gets horribly boring and repetitive very quickly. It does look very cute but we think we'll wait for *James Pond³*. ★★★

AQUAVENTURA

Psygnosis £25.99

AP16 38% AP

Over-hyped, nice-looking but repetitive and shallow 3D shoot-'em-up. Okay as an ambient relaxation tool but if that's what you're after, try fitting a coloured light bulb. ★★

ARABIAN NIGHTS

Mirage £34.99

AP25 83% LB
I know what you're thinking, punk – "Oh no, not *another* cute platform game". Up to a point, you'd be right – *Arabian Nights* has all the hallmarks of a good old scrolling romp, plus cryptic puzzles, massive built-in cuteness factor, and extraordinary (if occasionally frustrating) high speed. Great fun. ★★★★★

ASHES OF EMPIRE

Mirage £34.99

AP16 80% RL
Your mission, should you choose to accept it, is to bring peace and stability to the Confederation of Syndicalist Republics (a not very well disguised USSR/CIS sort of place).

Ashes is one of those strategy role-playing games that people tend to be scared of, but despite being vast and complicated, it's surprisingly easy to get into and curiously addictive. ★★★★★

ASSASSIN

Team 17 £25.99

AP19 89% MS

Overall a great game. Nothing really to drag it down except perhaps a lack of originality. It looks great, it's chock-full of features and entertaining baddies and it's fairly simple to control. This is how most arcade conversions should look, but don't. ★★★★★

AV-8B HARRIER

Domark £39.99

AP22 47% JD
A Harrier sim that's so accurate it's a chore. For anyone without an A1200, forget it, it's too slow. It's still dull on the A1200, with uninspired graphics and very little entertainment value. Could be the most accurate Harrier sim available (on the A1200 that is), but not a game to get excited about. ★★ (★★★ for A1200)

B17 FLYING FORTRESS

Microprose £39.99

AP25 83% TT
Remember the film *Memphis Belle*? Well, if you've ever wanted to take on the roles of the entire crew of a B17 strategic bomber, then this is the simulation for you. It's a little short on high-speed graphic action, but more than makes up for it with attention to detail and seriously nostalgic World War 2 ambience. ★★★★★

BARD'S TALE CONSTRUCTION KIT

Electronic Arts £29.99

AP23 62% JD

It's a construction kit for *The Bard's Tale*, isn't it? Does the job well, but you'd have to be a real fanatic to plough through the unfriendly and unforgiving interface it uses to do it. Then again, if you were thinking about buying this in the first place, that's exactly what you'd be. So, er, that's alright then. ★★★

BATTLE ISLE SCENARIO DISK ONE

Ubi Soft £19.99

AP18 78% MR

As data disks go this one is good value for money. *Battle Isle* fans, this is the place to come for lots more scenarios and lots more playing time. ★★★★★

BAT 2

Ubi Soft £30.99

AP19 80% RL

With so many different styles of gameplay in here it could have been a real mess but the strategy and 3D elements combine really well with the adventure and RPG to give a cracking game. Nice one. ★★★★★

BC KID

Ubi Soft £25.99

AP19 89% GP Top 100 No.86
Supercute platform beat-'em-up, brimming with style, character and humour. Very playable and very lovable. ★★★★★

BILL'S TOMATO GAME

Psygnosis £29.99

AP21 81% TT Top 100 No.43

Bill wrote it, Terry and Tracy Tomato star in it and you play it. Totally bizarre and thoroughly original gameplay gets you to propel a tomato across the screen using fans, trampolines and jack-in-the-boxes. With a hundred levels involving all sorts of puzzles, this will keep you going for ages. ★★★★★

BODY BLOWS

Team 17 £26.99

AP24 89% TT Top 100 No.53
The Amiga beat-'em-up that *Street Fighter 2* should have been. It's a gloriously slick fistfest where you can actually control your character with an amazing degree of accuracy. The only downer is how long you can bash your mates before it gets boring. ★★★★★

BUG BOMBER

DMI £25.99

AP17 83% SC Top 100 No.45
Basically it's *Dynabaster* with twiddly bits. It's slightly better than *DB* as a one-player game but not as good for multi-player fun and good looks. Overall, though, dead fab. ★★★★★

BUNNY BRICKS

Silmarils £25.99

AP19 36% AP

Breakout meets baseball meets a bunny. Bad. ★

CAESAR

Impressions £29.99

AP19 84% DG

Ruddy heck! At last, a halfway-decent wargame thing! Lots of strategy, good presentation, compelling gameplay. Generally, it's pretty good. Blimey. ★★★★★

CALIFORNIA GAMES 2

US Gold £25.99

AP18 52% RR

This will receive a fair recommendation when it arrives in the budget bin where it belongs. The only truly surprising thing about *California Games 2* is the price. £25.99? Get real, dudes (as I believe young people say nowadays). ★★

CAMPAIGN

Empire £34.99

AP19 83% JD

And here's another decent wargame. *Pacific Islands* meets, um, some other good war-type game. Strategy-tastic, and probably still a bit much for zapping fiends, but a lovely game for anyone with the slightest beam of light creeping through the closed door of their mind. ★★★★★

CARL LEWIS CHALLENGE

Psygnosis £25.99

AP17 83% DG

These days, sports sims of all descriptions come with a management section. This one does but it isn't really worth playing. The sports bits are presented very well but are too easy. And there's no head-to-head option in multi-player mode. Okay, but flawed. ★★

THE CASTLE OF DOCTOR BRAIN

Sierra £34.99

AP18 61% DG

If you want to expand your kids' minds then this is no bad way to go about it. It's just a pity that it's so damned slow and difficult to control. Not a very large game. ★★

CATCH 'EM

DMI £25.99

AP18 69% RP

If you enjoyed the totally bizarre concepts of *Lemmings* or *Goblins* then perhaps you could make something of *Catch 'Em* too. Try it, you might like it. ★★

CHAMPIONSHIP MANAGER

Domark £24.99

AP15 38% JD

A very tedious and boring attempt at the football management genre. Disappointingly, there's absolutely no football action, but there is a ridiculous amount of disk accessing. To sum up: don't go wasting your money, you'd get more satisfaction flushing it down the toilet. Try Krisalis' *Graham Taylor Management* game instead. ★

THE CHAOS ENGINE

Renegade £25.99

AP22 89% SC Top 100 No.14
The Bitmaps return with an absolute corker of a shoot-'em-up. A cross between *Gauntlet* and *Speedball 2*, this looks, feels and plays like a dream, with bundles of atmosphere and gorgeous graphics too. Most importantly, it's great fun to play, and the two-player mode is even more brilliant. Unmissable. ★★★★★

CHUCK ROCK 2 - SON OF CHUCK

Core £25.99

AP24 83% MW Top 100 No.66
Chuck's son Junior battles against some of the biggest, cutest monsters of all time to get his pot-bellied dad back. Formula platform material is spiced up with funny and playable sub-games and high-class cartoon characters. ★★★★★

CIVILIZATION

MicroProse £34.99

AP16 80% GP
The idea of god sims, and this one in particular, is very appealing. Few of them really hit the mark, though, and this is one of those that just misses. The interface is a living nightmare of hell, but inside that shoddy body there beats a heart of gold. It's dull and flat to look at but in the end it's such a good idea. Okay if you're patient, but why should you have to be? ★★

COMBAT AIR PATROL

Psychonosis £29.99

AP23 88% MW Top 100 No.59
Spiffing flight sim with the emphasis heavily on the all-action shooting aspect. Really good fun, and the most enjoyable flight sim since *Knights Of The Sky*. ★★★★★

THE COOL CROC TWINS

Arcade Masters £25.99

AP16 65% MS
A mad and bizarre headbanging extravaganza of platforming crocodile antics. It's bright, colourful and arcadey, but there are too many levels and not enough gameplay variety to keep you entertained for very long. ★★

COOL WORLD

Ocean £25.99

AP21 59% TT
Enjoyable (if unoriginal) platform game with clumsy character control as its main fault. The link to the film is tenuous to say the least. ★★

CRAZY CARS 3

Titus £25.99

AP16 88% MR Top 100 No.10
Probably the best racing game yet – pure arcade fun. It succeeds. A great difficulty curve, excellent power-ups, wonderfully evocative graphics (Boston really looks like Boston) and great sounds. Let down slightly by the lack of a two-player option but otherwise fab. ★★★★★

CRAZY SEASONS

Idea £25.99

AP17 73% LB
Cutesy, platform puzzler featuring an overweight penguin trying to save the universe. Not exceptionally original but very playable. ★★★★★

CREATURES

Thalamus £25.99

AP24 20% SC
A cutesy, platformer type of affair where the only real entertainment comes from the single-screen torture scenes. Pixel-perfect jumps prove tiresome, and come to think of it, so do most of the other features. Not at all a fun experience. ★

CRYSTAL KINGDOM DIZZY

Code Masters £19.99

AP23 25% SC
Issue 23 was a bit of a nightmare for over-priced software, and this was possibly the worst offender of all. Even the Dizzy fans in the office (well, Stuart) thought this was the worst-designed and most annoying to play Dizzy game to date, so making it cost three times as much as the rest has to be a bit of a mistake. ★

CURSE OF ENCHANTIA

Core Design £34.99

AP19 87% LE Top 100 No.46
A game that could well out-monkey the definitive *Monkey Island*. With such a high degree of humour this adventure is well on its way to becoming a classic. It's slightly overpriced and some of the puzzles are a little obscure but these are minor quibbles. Overall this is a great game. ★★★★★

CYBERBLAST

Innerprise Software Inc £25.99
AP17 61% GP
Uninspired *Gauntlet* clone. Scrolly, mazy, shooty thing that plays well but isn't overly interesting. ★★

CYTRON

Psychonosis £29.99
AP21 61% SC
Paradroid 90 done again, only not as well. A robot slides uncontrollably about a maze shooting other robots and splitting up into two little robots occasionally. Lots of other options live things up, but only for a few minutes. ★★

DARK QUEEN OF KRYNN

SSI £32.99

AP19 67% JD
Yet another Krynyn game, just the same as every other Krynyn game you've ever seen. (And if you've never seen one, they're primitive RPGs with ridiculous price tags and as much user-friendliness as a pit bull terrier with its tail caught in a door.) The graphics are a bit better than usual, though. ★★

DARKSEED

Cyberdreams £34.95
AP19 83% SC

One of the best games on the SNES and Mega Drive just got a whole lot better. Naturally enough, the Amiga version of this isometric helicopter gunship classic has got better graphics, better explosions and generally all the stuff you need to turn your puny console-owning friends *Lemmings*-hair-green with envy. Ocean £29.99

AP21 64% RL
Sophisticated strategy/action game of robo-warfare. Plenty of scope for tactics, weaponry and good old blasting, but the disjointed gameplay and dull graphics make it less impressive than the 'thinking man's blaster' it tries to be. ★★

ROME AD 92
Millennium £25.99

AP19 59% LE
It's quite fun at first as the story unfolds and your quests start. The statics are nice and the whole thing seems like a good idea until you've played it for a long time. If only a little more were happening it would be a cracking little adventure. ★★

SABRE TEAM
Krisalis £25.99

AP19 68% LE
Suffers dreadfully from a lack of speed. The storyline is sound and everything about the game suggests that it could be really good. If only it wasn't for that damn lack of speed. ★★

SENSIBLE SOCCER
Renegade £25.99

AP15 93% SC Top 100 No.1
An unbelievably playable, fabulously realistic, and amazingly atmospheric football game. The best two-player game available on the Amiga and probably one of the top two Amiga games of all time. Do yourself a favour – buy it! ★★★★★

SENSIBLE SOCCER 92/93 SEASON
Renegade £25.99 stand alone

£3.95 upgrade
AP21 94% SC Top 100 No.1
The original was voted the best Amiga game ever by you readers, and this is even better. It's more realistic, there are red and yellow

cards now, the goalkeepers are better and the teams' skill levels have been tweaked, making the game tougher. Just about the best game in the world for the Amiga, so if you haven't already got it: 1. Why not? and 2. Get this one instead. ★★★★★

SHADOW OF THE BEAST 3
Psygnosis £29.99

AP18 71% SC
A sweet game to play but you're not getting enough for your 30 quid. More fun than the other two *Beast* games and there's no free T-shirt (that's a very big plus, by the way). There's just not very much to it. ★★

SHADOWWORLDS
Krisalis £25.99

AP19 85% JD
Enormous fun to play, *Shadowworlds* has all the good elements of an RPG with none of the complexities. The lighting effects create a great atmosphere but sometimes the action gets a little ahead of the control system. Otherwise one hell of a game. ★★★★★

SHUTTLE
Virgin £30.00

AP19 58% RL
It's taken two years to program, it's packed with detail, it's big and it's dull. It's no fun to play and the presentation is muddled. The constant disk accessing is a pain but fans of the genre will probably like it – but only because there is no other shuttle sim. ★★

SIM CITY DELUXE
Infogrames £29.99

AP25 92% SC Top 100 No.11
The one true god among god sims, now repackaged in this special 'Deluxe' edition, which just means you get the original game plus the *Terrain Editor* and *Architecture 1* add-on disks for your thirty quid. Yes, thirty quid – and that's our main objection. The game's as marvellous as it ever was, but frankly over-priced in this format. ★★★★★

SIM EARTH
Ocean £34.99

AP17 41% JD
As a simulation of a living planet, it's spot on. The problem is that ecosystems are, by their very nature, slow, dull things and neither the presentation nor the interface do anything to make them more interesting. ★★

SLEEPWALKER

Ocean £25.99
AP23 84% SC Top 100 No.97
Gorgeous *Lemmings*-meets-*Sonic* arcade puzzler, made all the better by being in aid of Comic Relief. Don't buy it for that, though – buy it 'cos it's a corking little game, Ocean's best for ages. We like it. ★★★★★

SLEEPWALKER A1200 VERSION

Ocean £25.99 Top 100 No.97

AP24 84% TT
Pretty much exactly the same as the normal version, only with 24 colours used in the game instead of 16. Oh yeah, and there's 256 colours in the opening sequence, apparently. Ooooooh. ★★★★★

SPACE CRUSADE: THE VOYAGE BEYOND

Gremlin £24.99 (stand alone) or £14.99 (data disk)
AP23 80% DG Top 100 No.98
Loads more scenarios for *Space Crusade*, very well done without offering anything significantly new. It's a data disk, basically. ★★★★★

SPOILS OF WAR

Interneccine £29.99
AP14 45% JD
Tedious rubbish. There is no truth in the rumour that wargames have to be dull to be realistic. We've said it often enough by now, but just to reiterate – something being a wargame isn't an excuse for it being programmed to sub-1986 standards. ★

STARUSH

Ubi Soft £25.99
AP14 64% SC
Lots of nice touches in this zodiac-inspired blaster, but unfortunately they're not attached to a decent game. Not a rip-off, but not really worth buying either. ★★★

STREET FIGHTER 2

US Gold £27.99

AP22 74% SC
The coin-op conversion that everyone was waiting for, *SF 2* is the second-best beat-'em-up – after *Body Blows*. The control method works, the graphics are fairly faithful to the arcade version (with a few less colours of course), and there's enough speed to give you a good game. A brilliant two-player game, a little less fun for one. ★★★★★

STRIKER

Rage £25.99

AP15 76% SC
Fast moving and immediately playable, but it's just a bit too sophisticated for its own good, proving very frustrating unless you select one of the top sides. It's a good game but at the end of the day *Striker* lacks the necessary polish to make it stand up to the sheer class of

the all-conquering *Sensible Soccer*. ★★

SUPER TETRIS

MicroProse £29.99
AP17 54% SC
Tetris with knobs on. But why? It's no better than *Super Twintris* and you can get that for nothing. ★★

SWORD OF HONOUR

DMI £25.99

AP18 28% LE
You spend longer waiting for the screens to load than you do playing them. Nothing original here, just a poor man's copy of *The Last Ninja*. Very slow and boring. ★

TEARAWAY THOMAS

Global Software £25.99
AP22 79% TT Top 100 No.92
A console beater in full glory, this is about the fastest you'll see your Amiga go – and boy is it fast. Good fun too, if in a rather simple platform way. Take Thomas tearing through the levels to collect gems and jump on bad guys' heads – you know the score. A bit more depth would have made it an Amiga classic, but as it is it's a good romp and lots of fun. ★★★★★

TENNIS CUP 2

Loricel £25.99

AP17 72% MS
The control system is difficult to get to grips with at first, but, once mastered, it makes this one of the better tennis sims. Good looking with lots of options. All this and Inspector Clouseau announcing the scores – what more could you want? ★★★★★

3D CONSTRUCTION KIT 2

Domark £49.99

AP21 80% JD
This is a games creation utility which gives you the power to put together your own 3D environments and make games out of them. This version gives you extra features not found on the first, like the ability to add sound effects, support for spheres and a disk full of clip art. It's quite hard to get into the programming, but it's still a lot easier than other languages and a neat way to get into creating 3D games. ★★★★★

TINY SKWEEKS

Loricel £25.99

AP19 68% RL
Previously previewed as *The Brainies*, this is a sweet little puzzler

which'll get your mind turning somersaults, but won't really get you excited enough to want to plough through all 101 levels. One of the better games in the genre, though. ★★★★★

TOUCHDOWN

Strike Force £14.99

AP15 48% NW
Slick presentation keeps up the pace of a technically sound, if not particularly enthralling, coaching sim. All the basic features you'd expect, but gridiron fans deserve more action and a little more to excite the imagination. ★★

TRANSARCTICA

Silmarils £29.99
AP23 64% MW
Strategy affair with a great plot, but let down by a lack of gameplay depth and some serious slowness. A bit of a disappointment. Brrr chuff. ★★

TREASURES OF THE SAVAGE FRONTIER

US Gold/SSI £32.99

AP19 34% LE
An out-of-date RPG when compared to the likes of *EOTB* and *Storm Master*. It's slow with a disgusting amount of disk accessing and no hard drive installation option. It shows how an old formula can go stale when pushed too far, and this has been pushed too far. ★★

TRODDLERS

Storm £25.99

AP18 89% AP
The best elements of some of the best styles of gameplay in history combined in one cute package, and it works. Two styles combine to make a classic game in its own right. It's better than *Lemmings*, allegedly. ★★★★★

TROLLS

Flair £25.99

AP21 83% MW
If bright, cute and cheerful platform-type games are your thing then this has to be the one for you. Everything about this is so fluffy and nice that you want to hurl, and there really isn't really anything bad to say about it. ★★★★★

TV SPORTS: BASEBALL

Mindscape £25.99
AP15 52% NW
Well put together, but very tedious after an hour or so. If you do want

BALDY BOONIE
AGE 33 TEAMS 1 MONTH 2
HEIGHT 6' 5" WEIGHT 180
PUSH % 100 LEFT 100

baseball on your Amiga then try the much better *RBI Two Baseball* instead. ★★

TV SPORTS: BOXING

Mindscape £14.99
AP19 56% AP
Well, it's the best job anyone's made of a boxing game so far. Sadly, it's still a boxing game, and it leaves a fair bit to be desired in the lasting-appeal department. ★★

UGH!

Play Byte £25.99

AP15 79% MR
A laugh and a half, *Ugh!* offers you excellent one- or two-player prehistoric fun, for a while at least. Not the sort of thing you'd be playing a year later, though, but worth a look. ★★★★★

UTOPIA: THE NEW WORLDS

Gremlin £14.99

AP14 60% SC
Er, some new worlds for *Utopia*. They're okay, really. Is it just us or is £15 a lot of money for a data disk? ★★

VEKTOR STORM

Inova Games £29.99
AP23 60% TT
Scruffy-looking version of beautiful arcade game *Tempest*, prone to speed-up and slow-down and sticky control. *Tempest* was gorgeous, but this is mediocre, and 30 quid to boot. What a shame. ★★

VIKINGS

Krisalis £25.99

AP16 81% MR
A strategy wargame thing that doesn't look ugly or contain too many statistics. It also has an easy-to-use interface. It's a bit like *Defender Of The Crown* without the action sequences but with some kind of magical addictive ingredient thrown in instead. And you can compete against your friends. ★★★★★

WALKER

Psychosis £29.99

AP24 85% MW Top 100 No.58
Strut around in a huge metallic blue chicken and kill everything that moves in this needlessly gratuitously violent game. Mowing down masses of attacking troops from the comfort of your bedroom never seemed like such a great idea in this graphically wonderful (but somewhat repetitive) blaster. ★★★★★

WAXWORKS

Accolade £34.99

AP22 70% JD
A horror game that fails to really frighten but does offer some good entertainment with macabre twists. There're maybe a bit too many mazes for its own good, but there are also some puzzles and some fighting to be done. Worth a look for horror fans. ★★

WEEN

Coktel Vision £29.99
AP19 81% LE
A bit on the overpriced side, and a bit titchy, but a nifty little puzzle-based adventure thing all the same. A brilliant control interface too, but the game needs a little more to it to qualify for classic status. ★★★★★

WING COMMANDER

Mindscape £34.99
AP21 55% MR

Everything that was on the original PC version is replicated here, which means that the standard Amiga is so bogged down with data that it runs hopelessly slow, far too slow to make it playable. On the A1200 though, the 3D sequences run fast and smooth, making this the benchmark game for future A1200 shoot-'em-ups. ★★★★★ (for the... A1200)

WINTER SUPERSPORTS 92

Flair £25.99
AP15 61% GP
A high price to pay for what boils down to four different events. None of them are particularly involving or compelling, but there's fun to be had when more than one player is involved. ★★

WIZKID

Ocean £25.99

AP15 91% MR Top 100 No.15
A refreshing game that mixes psychedelic arcade adventure, football, and bad jokes with arcade games like *Breakout* and *Pengo*. With its perfect control system it's as much fun to play as it obviously was to write. The best game ever (beginning with the letter W at least). If you don't buy *Wizkid*, your life really will be a lot poorer. ★★★★★

WORLD CLASS RUGBY – THE FIVE NATIONS

Audiogenic £25.99

AP14 86% MS Top 100 No.79
Dramatically-improved version of the earlier game, right up there with *Rugby – The World Cup* for playability and action. The 3D second-person perspective view (à la *John Madden Football*) is neat, too. ★★★★★

WWF EUROPEAN RAMPAGE

Ocean £25.99

AP22 18% JD
Minimal control system, inferior graphics and practically non-existent gameplay. Quite simply a completely crap beat-'em-up that vies for your dosh by cashing in on WWF mania. Don't bother. ★

ZOO

Gremlin £25.99
AP18 90% LE Top 100 No.71
Heralded as a *Sonic*-beater, but let's face it, it isn't. Still, it IS one of the Amiga's finest and zappiest platformers, and a good attempt at beating the consoles at their own game. You should, though, check... ★★★★★

AP18 90% LE Top 100 No.71
Heralded as a *Sonic*-beater, but let's face it, it isn't. Still, it IS one of the Amiga's finest and zappiest platformers, and a good attempt at beating the consoles at their own game. You should, though, check... ★★★★★

ZOO ENHANCED A1200 VERSION

Gremlin £25.99

AP24 78% TT Top 100 No.71
...this. Colourful parallax scrolling backgrounds make the whole game a lot prettier, but also clutter it up to an extent that they hide on-screen baddies. Not so much enhanced as tarted up, and you could well find that you prefer the original. Still, some opinion in the office DOES hold that this is a big improvement on the original, so at least try to have a look at it if you've got a 1200. ★★★★★

ZYCONIX

Accolade £24.99

AP19 63% LE
Decent mix of several puzzle-game standards (*Tetris*, *Columns*, *Klax*, you know the score), which doesn't really have enough character of its own to stand out from the crowd. All right, but unremarkable. ★★

THE RIGHT PROFILE

Looking for Linda? Well, Linda's found you. Here on the back page. In The Right Profile.

She runs AMIGA POWER. And she really likes flowers. Now, for the first time ever, we give you the full facts on Britain's sunniest editor.

What do you believe in?

Love, hope, friendship and beauty.

What was the first thing you said today?

"A French stick for the garlic bread and a tin opener".

Who's your favourite historical figure?

Lilith – Adam's first wife who was damned for disobedience.

What's your Number One object of desire?

Well, apart from World Peace, at the moment it's a cottage in the country with a kitten or two.

What have you got in your pockets?

A Walkman with a Lee Hazelwood tape in it, an empty cigarette packet, a box of matches, keys on a Mickey Mouse keyring, bobbles, chewing gum, lip balm and a receipt for something that cost 80p.

Which is nicer – a bunch of daisies or a fluffy bunny rabbit?

That's easy – a bunch of daisies.

"For the last blossom is the first blossom"

If you could be in a computer game, which one would it be?

Sleepwalker – all that action and I don't even have to wake up.

Is there anything or anyone you'd kill for?

I'd like to think that if somebody was threatening to kill somebody I love then I'd kill them, but I wouldn't know if I could until the moment. If you see what I mean. Oh, and if killing one person would unite the whole world then I might do it, but that's a bit unlikely.

Would you vote for the Maastricht treaty?

Yes. Absolutely definitely.

What's your favourite BMX Bandits song?

Serious Drugs. But I don't want to negate all their old stuff so can I have Disco Girl too?

Are video games killing pop music?

The record industry is killing pop music. Five quid for a CD single is a rip-off. People have too narrow a definition of pop music – there's some great pop music around these days and I have immense faith in it.

What's your favourite planet in the Solar System (except Mars)?

Jupiter, because I used to be able to see it sometimes when I was lying in the garden on a summer's night

What would your autobiography be called?

"I'm really full".

What's the nicest thing anyone's ever said to you?

"I love you".

What one thing do you think would most improve the software industry?

Programmers being allowed to do exactly what they want. Imagine.

What would you like your epitaph to be?

For the last blossom is the first blossom,
And the first blossom is the best blossom,
And when from Eden we take our way,
The morning after is the first day.
(Louis MacNeice)

Have you got a message for all the devoted male groupies who've already started writing to us?

1. Write to the Pastels and ask them when the album's coming out.
2. Go to the opticians.
3. Don't throw rocks.

DATE OF BIRTH: 29. 6. 69
MARITAL STATUS: Old maid

I was born in the Salvation Army Mother's Hospital in Lower Clapton Road. (This probably explains my fascination with the Salvation Army shop in Norwich.) My dad, my aunt, my cousins and my little sister were all born there too but it's not there anymore. I spent my formative infant years playing in the graveyard at the back of our house, reading and making elaborate villages out of lego, wooden bricks, stickle bricks and Meccano with my little brother. Then I went to secondary school and did exactly the same things, except I built villages with my newer little sister rather than my getting-bigger-all-the-time brother. I managed to get through school with the minimum of fuss: I only got into one fight and only got detention for being late (all the time). I did my homework and my exams, and then looked around for the right place to spend the next three years of my life. I found Norwich, went there for an interview and just had to go there.

When the time came, I packed my suitcase full of my favourite books and left for Norwich and the University of East Anglia. I spent three years there with ace people reading all the books we wanted and writing about our favourite things – and this was 'work'. When we weren't, erm, studying we rummaged in the Salvation Army shop, took the little train to Cromer and drew fish on the sand. In the evenings we danced to Joe Tex and The Soupdragons and went and swooned at Noel the Bowl! For a year I lived in my first own room in an old airbase H-block then, when I was nineteen, seven of us had a house called Dalrod. It was the best year ever. And then a year later I did my final exams, went to Glastonbury, phoned Norwich for the results and celebrated. It was all over – I had to start looking for a job. I applied for one at Future Publishing, got it, moved to Bath and started working on Your Sinclair with old AP editor Matt Bielby and art assistant Sally Meddings.

I started my new life as a staff writer, moved up to become editor and was then asked if I'd like to work on AP. Well, I thought, I might as well, eh? (Actually, I was absolutely terrified – but I love it now!) (We were terrified too, Linda – but we love you now! – The AP Team)

NIGHTS

Sinbad Junior works for the "fair and just" Caliph as an apprentice gardener tending to his incredibly excessive palace gardens. Today however he gazes upon another beautiful flower - the Princess Laila as she stands on a balcony high above the gardens.

Away in an eerie floating castle dark deeds are at hand. The evil Vizier, in his dastardly plan to rule the kingdom, has despatched a demon from the nether regions of hell to kidnap the princess and cast a mighty spell over the kingdom.

As Sinbad stares up at the balcony a dark shape descends from the sky, mauling and clawing at Laila.

Laila screams and the demon lifts off clutching the beautiful princess. Sinbad makes a desperate leap to grab the claw of the monster, but is left on the balcony flat on his back. As the demon disappears into the clouds Sinbad is surrounded by the Caliph's guards and hurled into prison on a charge of sorcery. Now, taking on the role of Sinbad Junior, you not only have to escape the palace dungeons, but rescue Laila from the evil Vizier.

NEXT MONTH! Oh, it's so hard to tell. You know how it is, every month we take a guess at what we're going to have in the future, it's almost invariably completely wrong (due to circumstances beyond our control etc), then everyone gets all upset and writes us complaining letters and nobody's happy. So instead of doing that, this month let's all just sit down for a few minutes, take some deep breaths and think nice thoughts. There. Isn't that better? Now, next month, it'll all come as a pleasant surprise.

We might have this next month. Or not.
